PEDIATRIC

GROWTH

 Combined highly digestible proteins and prebiotics to help support digestive health.

 Association of prebiotics with a synergistic antioxidant complex including vitamin E, vitamin C, taurine and lutein; to support natural defences of the growing kitten.

Approximate size

COMPOSITION

Dehydrated poultry protein, rice, wheat gluten*, animal fats, maize, maize gluten, vegetable fibres, beet pulp, hydrolysed animal proteins, minerals, fish oil, yeasts, soya oil, Fructo-Oligo-Saccharides (FOS), psyllium husks and seeds, hydrolysed yeast (source of Mannan-Oligo-Saccharides), marigold extract (source of lutein).

Additives (kg) * * *

Nutritional additives:

Vitamin A: 20100IU, Vitamin D3: 710IU, E1 (Iron): 41mg, E2 (Iodine): 4.1mg, E4 (Copper): 8mg, E5 (Manganese): 53mg, E6 (Zinc): 159mg, E8 (Selenium): 0.07mg.

Preservatives - Antioxidants.

FURTHER INFORMATION

The typical kitten growth curve:

- Intense growth period: from weaning until 4 months
- Consolidation phase: from 4 months growth rate slows and the kitten gradually reaches it's adult size

^{***} NOTE: Values reflect only levels added to the formula, not those naturally occurring in components of the diet. For total levels in the diet, refer to the Average Analysis pages.

^{*}L.I.P. (Low Indigestible Protein): protein selected because of its very high assimilation.

^{**}Calculated according to NRC2006
