

Spontex Tough Scourers are ultra powerful. They remove the toughest burnt on food and grease from baking trays, grills and BBQs. They are recommended by Pyrex to remove stubborn baked on food from their glass dishes and jugs.

Our Tough Scourers are made using 90% recycled rust free stainless steel. Once they have reached the end of their life they can be taken to your local waste facility for recycling. As part of our commitment to switch to more sustainable packaging, we no longer use a plastic bag on this product. We've moved to a fully recyclable cardboard box that contains 70% recycled content and is made with materials from sustainably managed forests. This means we are using 250kg less plastic for every 100,000 packs.

Spontex products are designed and tested to high standards.

USAGE GUIDELINES: Always rinse thoroughly before and after each use. Test on an inconspicuous area of the surface to be cleaned before use. Do not use on non-stick pans, plastic bathroom suites, enamel or any other delicate surfaces.

Made in China

DID YOU KNOW?

These scourers used either with hot soapy water or a cleaning paste are ideal for tackling the inside of the oven, especially the racks and glass.

TOP TIP: These scourers are long lasting and can be used again and again. Just give them a quick rinse before storing away ready for next time.

WARNING: We've separated the scourers using fully recyclable paper bags to try and avoid entanglement. Please be careful when removing the scourers from the pack and when using them. To avoid possible injury, ensure they do not wrap around fingers or hands. If they become tangled, do not pull them, snip them carefully with scissors. It's advisable to wear rubber gloves when using them.
