Lamp Ready Strip

LLR

Lamp Ready Strip

The LLR Lamp Ready Strip fixtures are an energy-efficient alternative to traditional fluorescent strip fixtures. They offer the flexibility of installing the desired wattage and color temperature LED T8 Type-B (ballast bypass) double end lamps to meet the needs of the application. They can be used in retail, manufacturing, warehouse, office, education, low-bay, or general lighting applications.

Dimensions

FEATURES

Rotating, Locking Tombstones

Flip-up G13 sockets rotate and lock, keeping lamps seated securely.

Durable Steel Construction

Powder-coated steel housing and diffuser resist corrosion, fading, and cracking.

Lamp-Ready Design

Fits double-ended Type B T8 LED tubes up to 22W — choose the wattage and color temperature you need.

Single-Person Surface Mount

Pre-punched mounting holes let one installer mount it solo — no extra hands needed.
