FEATURES & BENEFITS

1. Visual Aesthetic & Application

The LSC2 Select LED Linear Strip features a durable 20-gauge steel body with smooth-formed sides for safe handling. Designed for general ambient lighting in retail, warehouses, residential utility, and light commercial or industrial spaces, it supports continuous runs for seamless installations.

2. Performance

Selectable CCT options (3000K, 4000K, 5000K, 5700K, 6500K) and 80 CRI ensure versatility and good color accuracy. Designed as an energy-efficient alternative to fluorescent strips and wraparound fixtures.

3. Control

The LSC2 offers dim-to-off functionality via 0-10VDC dimming and includes a sensor-ready 12V accessory output behind the lens. An optional snap-in microwave motion sensor seamlessly integrates for added energy savings. CCT and wattage selector switches are accessible on the junction box for easy adjustments.

4. Installation

Designed for quick, single-person installation with a safety-strap retained light chamber. Its push-button lens retention system securely holds the diffuser in place for both ceiling and wall mounting. Comes with multiple wiring knockouts and options for surface, cable, or hook-and-chain mounting.

5. Certifications

cULus 1598 Listed for damp locations, RoHS compliant, and meets FCC Part 15, Subpart B, Class A standards. TM-21 Reported L70(9k) life exceeds 50,000 hours, with LM-79 and LM-80 testing performed per IESNA standards.

5. Warranty

Backed by a 5-year limited system warranty. Additional surge protection is recommended for installations at risk of power surges.
