

## THE BATTERY

1. The battery is the power source for the system.

2. It provides the energy to start the engine and to power the electrical system when the engine is not running.

3. The battery is located in the engine compartment and is connected to the engine and the electrical system.

4. The battery is a lead-acid battery and is composed of several cells.

5. The battery is a maintenance-free battery and does not require any special care.

6. The battery is a sealed battery and is not subject to electrolyte leakage.

7. The battery is a long-life battery and is designed to last for several years.

8. The battery is a high-capacity battery and is able to provide a large amount of energy.

9. The battery is a low-maintenance battery and is easy to use.

10. The battery is a reliable battery and is able to provide a consistent amount of energy.

11. The battery is a safe battery and is not subject to explosion.

12. The battery is a clean battery and does not produce any harmful emissions.

13. The battery is a quiet battery and does not produce any noise.

14. The battery is a compact battery and is easy to store.

15. The battery is a lightweight battery and is easy to handle.

## DISASSEMBLY

Part No.	Qty.	Description
1	1	Battery
2	1	Terminal
3	1	Bracket

1. The battery is the power source for the system.

2. It provides the energy to start the engine and to power the electrical system when the engine is not running.
