

## PowerPanel Personal v2.7.1 Release Note

### New Feature

#### Feature Improvements

- The online update function was optimized for better performance.

#### Fixes

- Resolves an issue where “gibberish text” appeared when the application was installed using the Windows 11 OS.
- Corrects an issue for being able to establish a unique identifier when a UPS, not serialized, is connected to a computing device, that is also not serialized, and it causes PowerPanel Cloud to view multiple UPS as duplicates when connecting via PowerPanel Personal (on Windows 11 Pro 25H2 and Windows 10 OS).
- Fixes an issue where an abnormal load was encountered in the previous version of PowerPanel Personal 2.7.0 when connecting to PowerPanel Cloud.

#### Other

**Note: Older versions of PowerPanel Personal (v2.4.8 and older using .dmg file types) must be uninstalled before installing the new version v2.7.1.**

#### Install Details

- PowerPanel Personal for Windows
  - File Name: ppp\_windows\_v2.7.1.exe
  - MD5: 5876E1D16D91B9536CD9CF62F0FC8B74
- PowerPanel Personal for Mac
  - File Name: ppp\_mac\_v2.7.1.pkg
  - MD5: 9AC1520BBC7353729153147BC32E9FB7
