## OMNI MOUNT FOR

### PROFESSIONAL SERIES HIGH OUTPUT SURFACE MOUNT SPEAKERS

## QUICKSTART GUIDE

### BOX CONTENTS

- (1) Omni Mount Speaker Bracket
- (1) Omni Mount Wall Bracket
- (4) Speaker Bracket Screws
- (1) Hex Wrench
- (2) Side Covers

### DESCRIPTION

The Sonance Omni Mount for Professional Series High Output Surface Mount Speakers is compatible with the PS-S85T. The Omni Mount is designed to mount speakers from a centered plate position on the back of the speaker with the ability to pivot side to side and up and down.

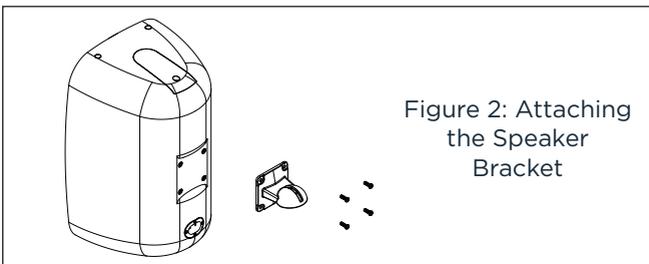

### INSTALLATION

1. Plan for speaker placement ensuring clearance on all sides for full range of motion. Consider the speaker's pivot range when determining final position.
2. Position the Omni Mount wall bracket with locking spikes pointing upward. Secure the flat back surface of the wall bracket to your mounting location using four screws appropriate for your surface material (wood, drywall, concrete, etc.) see Figure 1.

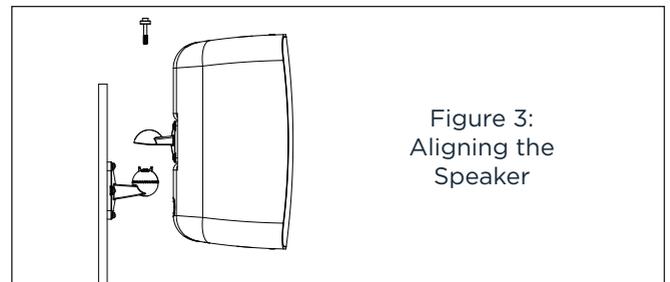

**NOTE: Screws not included. Select screws rated for your surface type and speaker weight.**

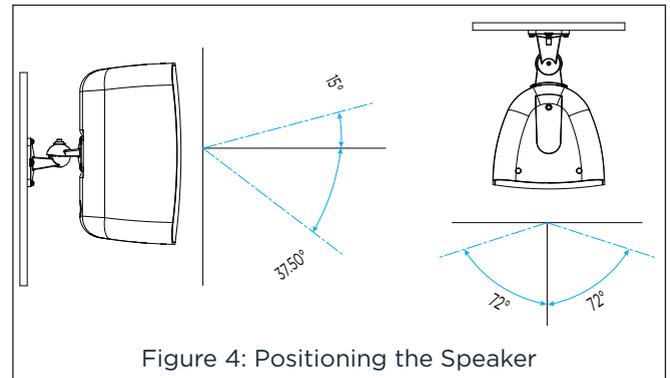

3. Attach the speaker bracket to the back center plate of the PS-S85T using the four provided speaker bracket screws, ensuring the rounded socket portion of the bracket cups downward (see Figure 2).

4. Assembling the socket to the ball joint.
  - Align the speaker bracket's socket with the wall bracket's ball joint (see Figure 3).
  - Insert the socket onto the ball, ensuring locking spikes align with the slot.
  - Insert the provided locking screw from the top and tighten to secure.

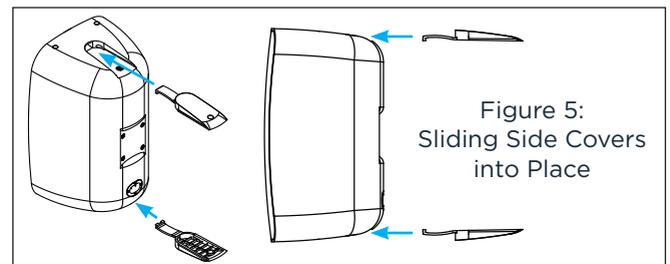

5. Tilt and pivot the PS-S85T speaker to the desired positioning (see Figure 4).

Once the Bracket is installed, follow the steps for wiring and connecting the PS-S85T loudspeaker as outlined in the speaker Quickstart Guide and Manual (provided with PS-S85T).

6. Slide the side covers into place on the ends of the speaker. Each one should click into position by sliding, clip first, into the slot on the top end and bottom end of the speaker (see Figure 5).
