

Recessed LED Downlight

The DLRV6P is the newest generation of NICOR retrofit downlights, available in Selectable CCT models. Designed for both new construction and retrofitting, the polymer trimmed DLRV6P is available in white or black and fits standard 5" or 6" housings and the patented new-construction frame. With an impressive output of over 90 LPW, 90+ CRI, and an R9 value greater than 50, it meets the latest certification standards. A switch on the driver cap allows for easy CCT adjustment to 2700, 3000, 3500, 4000, or 5000K. The DLRV6P system, when combined with the frame, offers an energy-efficient and cost-effective solution for high-quality lighting.

- Durable polymer body
- Fully captured V-springs
- Color options: Matte White or Matte Black

- Polycarbonate diffuser creates uniform light distribution with reduced glare
- Selectable models use a dual emitter array that enables CCT selection of 2700K, 3000K, 3500K, 4000K, or 5000K
- Utilizes high performing LEDs with 90+ CRI and an R9 > 50

- Input voltage 120VAC, 60Hz
- CCT selection switch on back of housing
- Dimmable to 10% with compatible leading edge (TRIAC) or trailing edge (ELV) dimmers
- Operating temperature of -4°F to 104°F (-20°C to 40°C)

- Compatible with NICOR DLR56-FRAME
- Quick and easy installation with an IDEAL luminaire connector
- Compatible with most 5" & 6" recessed housings (socket string required)
- Accessory socket strings available (E26 or GU24)

- cETLus 1598 Classified for wet locations
- ENERGYSTAR listed
- CA Title 24 compliant (JA8)
- Rated for Insulation Contact
- Compliant with NFPA® 70, NEC® Section 410.16 (A)(3) and 410.16 (C)(5) for closet use
- RoHS Compliant
- Meets FCC Part 15, Subpart B, Class B standards for conducted and radiated emissions
- IECES-005 Compliant
- LM-79, LM-80 testing performed in accordance with IESNA standards
- LED lumen maintenance: L70(9k)>50,000 hrs

- 5-year limited system warranty standard
- Warranty does not cover product failure due to an overvoltage event (power surge.)

For installations where power surge may be possible, NICOR recommends installing additional surge protection at the electrical distribution panel

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
