SMALL APERTURE SERIES

SA68

SOLD AS EACH

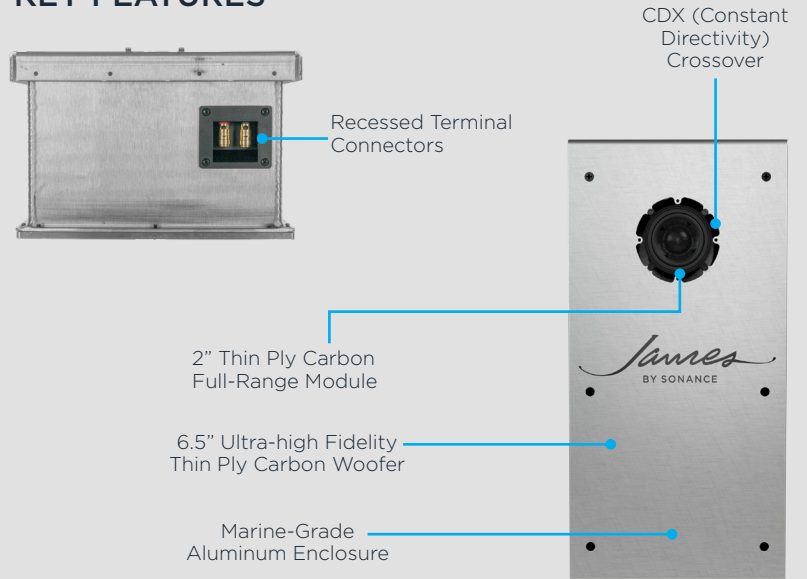

James SA68 Small Aperture Series Speakers are designed to disappear into the architecture, maintaining the aesthetic integrity of your space while delivering industry-leading audio performance. The advanced materials and design ensure the highest performance and aesthetic for spaces with refined details and expectations. With marine-grade construction, thin ply carbon driver construction, and trim options with eight standard finishes at no extra cost, James SA68 is the flagship for luxury audio design.

SMALL APERTURE MODULE

The James SA68 features an integrated ultra-high fidelity 6.5" woofer and 2" full range module, both leveraging thin ply carbon to achieve superior performance. Thin ply carbon is an exclusive material only used for the most demanding engineering applications. The thin construction allows for layering that can strengthen the cone while maintaining control of the weight and geometry.
