

BEMIS[®]

INNOVATION FOR EVERYDAY LIFE[®]

DECOR
23/24

There's no doubt the bathroom has evolved from a purely functional area within the home to a space of comfort and relaxation.

Over the past decades we have seen plain boring tiling develop into fashionable metro tiles combined with daring wall colours, statement cabinets and decor flooring.

Fashion has found its way into the bathroom with a large amount of colour, decor, texture and finishes. Today there is something to pick for every homeowner.

Within this brochure Bemis presents to you their new spectrum of colors and decors. Moulded wood toilet seats in trending colors, elegant matt finishes and duroplast seats with vibrant decors. Which one will be your favorite pick?

and you are
the artist.**

COLOR

MATT COLOR

Matt finish bathroom furniture, taps and accessories are here to stay! Their velvet finish provides a modern elegant feeling and creates an interesting contrast with glossy bathroom pieces.

Bemis moulded wood toilet seats in light or dark matt finish provide endless possibilities. A colour for every need.

Made from high-quality wood materials, our toilet seats are expertly crafted to provide long-lasting performance and comfort.

Did you know...

Bemis moulded wood toilet seats are made from post-industrial wood waste recycled back into toilet seats. The Bemis Matt colour range is certified with the FSC label - 100% wood from well-managed forests.

Bemis moulded wood seats are compression moulded at high temperature and with extreme pressure creating a high-density wood material. Due to this process the density of the material is so high that even after 24hr water submersion the material shows less than 5% weight gain.

DECOR

ELEGANCE

Model "Elegance" is an elegant and sophisticated seat made of Duroplast. Modern and minimalistic design with a flat surface; an ideal canvas to play with decors and colors.

This model has many variations such as standard or slow closing, top or bottom fixation, adjustable fixation and take off system for convenient cleaning.....whatever you may need.

Due to its standard shape, it will easily fit on universal ceramic shapes and in any bathroom. Depending on your preferred style, different decors are possible on the surface of the lid.

BOTANICAL

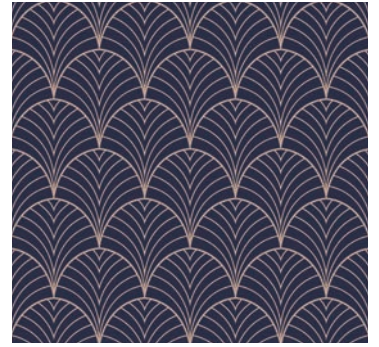

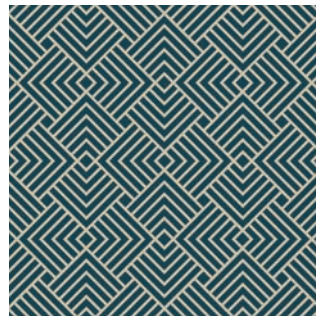

With the rise of sustainable biophilic designs for the living areas we see a need to bring the outside back in and reconnect with nature. Using natural materials like wood and plants will give your bathroom a sense of nature. Shades of green and botanical prints, going green has never looked more appealing.

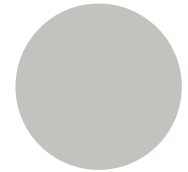

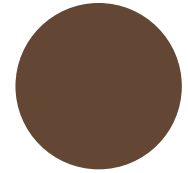

ART NEW

Gone are the days of plain and boring. Spice up your bathroom with handsome art deco details. Retro revival terrazzo teamed with strong colours and sharp edges make way for rounded soft shapes. Creating a sense of retro style in your contemporary bathroom.

JAPANDI

A fusion of Japanese and Scandinavian design that combines clean lines and a minimalist aesthetic with the rustic warmth and natural materials of the Japanese style.

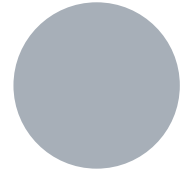

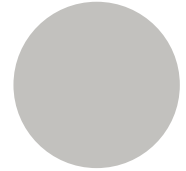

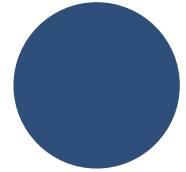

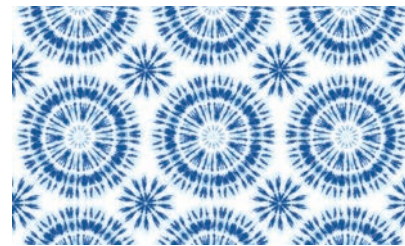

Japandi bathrooms are all about creating a calm and serene atmosphere through a combination of simple lines and natural textures. Think neutral colors with rustic wood and clean line patterns creating a spa-like feel.

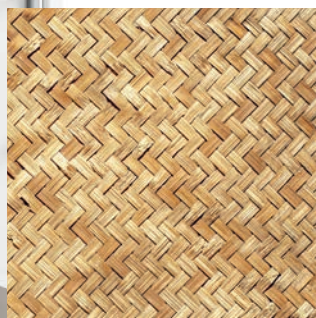

MARITIME

White and blue is a classic combination for coastal-style bathrooms. Give your room a contemporary maritime mood with navy blues combined with marble or white textured tiling. Use decorative mosaic patterns to add a splash of Mediterranean which turns your space into a cool and calming retreat.

NATURE

As people become more environmentally conscious, sustainable bathroom designs are gaining popularity. Materials such as bamboo, recycled glass, and reclaimed wood are being used to create stylish and eco-friendly bathroom designs. Warm neutrals dominate over greys and all-white color schemes, creating a timeless look and relaxed feel.
