NATURAL COLLECTION

ON WALL SPEAKERS FOR MUSIC

SOLD AS EACH

The Natural Collection handcrafted wood on-wall speakers from James by Sonance are designed with a minimal footprint to complement the design elements of the space. Featuring two performance levels and orientations to truly customize your audio experience. Natural Collection puts design in the customer's hands for a solution that belongs in the space.

SOUND THAT BELONGS IN THE SPACE

Refined wood on-wall speakers designed for rooms where music is part of the design. In rooms designed for living, music should feel as natural as the materials around it. The Natural Collection brings handcrafted wood, premium woven fabrics, and a quiet, considered presence to any wall without drawing attention to itself as a technology product.

A MINIMALISTIC PRESENCE

The Natural Collection is available in a minimalistic footprint for spaces where a display-match isn't the point. The NC3 starts at 19.75" and the NC5QT at 23.25". These refined dimensions sit naturally on a wall the way a framed piece of art would. Available as Horizontal Bars (HTL) for a clean horizontal line, or Vertical Thin-Line Speaker Bars (VTL) for a quiet vertical accent that feels native to the architecture.

CHOOSE YOUR FINISHES

HANDCRAFTED WOOD

The Natural Collection is hand crafted in Minden, Nevada from refined wood. Modern Brown and Modern Teak bring warmth and grain to spaces where natural materials are the foundation. Modern White offers a clean, seamless integration into light, minimal interiors. Black provides depth and contrast. Sand Gold bridges warmth and refinement for spaces with a softer palette.

PREMIUM WOVEN FABRIC

The grille is the final design decision with nine premium woven fabric options to support any interior palette. The Designer Grille Frame lets you source and apply your own fabric on site.
