**3349** 4" x 4"

## PLUS

**3355** 4" x 3"

Dynarex Post-Op Sponges are crafted from non-woven materials to provide improved wicking and absorbency. The Sponges are highly absorbent, sterile, and packaged in a peel-down pouch for convenient aseptic handling. These Post-Op Sponges are ideal for a wide range of surgical procedures, including dialysis.

- Non-woven, 4-ply sponges designed to provide effective wicking and absorbency
- Ideal for a wide range of medical procedures, including dialysis
- Two pieces packaged in sterile peel-down pouch for convenient aseptic handling
- Ideal for a wide range of procedures, including dialysis
- 3355: 8-ply sponges with additional cotton layer for improved absorbency
- Sterile, not made with natural rubber latex
- 2 per pouch, 25 pouches per tray, 24 trays per case
