

SUCTION CANISTER KITS

800 cc Canister with Float Lid (Comes with 32202 only)

1/4" x 6' Suction Tubing

Cutttable 16" Silicone Tube with Clear Ruler Markings

The Resp-O2™ Homecare Suction Disposable Canister Kit is a comprehensive solution for medical professionals, combining key suction components in a ready-to-use format. This kit enhances procedural efficiency by eliminating the need to assemble multiple parts separately.

- All-in-one, ready-to-use kit provides the essential tools for safe, effective suctioning
- 800-cc suction canister with float valve shut-off helps to prevent backflow for optimal hygiene and patient safety
- Includes 1/4" x 6' suction tubing to offer extended reach and flexible positioning
- Hydrophobic shut-off disc reduces the risk of fluid backflow into the machine for optimal functionality
- Features both soft and rigid elbow connectors to provide versatile connection options for various medical settings
- Includes 16-inch cuttable silicone tubing with clearly marked gradations for optimal customization
- 32410: Universal kit without canister to suit individual needs
