

Snowflake Ice Mountain

Fill the tray with water and place it in the freezer. When ready, pop out the ice mountain and place it at the base of Olaf's slide. Use the melted water and the water dropper to water your garden.

Helpful hint: Place the tray in warm water for a few seconds. This will help release the ice.

STEAM Prompt #6

What do you think will happen to the water in the freezer? What happens when the ice melts? Is it better to water plants with ice cubes or water?

Shovel

Make snowflake shadows using your snowflake suncatcher. Just hold it up to the light and observe the reflection.

STEAM Prompt #7

Do you see a shadow or a shape?

What happens if you move it closer or farther from the light?

STEAM Concepts

S – Science

Observe ice melting into water to nourish plants.

Discover glow-in-the-dark reactions when stickers are “charged” with light.

T – Technology

Use the snowflake suncatcher to explore light and reflections.

Explore how light energy charges the glow-in-the-dark snowflakes.

E – Engineering

Stack and layer materials (sensory snow, potting mix) to create structures to grow plants, and to create impressions in the snow with the stamps.

A – Art

Decorate the garden and play areas with stickers.

Arrange glow-in-the-dark snowflakes to make magical patterns.

Press character stamps in sand to create playful designs.

M – Math

Measure the growth of your Chia plants over time.

Plant 'n Play

Elsa's Adventure Garden

4+

Step into the world of Disney's Frozen! Join Anna, Elsa, and Olaf on an exciting Plant and Play adventure. Each character includes a special stamp to make a magical mark in the snowy landscape.

Help Anna grow a beautiful garden filled with real Chia plants. Add the potting mix, seeds, flower accents and a little water to make the beautiful gardens of Arendelle!

Slide into winter fun with Olaf as he plays in the snow, landing safely in a soft pompom snowball pit. Add water to the tray and make a icy mountain for Olaf, then use the melting ice to water the garden—magic and science all in one!

And for Elsa, play in the sparkling icy palace where snow and magic come to life. Decorate your set with stickers, and glow-in-the-dark snowflakes to see her world twinkle in the dark.

Build, grow, and play in Frozen's Arendelle—where every snowflake, plant and icy adventure is full of STEAM magic!

WARNING:
CHOKING HAZARD - Small parts.
Not for Children under 3 years.

Getting Started

Set up Elsa's castle, Anna's garden, and Olaf's snowy play area on a flat surface as shown.

Decorate

Add the stickers and glow-in-the-dark snowflakes to the playset. Charge the glow in the dark snowflakes with a bright light. Turn off the lights to make your Frozen world glow!

Glow in the Dark!

STEAM Prompt #1

Do all the stickers glow the same? Does the glow change over time? Can you use a light to help them glow brighter?

Grow Your Garden

Prepare the potting mix – you will need a small bowl and your planting shovel for this step.

Open the bag of potting mix, and place it in a bowl; Add small amounts of water and mix it with your shovel until the soil is damp and clumps together. If the potting mix is too wet, lay a paper towel on the surface to absorb the excess water.

Using your planting shovel, place the potting mix inside the garden as shown, gently pressing it down as you go.

Rinse and dry your shovel.

Plant the Chia

Sprinkle a few chia seeds evenly in the planting area. Save the rest to plant later. Gently press the seeds into the surface.

Use the water dropper to moisten the seeds.

STEAM Prompt #2

Compare how the soil feels before and after adding water. What changes when we mix in water?

Place in bright, indirect sunlight.

Planting too many seeds at one time will inhibit plant growth.

Seeds sprout in 3–5 days!

Keep the soil moist using your water dropper.

STEAM Prompt #3

Why do we use a water dropper?

What happens if the soil gets too wet?

As the chia grows, measure and chart its growth.

Place Flowers

Help Anna place the flowers inside the garden.

STEAM Prompt #4

Make your own creative story about Olaf, Anna and Elsa's adventures

Add the Snow

Fill the North Mountain area with the sensory sand. Squish and stretch the sand, to make it fluffy. You can also use the shovel to scoop and squish. Press the characters into the sand to create designs.

Place the pompom snowballs at the base of Olaf's slide.

STEAM Prompt #5

How does the snow feel when you squish it? Do you prefer to use your hands or the shovel to squish? Can you build a snowman with the sensory sand?
