INFORMATION

The ROBERTS® 10-56 Longneck Plus 6" Jamb Saw has a unique 1½" vacuum port for dust containment. The 1100 watt, 9.6 amp industrial-grade motor provides the necessary power for any job. This jamb saw is equipped with a 6⅝", 36-tooth carbide-tipped blade designed to easily cut door jambs, trim and molding for installation of new floors. Also included is a high-performance masonry blade that easily cuts through brick and cement block.

The Longneck Plus 6" Jamb Saw is equipped with an adjustable cutting depth guide to prevent cutting into plaster or wall board when trimming and the cutting height is adjustable from flush to 1⅛". It's designed to cut full inside corners in molding up to ½" thick, and doors as thick as 1¾" can be undercut without removing. Includes a custom-molded carrying case with metal clips for storage and portability.
