GEMSTONE

Story has always been important to us. It is what has driven us from the very beginning and it is what continues to inspire us today. Our story begins with porcelain tiles, surfaces that are both technically excellent and beautifully satisfying to the eye. Gemstone is a testament to our commitment to creating products that are both functional and aesthetic.

The Gemstone collection from VITL brings handmade ceramic tiles in an array of muted to vibrant colors, textured bodies and a high-shine finish. The ultimate balance and unexpected twist between a glossy look blended with the handcrafted charm of artisanal tiles. Available in three different formats, all with artistically uneven surfaces and irregular edges.

Product Characteristics

Breaking Strength (ASTM C648 or ISO 10545-4)	>240lbf
Chemical Resistance (ASTM C650 or ISO 10545-13)	Not Applicable
DCOF	Not Applicable
Deep Scratch Resistance - Unglazed (ISO 10545-6)	Not Applicable
Frost Resistance (ASTM C1026 or ISO 10545-12)	Not Resistant
Mohs Hardness - EN101	Not Applicable
Water Absorption (ASTM C373 or ISO 10545-3)	10-18%
Certifications	Not Applicable
Country of Origin	Not Applicable
Shade Variation Code	V2

CERAMIC CARE & MAINTENANCE

Glazed tile products should be cleaned routinely with an all-purpose, low VOC, household or commercial cleaner. The product chosen should also be grout joint cleaning compatible. The type of product may vary depending on the tile application and use. A multipurpose spray cleaner, which removes soap scum, hard water deposits and mildew designed for everyday use can be used on wall tile areas in residential baths and showers. A cotton mop, cloth, sponge, or non-metallic brush should be used to apply and agitate cleaner. Rinse the area with clean water and dry thoroughly. Routine cleaners should never contain harsh chemicals as these can damage tile. Acids can damage grout and the glazed surface of the tile. Ammonia can discolor grout.

Regular dust mopping, sweeping, or vacuuming is recommended prior to cleaning with liquid products.

Unglazed tile should be cleaned routinely with concentrated tile cleaners with a neutral pH for safe regular use. These cleaners are better suited for removing grease, oils, and normal spills from unglazed products. Again, these products will vary depending on the application, amount of traffic and the use. The product chosen should also be compatible with the grout.

WHEN IT MUST BE GREAT.

WHEN IT MUST BE READY.

WHEN IT MUST BE EXTRAORDINARY.

WHEN IT MATTERS MOST.
