

IR Door Sensor Switch

Part Number	Description and Use	Dimensions
T-DSS-30W-IR	Infrared (IR) door sensor switch. Place as close to the light source as possible while ensuring it is not exposed to light when the sensor is intended to be inactive. Use with single color tape light or puck lights.	3/8" x 1" x 1-1/4"

T-DSS-30W-IR

1. Insert Male Plug on Power Supply into Female Plug on Door Sensor. Insert Male Plug on Door Sensor into Female Connector on lights.

2. Mount sensor on the face frame of cabinet, facing outward. When door is closed, lights will turn off.

3. If concealing the in-line Door Sensor Control above the cabinet, use the quick connect release to separate the two components, drill a small hole to thread the connector through, reconnect, and mount Sensor device.
