UNIFORMS®
BY STANDARD TEXTILE

Uniform management can be complex, time-consuming, and expensive.

Making sure the right people are wearing the right uniform in the right place is a challenge.

Each department has a distinctive need, and each employee serves a specific role.

Employee identification is beneficial, yet limiting variations in appearance is meaningful to patients.

Uniform management is a priority, but so is ensuring an appropriately staffed work shift.

Standardizing and driving uniform compliance can feel insurmountable, especially when people are on the move.

Your uniform management efforts impact the experience of employees and patients.

That's where Scrubin Uniforms® by Standard Textile can help. Hundreds of healthcare operators have partnered with us to simplify uniform management.

We simplify uniform management by providing a wide range of uniform options, a custom uniform portal, sizing kits, and by offering employees program pricing on all apparel.

We've found that both small and large organizations have consistently managed their uniform programs easily, quickly, and seamlessly by partnering with Scrubin Uniforms® by Standard Textile.

Scrubin Uniforms®
