STORAGE

Because materials respond to temperature and humidity, it is important to store furniture in controlled environments. Furniture should not be placed in direct sunlight or near air-conditioning outlets, radiators, heaters, or humidifiers. Any changes such as extreme heat or cold, dampness, or dryness, may cause noticeable shrinkage or swelling of wood. Direct sunlight may affect the coloring of materials over time.

CARE & CLEANING

To clean wood or metal parts, use a lint-free, soft cloth with a non-toxic cleaner. Wipe dry immediately. To avoid scratches or other damages, do not use abrasive chemicals or materials. For fabrics, we recommend using a non-toxic foaming fabric cleaner or leather cleaner where appropriate. Touch up kits are available for purchase by contacting us:

ALMACENAMIENTO

Dado que los materiales responden a la temperatura y la humedad, es importante guardar muebles en ambientes controlados. No deben ponerse los muebles a la luz solar directa ni cerca de salidas de aire acondicionado, radiadores, calefactores ni humidificadores. Cualquier cambio como los extremos de calor o frío, humedad o sequedad, pueden causar notoriamente encogimiento o hinchazón en la madera. La luz solar directa puede afectar la coloración de los materiales con el paso del tiempo.

CUIDADO Y LIMPIEZA

Para limpiar piezas de madera o metal, use un paño suave sin pelusa con un limpiador no tóxico. Seque con un paño inmediatamente. Para evitar rayar o dañar la superficie, no use agentes químicos ni materiales abrasivos. En cuanto a las telas, recomendamos usar una espuma limpiadora no tóxica para telas o un limpiador para cuero según corresponda. Hay kits para retocar disponibles para la venta contactándonos:

RANGEMENT

Compte tenu que les matériaux réagissent à la température et à l'humidité, il importe de ranger le mobilier dans des environnements contrôlés. Le mobilier ne doit pas être placé en plein soleil ni près des sorties d'air climatisé, des radiateurs, des appareils de chauffage ou des humidificateurs. Tout changement comme un froid ou une chaleur extrême, de l'humidité ou de la sécheresse pourrait causer la contraction ou le gonflement du bois. La lumière directe du soleil peut altérer la couleur des matériaux au fil du temps.

NETTOYAGE ET ENTRETIEN

Pour nettoyer le bois ou les pièces métalliques, utilisez un chiffon doux sans peluche et un produit nettoyant non toxique. Essayez immédiatement. Pour éviter les égratignures ou autres dommages, veillez à ne pas utiliser des produits chimiques ou des matériaux abrasifs. Pour les tissus, il est recommandé d'utiliser un produit nettoyant pour tissus non toxique ou pour cuir le cas échéant.
