

Topic 10  
The environment  
Section 10.1  
The environment

1. The environment is the natural world around us. It includes the air, water, land, and living organisms. The environment is a complex system that is constantly changing. We can all help to protect the environment by making small changes in our daily lives. For example, we can save water by turning off the tap when we brush our teeth. We can also save energy by turning off the lights when we leave a room. These small actions can make a big difference to the environment.

Table with 2 columns: Item, Quantity

Item	Quantity
Water	1000 L
Energy	500 kWh
Waste	50 kg
Recycled paper	100 sheets
Plastic bottles	100
Aluminum cans	100
Steel cans	100
Glass bottles	100
Cardboard boxes	100
Other waste	100 kg
