Fas-Trac® III Wheel Ratchet

Unique quick & easy adjustment options

STEP 1 : Push the top crown strap (the one which is closer to the shell) towards the top of the helmet

STEP 2 : Open the Fas-Trac® III ratchet wheel completely by turning the wheel ratchet

STEP 3 : Place the helmet on your head and push down until you have reached a comfortable wearing height. Then turn the ratchet to adjust your helmet according to your head circumference – One hand adjustable even with gloves on!

DID YOU KNOW? You can adjust the **height** of the suspension**!**

There are 3 rails available. The middle rail is used as standard. The user can switch the suspension to the other rails to change the height of the helmet.

DID YOU KNOW? You can adjust the **lateral position** of your helmet when wearing it!

✓ You can slide the shell forwards for better sun protection

✓ Or slide backwards when you need a better upward view
