## **Care and use**

The Salter ten-year guarantee, subject to proper care and use, ensures replacement, substitution, or a refund for any product that fails due to faulty workmanship or materials. However, this guarantee does not cover damage resulting from accidents or misuse, and it complements your statutory rights. Before the first use, it is advised to hand-wash the ovenware thoroughly. This product is suitable for domestic oven use only, with a maximum temperature of 220 °C/Gas Mark 7. To prolong its lifespan, using a small amount of oil or fat is recommended. The ovenware is not suitable for use on a hob, in a microwave, under a grill, over an open flame, or on a barbecue. Always use heat-resistant plastic, silicone, or wooden utensils, avoiding metal ones, and refrain from cutting food directly in the ovenware as this may damage the surface. It is crucial not to overheat the ovenware or subject it to sudden temperature changes, and the ovenware should never be left unattended while in use, ensuring adequate kitchen ventilation. If the ovenware becomes chipped or damaged, discontinue its use. When cleaning, allow the ovenware to cool thoroughly before moving or cleaning it, and avoid pouring cold water onto hot ovenware. This product is not dishwasher safe; instead, clean it in warm, soapy water with a mild detergent using a soft cloth, steering clear of harsh cleaners or scourers. For stubborn stains, a non-abrasive plastic mesh or pad can be used with warm soapy water, and the ovenware should not be left to soak for extended periods. For storage, ensure the ovenware is dry, clean, and stored in a suitable place; if stacking, place a layer of paper in between pieces to prevent scratching. Always use heat-resistant oven gloves when handling hot ovenware and exercise caution when moving it in and out of the oven. If the ovenware becomes damaged or defective, discontinue its use.
