

## GASTROSTOMY TUBES

### ITEMS 5111-5124

Dynarex Gastrostomy Tubes are made from sterile silicone and feature rounded tips for smoother insertion. These premium tubes are designed for ease of use during enteral administration of tubal feedings and medication.

- Three-port tube designed for safe, effective enteral feeding
- Features rounded tips for smooth insertion and improved comfort
- Constructed from sterile silicone for optimal hygiene
- Available in a wide range of sizes (12 Fr-24 Fr) for reliable fit
- Universal design allows for optimal adaptability
- Not made with natural rubber latex, BPA, or phthalates plasticizers
- Ideal for use in hospitals, long-term care facilities, and homecare
- #5111-5117: ENFit® connector reduces the risk of tube misconnection for greater safety
