WEIGHT
61.7 lb.

PACKAGE QUANTITY
1/Case

The Resp-O₂™ 10L Oxygen Concentrator is a convenient, high-performance device engineered to deliver supplemental oxygen for respiratory patients. With an adjustable flow range of 1 to 10 liters per minute, this concentrator combines powerful functionality with user-friendly features, including audible alarms, an easy-to-read control panel, and intuitive flow meter knob. Designed for portability, it includes four rolling casters and a top handle for improved mobility.

- High-performance concentrator designed to provide reliable supplemental oxygen for respiratory patients
- Provides an adjustable oxygen flow range of 1-10 liters per minute
- Includes visual and audible alarms for Low Flow-rate, Low/High Pressure, and Power Failure
- User-friendly control panel provides optimal visibility
- Equipped with an intuitive flow-meter knob for precise oxygen adjustment
- Operates at 50 dB, quieter than a typical conversation, for minimal disruption and added comfort
- Convenient rolling casters and accessible top handle provide improved mobility
- Suitable for a wide range of medical environments and home care applications
