

BRAVIA Projector 8 (VPL-XW6100ES)

Bring the Pro Cinematic HDR experience:
Native 4K SXRD home cinema laser projectors
(2,700lm) with XR Processor™.

Overview

Cinema is coming home

Step up to a new generation of immersive cinematic experiences with our latest native 4K laser projectors. BRAVIA Projector 8 elevates home entertainment to the next level, drawing on cutting-edge picture processing technologies by Sony that harness cognitive intelligence for the most realistic, emotion packed images yet.

Features

Wide dynamic range with richer, more subtle graduations

The latest XR processor for projector draws on Sony's acclaimed BRAVIA TV technologies, harnessing advanced data processing for real-time optimisation of individual on-screen objects. You'll be rewarded with stunning 4K HDR images with contrast and realism that are unattainable with previous-generation home cinema projectors.

XR Dynamic Tone Mapping

Peak brightness is analysed frame by frame: tone mapping ensures that direct sunlight and other bright highlights are faithfully reproduced, while retaining fine detail in dark shadow areas.

XR Deep Black

Laser dimming is accurately controlled in dark scenes like night skies, delivering deeper, richer blacks while maintaining tone and colour accuracy.

A billion bright, beautiful colours

High brightness is combined with XR Triluminos Pro technology, achieving over 95% coverage of the DCI-P3 colour space. Faithful reproduction of over a billion colours reveals the subtlest variations in saturation and hue.

Achieve ultimate clarity

XR Clear Image processing analyzes individual objects frame-by-frame, upscales all your favourite content to near-4K resolution and minimises picture noise. The results are so real – it's almost unreal!

Individually clear

Image cross-analysis ensures that optimal super-resolution processing is applied to individual objects within each scene, for incredibly natural textures.

Intelligent upscaling

Lower-resolution images are upscaled close to 4K, drawing on a vast pattern-matching database that intelligently reconstructs lost texture and detail.

More beauty, less noise

Thanks to powerful XR Clear Image processing, picture noise is minimised through zone division and dynamic frame analysis.

Brilliant pictures powered by innovative technology

Combining the brightness of our powerful laser light source with the game-changing XR processor for projector delivers a uniquely immersive native 4K HDR home cinema experience.

Image cross-analysis

Image parameters including colour, definition and contrast are analysed and processed in parallel, providing more natural artefact-free images.

Depth mapping

Depth and texture are enhanced by cognitive technology, accentuating foreground subjects for images that look more real and natural.

Focal point recognition

The natural focal point of the picture is enhanced, drawing the viewer's eye to the most important part of the scene.

Crystal clarity with Advanced Crisp-Focused (ACF) Lens

Our Advanced Crisp-Focused Lens features a 70mm aspherical front lens element that widens the focus area, ensuring crystal clear images from corner to corner. The floating focus system uses two moving lens groups and extra-low dispersion glass for distortion-free images with accurate colour reproduction.

Smooth, responsive gameplay

Get even more big-screen gaming excitement with the latest fast-paced titles. Everything's super-smooth, supple and responsive, giving you that crucial competitive edge when split-second reactions count for everything.

High frame rate, high resolution

Don't miss a moment with sports and adrenalin-packed first person video games. Support for 4K 120fps ensures smoothly rendered gameplay that makes on-screen action even more real.

Reduced input lag

Connect a compatible games console via HDMI 2.1 and the projector switches to Auto Low Latency Mode for responsive, fast-paced gaming excitement with reduced input latency.

Light and compact

Lighter and more compact than most native 4K home cinema projectors, the VPL-XW6100ES simplifies ceiling-mounted installation.

Ready for action

Out-of-the-box picture settings including colour and gamma are fine-tuned for home cinema watching, saving time on fiddly adjustments during installation.

Great in any space

Lens shift and keystone correction ensure perfectly-proportioned pictures, even in smaller rooms with high ceilings and limited depth.

Seamless integration with home automation systems

BRAVIA Projector 8 is right at the centre of your connected home entertainment world. Certified for compatibility with leading automation protocols such as Control4, Crestron, Savant and AMX, as well as remote maintenance services including OvrC and Domotz.

Entertainment that's more environmentally friendly

Enjoying great home entertainment doesn't have to mean compromising on sustainability. BRAVIA Projector 9 features advanced technologies that save energy and lessen overall impact on the environment.

Enhanced power efficiency

XR Deep Black technology precisely controls laser output frame by frame, reducing power consumption in dark scenes to improve energy efficiency.

Mercury free

The energy-efficient laser light source doesn't contain any mercury, making our projectors kinder on the environment at every stage of their lifecycle, from production to recycling.

Specifications

Display System

Display Device	SXRD 0.61" x3
----------------	---------------

Panel Resolution	3,840 x 2,160
------------------	---------------

Light Output / Contrast

Light Output	2.700 lm
--------------	----------

Dynamic Contrast	∞: 1
------------------	------

Light Source

Light Source	Laser diode
--------------	-------------

Projection Lens

Type	Powered
------	---------

Zoom Ratio	Approx. x2.1
------------	--------------

Lens Shift	Vertical +/- 85 %, Horizontal +/- 36 %
------------	---

Throw Ratio	1.35-2.84
-------------	-----------

Picture Position	5
------------------	---

Picture Processor

Picture Processor	XR Processor for projector
-------------------	----------------------------

Contrast	XR Dynamic Tone Mapping XR Deep Black
----------	--

Color	XR Triluminos Pro
-------	-------------------

Clarity	XR Clear Image
---------	----------------

Motion	Motionflow
--------	------------

Accepted Digital Signals

Accepted Digital Signals	720x576/50p, 720x480/60p, 1280x720/50p, 1280x720/60p, 1920x1080/50i, 1920x1080/60i, 1920x1080/24p, 1920x1080/48p, 1920x1080/50p, 1920x1080/60p, 1920x1080/100p, 1920x1080/120p, 3840x2160/24p, 3840x2160/25p, 3840x2160/30p, 3840x2160/48p, 3840x2160/50p, 3840x2160/60p, 3840x2160/100p, 3840x2160/120p, 4096x2160/24p, 4096x2160/25p, 4096x2160/30p, 4096x2160/48p, 4096x2160/50p, 4096x2160/60p, 4096x2160/100p, 4096x2160/120p
--------------------------	--

Accepted HDR Format	HDR10/HLG
---------------------	-----------

Input Lag

Input lag (4K 120P / 4K 60P/ 2K 120P)	12ms / 21 ms / 12 ms *1
---------------------------------------	-------------------------

Inputs / Outputs

HDMI	x 2 (HDCP2.3)
Features specified in HDMI2.1	4K120/ALLM
REMOTE	x1 (RS-232C, D-Sub 9-pin (Male))
IR IN	x 1 (Mini jack)
TRIGGER	x 1 (Mini jack, DC 12 V, Max. 100 mA)
LAN	x 1 (RJ45, 10BASE-T/100BASE-TX)
USB	x 1 (Type A, DC 5 V, Max. 500 mA) for Update

Other Functions

Gamma Correction	Yes (HDR/SDR)
Color Correction	Yes
Digital Keystone Correction	Yes
3D	No
Anamorphic Compatibility	Yes

Other Functions

OSD Languages	18-languages (English, Dutch, French, Italian, German, Spanish, Portuguese, Turkish, Russian, Swedish, Norwegian, Japanese, Simplified Chinese, Traditional Chinese, Korean, Thai, Arabic, Polish)
---------------	--

Power Requirements

Power Requirements	AC 100 V to 240 V, 50/60 Hz
--------------------	-----------------------------

Power Consumption

Power Consumption	380W
Standby	0.3 W (when “Remote Start” is set to “Off”)
Networked Standby	0.5 W (LAN)(When "Remote Start" is set to "On"). When a LAN terminal is not connected, it becomes a low power consumption mode (0.4W).
Standby Mode / Networked Standby Mode Activated	After about 10 Minutes

Ventilation

Ventilation (In / Ex)	Front/Back
-----------------------	------------

Acoustic Noise

Acoustic Noise	26 dB *2
----------------	----------

Dimensions w/o Protrusion

Dimensions (W x H x D)	Width: 460 mm, 18 1/8" Height: 210mm, 8 9/32" Depth: 517 mm, 20 11/32"
------------------------	--

Mass

Mass	Approx. 14kg / 31lb
------	---------------------

Temperature / Humidity

Operating Temperature / Operating Humidity	5°C to 35°C (41°F to 95°F)/20% to 80% (no condensation)
Storage Temperature / Storage Humidity	-10°C to +60°C (14°F to 140°F)/20% to 80% (no condensation)

Supplied Accessories

Supplied Accessories	Remote control (RM-PJ24) (x1)
	Size AA (R6/LR6) batteries (x2)
	Lens cap (x1)
	AC power cord (x1)
	Setup Guide (x1)

Notes

*1	Input lag reduction: On
*2	This value is approximate. Depends on the projector setting condition and usage environment.
