99613	Backerboard Screws 1-5/8"	700	4

QEP® Backer Board Screws are a premium fastening solution designed for the secure installation of cement backer boards to wood or metal framing. Manufactured from hardened steel, these screws feature a sharp self-tapping point for quick penetration and Hi-Lo threads designed to ensure strong holding power while reducing material displacement during installation. A durable, corrosionresistant coating helps prevent rust from bleeding into grout lines, making these screws an ideal choice. The QEP backer board screws are available in three different sizes: 1-1/4", 1-1/2", and 1-5/8", packaged in a convenient jar for storage.

Professional Tools. Professional Results.
