Care and use

To ensure the best performance and longevity of your ovenware, please retain these instructions for future reference. Before first use, thoroughly hand-wash the ovenware. It is suitable for domestic oven use only, with a maximum temperature of 220 °C/Gas Mark 7. To prevent sticking, lightly coat the inner surface with grease. For optimal care, it is advisable to use silicone, wooden, or nylon utensils, and avoid metal utensils altogether. Additionally, never overheat the ovenware and do not leave it unattended while in use. After use, allow the ovenware to cool completely before cleaning, as it is not dishwasher safe. Instead, hand-wash it with a mild detergent and a non-abrasive sponge, ensuring it is rinsed and dried thoroughly before storage. Avoid storing wet ovenware, and always use heat-resistant oven gloves when handling. Be cautious not to expose hot ovenware to cold liquids, and if you notice any signs of damage, dispose of it carefully.
