

The logo icon for Tetra, consisting of a stylized white symbol that resembles a circuit board or a network of lines, positioned to the left of the word 'Tetra'.

# Tetra

## Visibly Better

Not all LEDs are created equal. The Tetra® high-efficiency, long-lasting LED signage lighting systems from Current deliver best-in-class performance for channel letter, box sign and border lighting applications. When compared with standard neon or fluorescent lamps, Tetra® LED systems provide significant energy cost reductions, easier job site installation, less frequent maintenance and more consistent brightness and uniformity across your signs.

Current's combination of quality materials, smart design and quality provide you with an easy-to-use and cost-effective option for signage lighting solutions. We are committed to providing the best value for all customers, bringing superior performance and energy efficiency to every business.

We guarantee you'll see the difference in your signage and the bottom line.

## Outshining the Competition

For over 130 years, lighting innovations from GE have changed the way we see and light the world. Today, Current, a Daintree company, is continuing that legacy of innovation, delivering efficient, long-lasting LED lighting solutions that illuminate signs, buildings and cities. Our extensive product portfolio and experienced team are dedicated to promoting your brand visibility and ensuring brilliant operational performance for years to come.

- 130 years of customer satisfaction and industry-leading lighting innovation
- Robust, energy-efficient LED solutions that stand the test of time
- The depth and breadth of GE's lighting portfolio, which has already placed more than 80 million feet of Tetra® LEDs around the globe
- Reliability and performance, backed by the most rigorous in-house testing standards in the industry
- An engineering mindset that uses our people, technology and expertise to solve the industry's most complex problems
- A 50,000-hour rated life – your signs always shine bright
- A 10-year warranty on several products.

# Tetra<sup>®</sup> Atom

CHANNEL LETTER LIGHTING SYSTEMS

Our smallest module ever,  
featuring best-in-class  
loading and groundbreaking  
flexibility

**Tetra<sup>®</sup>Atom** — the unique 24V LED system designed for channel letters as shallow as 1 inch in depth delivers incredibly uniform light, installs easily and operates efficiently. **Tetra<sup>®</sup>Atom** also features constant current technology, for even light across the entire run without the need for center tapping.

## Powerful OptiLens™ X

**Tetra® Atom** features OptiLens™ X, our patented technology that allows for a true 165° x 140° viewing angle. This exclusive technology redirects otherwise wasted light to the sign face, making sure your signs shine.

## Best-in-class loading

Load 327 **Tetra® Atom** modules per 100W power supply, more than **twice as much** as some competitors' solutions. Half the power supplies means half the material and labor costs: only with Tetra®.

## Tetra® for every sign

Designed to meet the evolving needs of sign shops, **Tetra® Atom** delivers bright, uniform light in shallow channel letters, routed acrylic block letters, and halo-lit applications as shallow as 25mm deep.

## Tetra® Atom Features

- Wide 165° x 140° beam angle
- Efficacy: Up to 124 lm/W
- 24 Volt DC, Class 2 (UL), Class III (IEC)
- UL Wet Rated & IP66
- 10-year limited warranty

## Tetra® Atom Spacing

Can Depth	Coverage	Multiple Strings
1" (25mm)	2" (51mm)	1.5" (38mm)*
1.5" (38mm)	4" (102mm)	2.5" (64mm)
2" (51mm)	6" (152mm)	5" (127mm)
3" (76mm)	7" (178mm)	5" (127mm)

\*Face material must be at least 3/16" (5mm) thick

# Total Reliability

To ensure every **Tetra® Atom** installation will operate brilliantly for years, we perform the most extensive, stringent testing in the industry. We test the LED, water and dust ingress protection, sub-system and complete system at our in-house and independent laboratories around the world. Validation of our designs, components, products and processes include high temperature, high humidity and accelerated life testing.

# Tetra<sup>®</sup> MS

CHANNEL LETTER LIGHTING SYSTEMS

With powerful OptiLens™ X  
and groundbreaking energy  
efficiency

**Tetra<sup>®</sup>MS** — the remarkable 24V LED system designed for small channel letters as shallow as 38mm in depth delivers incredibly uniform light, installs easily and operates efficiently. Tetra<sup>®</sup> MS is IP66 and UL wet rated which makes it more robust and reliable even under wet weather.

## Powerful OptiLens™ X

**Tetra® MS** features OptiLens™ X, our patented technology that allows for a true 165° x 140° viewing angle. This exclusive technology redirects otherwise wasted light to the sign face, making sure your signs shine.

## Class-leading loading

Now load up to 90.5 feet (27.6 m) or 362 modules of 24V **Tetra® MS** per 100W power supply using our new and improved GLX2 power supplies.

## Improved stroke spacing

24V **Tetra® MS** stroke spacing has improved, thanks to the new OptiLens™ X wide beam angle. In addition, its new silicone flow channels have increased bonding strength by 10–20%.

## Tetra®MS Features

- Wide 165° beam angle
- Improved luminous intensity
- Efficacy: Up to 115 lm/W
- 24 Volt DC, Class 2 (UL), Class III (IEC)
- UL Wet Rated & IP66
- 10-year limited warranty

# Tetra<sup>®</sup> MAX

CHANNEL LETTER LIGHTING SYSTEMS

---

Good things come in  
small packages

Our revolutionary **Tetra<sup>®</sup>MAX** LED signage modules have an all-new look. We've reduced the white module size by 25%, which brings our industry-leading 161 lm/W to a wider range of applications. And thanks to OptiLens™ X, **Tetra<sup>®</sup>MAX** has an improved viewing angle of 175°, ensuring perfectly uniform sign face illumination. Get more light for less with **Tetra<sup>®</sup>MAX**.

## Powerful OptiLens™ X

**Tetra® MAX** features **OptiLens™ X**, our patented technology that allows for an incredible 175° viewing angle. This exclusive technology redirects otherwise wasted light to the sign face, making sure your signs shine.

## Power Supply Loading

Now load up to 92.6 feet (28.2 m) or 139 modules of 24V **Tetra® MAX** per 100W power supply using our new and improved GLX2 power supplies.

## Improved stroke spacing

The new 24V Tetra® MAX stroke spacing has improved on average by 37%, thanks to the new OptiLens™ X wide beam angle.

## Tetra®MAX Features

- Wide 175° beam angle
- Efficacy: Up to 161 lm/W for the whites
- 24 Volt DC, UL Wet Rated & IP66
- 10-year limited warranty

# Total Reliability

To ensure every **Tetra® MAX** installation will operate brilliantly for years, we perform the most extensive, stringent testing in the industry. We test the LED, water and dust ingress protection, sub-system and complete system at our in-house and independent laboratories around the world. Validation of our designs, components, products and processes include high temperature, high humidity and accelerated life testing.

# Tetra<sup>®</sup> PowerMAX

CHANNEL LETTER LIGHTING SYSTEMS

With powerful OptiLens™ X  
and groundbreaking energy  
efficiency

**Tetra<sup>®</sup>PowerMAX** — the 24V remarkable LED system designed for channel letters as shallow as 102mm in depth, as well as cabinet signs, delivers incredibly uniform light, installs easily and operates efficiently. **Tetra<sup>®</sup>PowerMAX** is now IP66 and UL wet rated which makes it more robust and reliable than ever, even under wet weather.

## Powerful OptiLens™ X

**Tetra® PowerMAX** features OptiLens™ X, our patented technology that allows for an incredible 170° viewing angle. This exclusive technology redirects otherwise wasted light to the sign face, making sure your signs shine.

## Power Supply Loading

Now load up to 68.6 feet (20.9 m) or 103 modules of 24V **Tetra® PowerMAX** per 100W power supply using our new and improved GLX2 power supplies.

## Improved stroke spacing

24V **Tetra® PowerMAX** stroke spacing has improved on average by 35% compared to the 12V version, requiring less product thanks to the OptiLens™ X wide beam angle.

## Tetra® PowerMAX Features

- Wide 170° beam angle
- Improved luminous intensity
- Efficacy: Up to 158 lm/W
- 24 Volt DC, Class 2 (UL), Class III (IEC)
- UL Wet Rated & IP66
- 10-year limited warranty

## Tetra® PowerMAX Spacing

	Can Depth	Coverage
<b>Medium</b>	4-5" (102-127mm)	14" (356mm)
	5-6" (127-152mm)	17" (432mm)
<b>Large</b>	≥ 6" (152mm)	22" (559mm)

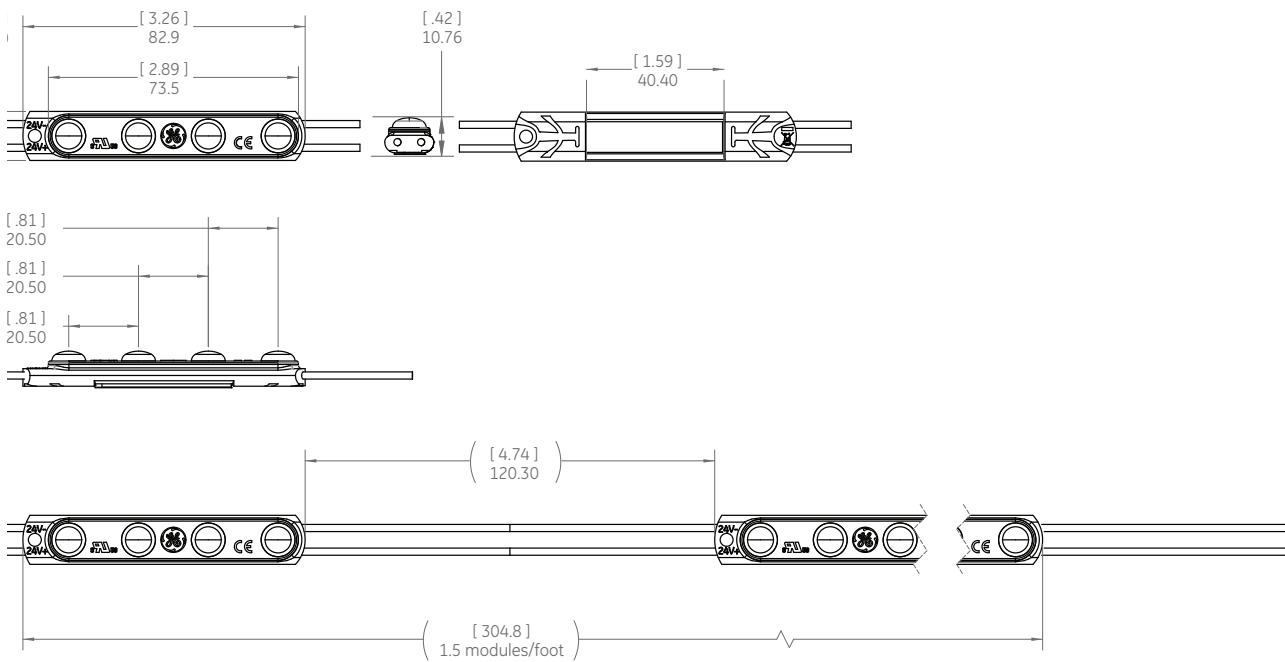

## Total Reliability

To ensure every **Tetra® PowerMAX** installation will operate brilliantly for years, we perform the most extensive, stringent testing in the industry. We test the LED, water and dust ingress protection, sub-system and complete system at our in-house and independent laboratories around the world. Validation of our designs, components, products and processes include high temperature, high humidity and accelerated life testing.

# Tetra<sup>®</sup> LT

CHANNEL LETTER LIGHTING SYSTEMS

24V performance.  
Everyday value.

**Tetra<sup>®</sup> LT** — the first economical 24V LED system that meets your essential channel letter needs. Available in four different sizes, these modules deliver incredibly uniform light, allowing you to use fewer modules for faster installation and lower costs per sign. **Tetra<sup>®</sup> LT** is IP66 and UL wet rated which makes it more robust and reliable even under wet weather. A rated lifetime exceeding 50,000 hours and a standard 5-year warranty ensures that LT stands the test of time.

## Powerful OptiLens™ X

**Tetra® LT** features OptiLens™ X, our patented technology that allows for an incredible 170° viewing angle. This exclusive technology redirects otherwise wasted light to the sign face, making sure your signs shine.

## Even More Loading

Load up to 120 feet (36.5 m) or 240 modules of 24V **Tetra® LT Shallow** per 100W power supply using our new and improved GLX2 power supplies.

## Full Lineup

**Tetra® LT**, is offered in four different sizes (Deep, Deep (Extra Wire), Medium and Shallow) and four CCTs (7100K, 6500K, 5000K and 4100K) for complete flexibility.

## Tetra® LT Features

- Wide 170° beam angle
- Available in two module sizes, three lumen outputs and four CCTs
- Efficacy: up to 167 lm/W
- 24 Volt DC, Class 2 (UL), Class III (IEC)
- UL Wet Rated & IP66
- 5-year limited warranty

## Tetra® LT Spacing

	Can Depth	Coverage
LT Shallow	3" (76 mm)	7" (178 mm)
	4" - ≥5" (102 mm - ≥127 mm)	10" - 13" (254 mm - 330 mm)
LT Medium	3" (76 mm)	7" (178 mm)
	4" - ≥6" (102 mm - ≥152 mm)	10" - 16" (254 mm - 406 mm)
LT Deep LT Deep-E	4" - 5" (102 mm - 127 mm)	10" - 13" (254 mm - 330 mm)
	6" - ≥7" (152 mm - ≥178 mm)	16" - 19" (406 mm - 483 mm)

# Total Reliability

To ensure every **Tetra® LT** installation will operate brilliantly for years, we perform the most extensive, stringent testing in the industry. We test the LED, water and dust ingress protection, sub-system and complete system at our in-house and independent laboratories around the world. Validation of our designs, components, products and processes include high temperature, high humidity and accelerated life testing.

# Select TX<sup>®</sup> Gen 3

CHANNEL LETTER LIGHTING SYSTEMS

Trusted technology with exceptional value

The third generation of the **Select TX<sup>®</sup>** family offers a solution for your everyday channel letter needs, with loading increased by 25% compared to the second generation. **Select TX<sup>®</sup>** also features constant current technology, which ensures consistent module brightness, from the first module on the string to the last. Now available in four different sizes and three different colors.

## Layout guide

### GESEV65-3

# Select TX<sup>®</sup> Cuttable Light Bar

CABINET SIGN LIGHTING SYSTEMS

Flexible and Customizable  
LED Solution

Select TX<sup>®</sup> Cuttable Light Bar is a product designed with the ability to be cut every 3¼" / 83 mm, allowing signmakers to create indoor illuminated signage and displays that fit their vision.

# Select TX<sup>®</sup> Cuttable Light Bar

## Features

- Wide 160° beam angle
- Aluminium PCB for enhanced thermal dissipation and longer LED life
- CRI >Ra80 allows much better colour rendition in signage and advertising cases
- Efficacy: up to 100 lm/W
- 24 Volt DC, Class 2 (UL), Class III (IEC)
- IP20
- 5-year limited warranty

## Technical Summary

Specification	
Input Voltage	24VDC
Lumens	1100 lm
Power Consumption	10.8 W
Lifetime @L70B50	50,000 Hrs
Operating Ambient Temperature	-25°C to +60°C
Storage Temperature	-25°C to +70°C
Environmental protection	IP20

## Product Dimensions

# Tetra<sup>®</sup> Rigid Light Bar

CABINET SIGN LIGHTING SYSTEMS

Flexible and Customizable  
LED Solution

Tetra<sup>®</sup> Rigid light Bar is a product designed for shallow-box indoor signs. It comes available in three lengths for fast, daisy-chainable installation for the illumination of large surface areas.

# Tetra<sup>®</sup> LED Tape Gen 2

CHANNEL LETTER LIGHTING SYSTEMS

## Labor Saving LED Solution

**Tetra<sup>®</sup> LED Tape** installs easily and quickly, slashing labor costs. Designed for applications as shallow as 1 inch, it includes a self-adhesive backing—which eliminates screw attachments, can be cut every two inches, and is available with electrical connectors that make assembly a snap. For applications requiring more light, Tetra<sup>®</sup> Tape is also offered in HO. Roll out the savings with our innovative solution.

## Quick and Easy

- Quick and simple installation using clamp-on connectors
- Easy mounting with self-adhesive backing: no screws required
- Can be cut every 2 inches at marked points
- Electrical connectors means no soldering required
- Applications: shallow channel letter, backlit halo letter, routed acrylic block letter
- 3-year warranty
- IP66 with an enclosure
- 12VDC
- Available in regular and high output (white only)

## Total Reliability

To ensure every **Tetra® LED Tape Gen 2** installation will operate brilliantly for years, we perform the most extensive, stringent testing in the industry. We test the LED, water and dust ingress protection, sub-system and complete system at our in-house and independent laboratories around the world. Validation of our designs, components, products and processes include high temperature, high humidity and accelerated life testing.

# Tetra<sup>®</sup> Snap DS

CABINET SIGN LIGHTING SYSTEMS

For those who don't have  
time to screw around

**Tetra<sup>®</sup>Snap DS** — our most innovative cabinet sign solution ever. Snap is a double-sided module that snaps into a screwless aluminum extrusion, allowing module spacing and brightness levels to be customized on-the-fly. **Tetra<sup>®</sup>Snap DS** is a one-size-fits-all product for double-sided cabinet signs. Say goodbye to stocking dozens of sticks. Say hello to **Tetra<sup>®</sup>Snap DS**.

## Bright as a new penny

**Tetra® Snap DS** modules pump out 400 lumens each, and can be installed at three different spacings, for a maximum 1000 lumens per foot. No other cabinet sign product comes close.

## Load 'em up

Load 33 **Tetra® Snap DS** modules per 100W power supply, enough to light a single 163 x 203 cm sign.

## One product to rule them all

The most flexible product on the market, **Tetra® Snap DS** is suitable for cabinets ranging from 25 cm to well over 92 cm in depth, all with the same material.

You may be wondering what the catch is. But it only gets better. Here's how to install Snap:

- Step 1: Snap modules into extrusion.
- Step 2: Install extrusion into sign.
- Step 3: Plug in. Enjoy results.

No catch. **Tetra® Snap**.

## Tetra® Snap DS Features

- Wide 170° beam angle
- Efficacy: Up to 152 lm/W
- 24 Volt DC, Class 2 (UL), Class III (IEC)
- 10-year limited warranty

## Spacing Guidelines

	Depth	Max stroke
Double sided	10" - <12" 25 cm - <31 cm	13" 31 cm
	12" - <14" 31 cm - <36 cm	16" 41 cm
	14" - <16" 36 cm - <41 cm	18" 46 cm
	>16" <41 cm	20" 51 cm

# Brightness Chart

Our Brightness Chart provides a clear explanation of the light levels you can achieve using the same Tetra Snap modules and rail, as well as your customer's predicted\* happiness levels.

\* Happiness levels estimated by our proprietary artificial intelligence algorithm  
 † Marketing manager

Brightness level	Lumens per foot	Your inventory level	Your customer's happiness
Regular output	1968.5	Low	☺
High output	750	Still low	☺ ☺
Ludicrous mode	1000	Yup, still low	☺ ☺ ☺

time to screw around

**Tetra<sup>®</sup>Snap SS** — your shop's new MVP. Our most flexible product ever, Snap SS is a single-sided module that not only clips onto a screwless aluminum extrusion, allowing module spacing and brightness levels to be customized on-the-fly, but can also be used in large channel letters. Meet the product that replaces sticks and modules alike. Meet **Tetra<sup>®</sup>Snap SS**.

## Oh snap!

Tetra® Snap SS modules pump out 200 lumens each, and can either be installed at three different spacings on our rail, for a maximum 500 lumens per foot, or in large channel letters. Beat that.

## Load 'em up

Load 66 Tetra® Snap modules per 100W power supply, enough to light a single 163 x 406 cm sign.

## Your shop's MVP

With the flexibility to be placed closer to the sign face, Tetra Snap SS can be used in your deepest, most challenging cabinets. It can also be used in channel letters up to 30.5 cm deep.

You may be wondering what the catch is. But it only gets better. Here's how to install Snap:

- Step 1: Snap modules into extrusion.
- Step 2: Install extrusion into sign.
- Step 3: Plug in. Enjoy results.

No catch. **Tetra® Snap.**

## Tetra® Snap SS Features

- Wide 170° beam angle
- Efficacy: Up to 153 lm/W
- 24 Volt DC, Class 2 (UL), Class III (IEC)
- UL Wet Rated & IP66
- 10-year limited warranty

## Spacing Guidelines

	Depth	Max stroke
Double sided	5" (127 mm)	13" (330 mm)
	6" (152 mm)	16" (406 mm)
	7" (178 mm)	18" (457 mm)
	8" (203 mm)	20" (508 mm)

## Module Dimensions

Length	Width	Height
3.35" (85 mm)	1.69" (43 mm)	0.52" (13 mm)

# Brightness Chart

Our Brightness Chart provides a clear explanation of the light levels you can achieve using the same Tetra Snap modules and rail, as well as your customer's predicted\* happiness levels.

\* Happiness levels estimated by our proprietary artificial intelligence algorithm  
 † Marketing manager

Brightness level	Lumens per foot	Your inventory level	Your customer's happiness
Regular output	600	Low	☺
High output	750	Still low	☺ ☺
Ludicrous mode	1000	Yup, still low	☺ ☺ ☺

# Tetra<sup>®</sup> EdgeStrip

CABINET SIGN LIGHTING SYSTEMS

The cutting edge of uniform brightness.

Tetra<sup>®</sup> EdgeStrip is engineered to install easily around the edge of signs with a 3 to 6 inch can depth. Perfect for single or double-sided signs, Tetra<sup>®</sup> EdgeStrip delivers money-saving advantages over T8 fluorescent tubes while producing outstanding visual performance that protects end-user brand image. Discover the new LED alternative that can handle shallow cabinet signs – Tetra<sup>®</sup> EdgeStrip.

## Improved brightness

Tetra® EdgeStrip is now brighter than the previous generation, commanding attention to your customer's brand image. 300 lumens per foot with the same loading : 36 modules per 24V 100W power supply

## The OptiLens™ Difference.

Tetra® EdgeStrip uses OptiLens™, our unique lens technology which captures otherwise wasted light and redirects it towards the illuminated surface to create an exceptionally uniform sign.

T8 fluorescent tubes can create an unwanted striping effect where the space between the tubes appears darker. This visual distraction sends the wrong message about your business, and undermines your overall brand image.

Fluorescent T8  
Shadows and Striping

Tetra®EdgeStrip  
Even Illumination

## Cover any angle or curved shape with uniform LED light.

Tetra® EdgeStrip is designed to fit into the frame of cabinet signs, meaning that curved, angular or custom shaped signs can now benefit from LED technology! Unlike fluorescent tubes, that are hard to fit into unique signs and create shadows and stripping, Tetra® EdgeStrip can tightly follow the contour of the sign's frame and distribute uniform light to every inch of the sign face. Protect the brand image of your business by using Tetra® EdgeStrip LED lighting system in your sign.

## Impressive Energy Savings.

When you make the switch from T8 Fluorescent tubes to the advanced technology of Tetra EdgeStrip, you give up some brightness for the exceptional uniformity and impressive energy savings of LED. This superior efficiency produces energy savings up to an incredible 78%. Imagine the positive impact that will have on your bottom-line over the long life of the system.

## Tetra® EdgeStrip Features

HO ONLY: NEW heat sink to manage thermals.

OptiLens™ maximizes the area of light coverage by creating a narrow, uniform viewing angle.

Brighter than ever before.

Robust design to protect against moisture, dust and damage.

3M VHB™ industrial grade mounting tape allows for greater convenience when installing.

Continuous wire through LED module uses IDC connectors for maximum strain relief.

Can be cut on wires between modules.

Pre-drilled holes makes mounting easy.

Overmolded design protects against moisture, dust and damage.

10-year limited warranty

# Tetra<sup>®</sup> Slim EdgeStrip

CABINET SIGN LIGHTING SYSTEMS

The cutting edge of uniform brightness.

Tetra<sup>®</sup> Slim EdgeStrip is engineered to install easily around the edge of shallow to medium depth signs—as low as 50mm deep. Ideal for single or double-sided signs, as well as acrylic or fabric faces, Tetra<sup>®</sup> Slim EdgeStrip delivers money-saving advantages over competitive LED solutions, while producing outstanding visual performance that enhances end-user brand image.

## Brighter Than Ever

Tetra® Slim EdgeStrip pumps out a maximum 235 lumens per module, and our focused optic throws the light where it matters, showing your brand in its best light.

## Increased Loading

Load up to 57 modules per 24V 100W power supply. Tetra® Slim EdgeStrip uses only 1.44 Watts per module, for an efficacy of 109 lumens per Watt thanks to our 24V platform.

## Tetra® Slim EdgeStrip Features

- Targeted 15°x35° beam angle
- Improved luminous intensity
- Efficacy: 97-109 lm/W
- 24 Volt DC, Class 2 (UL), Class III (IEC)
- UL Damp Rated & IP66
- 10-year limited warranty

## Module Dimensions

Length	Width	Height
3.76" / 96mm	0.79" / 20mm	0.56" / 14mm

## Tetra® Slim EdgeStrip Spacing

Modules/ft	Can Depth	Coverage (1 side)	Coverage (2 sides)
2.5 (8.2 m)	2" (51 mm)	2 ft (609 mm)	4 ft (1219 mm)
2 (6.6 m)	3" (76 mm)	2 ft (609 mm)	4 ft (1219 mm)
	≥ 4" (102 mm)		

## Cover any angle or curved shape with uniform LED light.

Tetra® Slim EdgeStrip's low-profile is designed to fit into the frame of shallow cabinet signs, meaning that curved, angular or custom shaped signs can now benefit from LED technology! Unlike fluorescent tubes, that are hard to fit into unique signs and create shadows and striping, Tetra® Slim EdgeStrip can tightly follow the contour of the sign's frame and distribute uniform light to every inch of the sign face. Protect the brand image of your business by using Tetra® Slim EdgeStrip LED lighting system in your sign.

# Tetra<sup>®</sup> Contour Flex

BORDER LIGHTING LIGHTING SYSTEMS

## Bend it Like Contour

Tetra<sup>®</sup> Contour Flex is a completely flexible LED neon replacement that can be shaped over and over again, with no heating required. Contour Flex installation is quick and easy using low-profile mounting clips. It provides a bright, uniform appearance, seamless illumination and allows signmakers' creativity to run wild. Tetra<sup>®</sup> Contour Flex can be custom cut in the field without complicated warranty implications, and features a plug & play design that saves on labor and installation costs.

## Flexible neon replacement system

Tetra® Contour Flex is a flexible LED system that can be easily formed to fit a wide variety of designs and applications, without the need to heat it in an oven. Tetra® Contour Flex can be custom cut in the field and bent over and over again, allowing sign makers to create vibrant signs. Tetra Contour Flex is a single-piece LED system that provides the classic appearance of neon and complements the unique design of any building.

## Range of Colors

With two shades of white and several brilliant LED colors, designers have more flexibility than ever to easily create custom signs.

## Straight Runs

With the available Tetra Contour Flex Rail, simply insert Contour Flex into the U-channel to create perfectly linear runs.

## Mechanical Outline

Dimensions in (inches). Metric equivalent mm

## Accessories Outline

Dimensions in inches. Metric equivalent (mm).

## Vastly Superior Loading

Compared to the first generation, Tetra® Contour Flex features loading increased by up to 114%, so even more feet of product can be run off each power supply than ever before providing significant savings on material and labor costs.

## Durable Robust System

Designed using Six Sigma quality standards, the Tetra® Contour Flex LED lighting system has a long life that delivers up to five years of continuous 24/7 use. Impact resistant design helps eliminate excess shipping, installation and maintenance costs due to breakage. It withstands harsh weather conditions, vibration and stress, and is backed by our 5-year limited warranty.

# Tetra<sup>®</sup> Contour Gen 2

BORDER LIGHTING LIGHTING SYSTEMS

## 80% Quicker to Install

Tetra<sup>®</sup> Contour Gen 2 installation is 80% faster compared to the previous generation thanks to the new light engine design. It is also much more uniform in appearance, and still offers seamless illumination and a wide 330° of light output.

Tetra<sup>®</sup> Contour Gen 2 is available in two application-specific versions: Side Bend and Back Bend, which both use the same light guides and accessories.

# Simple neon replacement system

Tetra® Contour Gen 2 is a flexible LED light that can be easily formed to fit a wide variety of designs and applications. Tetra® Contour Gen 2 is available in two models, side-bend and back-bend; and it is the bendable companion product used for creating vibrant border lighting sections. These products comprise a complete LED system that provides the classic appearance of neon and complements the unique design of any building

## Range of Colors

With two shades of white and several brilliant LED colors, designers have more flexibility than ever to easily create custom signs.

# Tetra® Ti-10

## 24V 100W Power Supply

The Tetra Ti-10 is our first LED power supply designed, tested and built to last a decade. The 10 in its name stands for the standard 10-year warranty, the first in the signage industry.

### Features:

- Standard 10-year warranty
- Compatible with all 24VDC Tetra products
- UL: Class 2
- EC: SELV

Specifications	
Model	GEPS24-100U-TT
Nominal Voltage	120-277V ± 10%
Line Current	1.1-0.36A
Frequency	50/60Hz
Protection Class: (EU Class I/II/III)	Class II
Number of Output Channels	1
Output Voltage	24VDC ± 1VDC, per output channel
Output Power	96W, I <sub>out</sub> ≤ 4A, per output channel
Power Factor	>0.9 @ full load across nominal input voltage
THD	< 20% @ full load across nominal input voltage
Efficiency at Full Load	120VAC: 87% 230VAC: 89.6% 277VAC: 89.6%
Max. no. of PSU per MCB:	Available upon request
Operating Temperature Range, Ta	-40°C to 60°C
Operating Humidity	10% to 95% non-condensing
Storage Temperature Range	-40°C to 85°C
Max. Case Temperature at Tc Point:	85°C
Warranty @ 100% Duty Cycle, Tc=45°C	10 years
Dimmable:	No
Short Circuit Protection	Yes

Specifications	
Overload Protection	Yes
Over Temperature Protection	Yes
Environmental Rating	Dry and Damp Rated
Geometry (L×W×H)	9.5 in. x 1.7 in. x 1.1 in. (241 mm x 43.2 mm x 28 mm)
Weight	600 g
Suitable for Fixtures with Protection Class	UL Class 2
Safety	UL 879 UL 1310 CAN/CSA-C22.2 No. 207-15 CAN/CSA-C22.2 No.223
Radio Interference	FCC Part 15 Class A
Surge Capability	ANSI/IEEE C62.41 (1.2/50µs @ 6KV/2Ω L-N, 6KV/2Ω L+N-PE)
RoHS	Yes
Approvals (Certificates)	UL
Additional Notes	Not intended to operate in "No Load" mode

Electrical products must not be thrown out with domestic waste. They must be taken to a communal collecting point for environmentally friendly disposal in accordance with local regulations. Contact your local authorities or stockist for advice on recycling. The packaging material is recyclable. Dispose of the packaging in an environmentally friendly manner and make it available for the recyclable material collection-service

- UL: Class 2
- IEC: SELV

Specifications	
Model	GEPS24-300U-GLX2
Nominal Voltage	120-277V ± 10%
Line Current	2.55-1.1A
Frequency	50/60Hz
Protection Class: (EU Class I/II/III)	Class II
Number of Output Channels	3
Output Voltage	24VDC ± 1VDC, per output channel
Output Power	96W, I <sub>out</sub> ≤ 4A, per output channel
Power Factor	>0.9 @ full load across nominal input voltage
THD	< 20% @ full load across nominal input voltage
Efficiency at Full Load	120VAC: 87% 230VAC: 91.1% 277VAC: 91.1%
Max. no. of PSU per MCB:	Available upon request
Operating Temperature Range, T <sub>a</sub>	-40°C to 60°C
Operating Humidity	10% to 95% non-condensing
Storage Temperature Range	-40°C to 85°C
Max. Case Temperature at T <sub>c</sub> Point:	87°C
Warranty @ 100% Duty Cycle, T <sub>c</sub> =45°C	5 years
Dimmable:	No
Short Circuit Protection	Yes

Specifications	
Overload Protection	Yes
Over Temperature Protection	Yes
Environmental Rating	Dry and Damp Rated
Geometry (L×W×H)	15.7 in. x 5.1 in. x 1.3 in. (400.0 mm x 130.6 mm x 32.6 mm)
Weight	2230 g
Suitable for Fixtures with Protection Class	UL Class 2, SELV
Safety	UL 879 UL 1310 CAN/CSA-C22.2 No. 207-15 CAN/CSA-C22.2 No.223 EN 61347-2-13, EN 61347-1
Radio Interference	FCC Part 15 Class A EN 55015, EN 61547, EN 61000-3-2, EN 61000-3-3
Surge Capability	ANSI/IEEE C62.41 (1.2/50µs @ 6KV/2Ω L-N, 6KV/2Ω L+N-PE)
RoHS	Yes
Approvals (Certificates)	UL, CE
Additional Notes	Not intended to operate in "No Load" mode

Electrical products must not be thrown out with domestic waste. They must be taken to a communal collecting point for environmentally friendly disposal in accordance with local regulations. Contact your local authorities or stockist for advice on recycling. The packaging material is recyclable. Dispose of the packaging in an environmentally friendly manner and make it available for the recyclable material collection-service

For sign use only. Not intended for general lighting applications.

This product is considered to be a "containing product" with a length nearest to 50 cm being considered the "light source" per Regulations (EU) 2019/2020 and (EU) 2019/2015.

As the final application permits, without permanent damage to the containing product and with the use of commonly available tools; as specified in the install instructions, the contained LED light source may be cut out, removed from the mounting surface, and replaced or dismantled at the end of life, by a professional installer.

Electrical products must not be thrown out with domestic waste. They must be taken to a communal collection point for environmentally friendly disposal in accordance with local regulations. Contact your local authorities or stockist for advice on recycling. The packaging material is recyclable. Dispose of the packaging in an environmentally friendly manner and make it available for the recyclable material collection-service.

## Table of contents Features

Wide 170° beam angle

Efficacy: 150 lm/W

24 Volt DC, Class 2 (UL), Class III (IEC)

UL Wet Rated & IP66

10-year limited warranty

## Tetra® PowerMAX HO Spacing

	Can Depth	Coverage
<b>Large</b>	6" (152mm)	17" (431.8mm)
	7" (178 mm)	19" (483 mm)
	≥ 8" (203 mm)	21" (533 mm)

## Total Reliability

To ensure every **Tetra® PowerMAX HO** installation will operate brilliantly for years, we perform the most extensive, stringent testing in the industry. We test the LED, water and dust ingress protection, sub-system and complete system at our in-house and independent laboratories around the world. Validation of our designs, components, products and processes include high temperature, high humidity and accelerated life testing.

# Tetra<sup>®</sup> miniMAX CRI90+

ARCHITECTURAL LIGHTING SYSTEMS

With powerful OptiLens™ X  
and groundbreaking energy  
efficiency

Tetra<sup>®</sup> miniMAX CRI90+ white — the 24V remarkable LED system designed to deliver incredibly uniform light to architectural features and delineation applications, installs easily and features OptiLens™ X and CRI90+ to ensure efficient operations.

## With Powerful OptiLens™

**Tetra® miniMAX** features OptiLens™ X, our patented technology that allows for an incredible 175° viewing angle.

## Best-in-Class Loading

Now load up to 118.5 feet (36.1 m) or 237 modules of 24V **Tetra® miniMAX** per 100W power supply using our new and improved GLX2 power supplies.

## Improved Stroke Spacing

The new 24V **Tetra® miniMAX** stroke spacing has improved on average by 30%, thanks to the new OptiLens™ X wide beam angle.

## Tetra® miniMAX Features

- Wide 175° beam angle
- CRI90+
- 24 Volt DC, UL Wet Rated & IP66
- 10-year limited warranty

# Batten LED Luminaire

CANOPY LIGHTING SYSTEMS

Utility lighting for canopies,  
awnings and drive-thrus

The Batten LED Luminaire delivers brilliant performance in tight, demanding situations where utilitarian light is required. The Batten is suitable for mounting in any ambient application space and its unique design makes it ideal to mount individually or run in a continuous row. We've improved run lengths in the all-new second generation – now up to 172 ft per leader cable!

## More lighting performance

- Maximizes coverage through wide, uniform Lambertian light distribution
- Extruded plastic design protects against moisture, dust and damage
- No decrease of light output in cold settings—as can happen with fluorescent
- Can be used in  $-40^{\circ}\text{C}$  to  $60^{\circ}\text{C}$  ( $-40^{\circ}\text{F}$  to  $140^{\circ}\text{F}$ )
- Comes in Regular and High Output
- 50,000-hour rated life
- Color Temperatures: 7100K, 5000K, 4000K, 3500K, 3000K, Red & Blue
- Sizes: 1ft (white only), 2ft, 4ft, 8ft

## More savings on installation and operation

- Installation is fast and easy with mounting clips
- Integrated power supply eliminates separate drivers
- Easily daisy chain (jumper wire & end-to-end)
- Input Voltage: 120–277V
- Wet Rated
- IP66 Tested

## Tip

Identify the second generation Batten by its removable yellow end cap

## Total Reliability

To ensure every Batten installation will operate brilliantly for years, we perform the most extensive, stringent testing in the industry. We test the LED, water and dust ingress protection, sub-system and complete system at our in-house and independent laboratories around the world. Validation of our designs, components, products and processes include high temperature, high humidity and accelerated life testing.

# Tetra<sup>®</sup> Stick

CABINET SIGN LIGHTING SYSTEMS

Stick with the brand  
you can trust

**Tetra<sup>®</sup> Stick** takes all the advantages of our 24V LED channel letter modules, and brings them to cabinet signs in an easily-installed system. The **Tetra<sup>®</sup> Stick** fits directly into existing sockets and requires fewer power supplies than competitors' offerings, thanks to its best-in-class loading, greatly reducing material, installation and energy costs.

## Powerful OptiLens™ X

Tetra® Stick features OptiLens™ X, our patented technology that allows for an incredible 170° viewing angle. This exclusive technology redirects otherwise wasted light to the sign face, making sure your signs shine.

## Best-in-class loading

The 24V Tetra® Stick loads to an impressive five 84" double-sided sticks per 100W power supply.

## Improved stroke spacing and installation

The new 24V Tetra® Stick stroke spacing is impressive, requiring less product, thanks to the new OptiLens™ X wide beam angle and increased light output. Tetra® Stick is available in two end wire lengths, making installation a snap and allowing customers to customize their products to their needs.

## Total Reliability

To ensure every Tetra® Stick installation will operate brilliantly for years, we perform the most extensive, stringent testing in the industry. We test the LED, water and dust ingress protection, sub-system and complete system at our in-house and independent laboratories around the world. Validation of our designs, components, products and processes include high temperature, high humidity and accelerated life testing.

## Tetra® Stick Features

- Available with PowerMAX or PowerMAX HO modules
- Wide 170° beam angle
- Efficacy: 156 lm/W (PowerMAX)  
50 lm/W (PowerMAX HO)
- 24 Volt DC, Class 2 (UL), Class III (IEC)
- UL Dry or Damp Rated
- 10-year limited warranty

## Recommended Spacing

	Depth from Stick to Face	Recommended Spacing
<b>Tetra® Stick single-sided PowerMAX and PowerMAX HO</b>	5" (127 mm)	12" (305 mm)
	6" (152 mm)	14" (356 mm)
	7" (178 mm)	16" (406 mm)
	≥ 8-12" (203-305 mm)	18" (457 mm)

# Tetra<sup>®</sup> EdgeLine

CANOPY LIGHTING SYSTEMS

Slim wall wash fixture for  
canopies and awnings

Tetra EdgeLine delivers brilliant performance in wall wash and canopy lighting applications. The EdgeLine's slim form factor is suitable for mounting in tight application spaces, and its symmetric optical design evenly distributes bright light exactly where you need it.

## Tetra® EdgeLine Features

- Maximizes coverage through wide, uniform symmetric light distribution, with no scalloping
- Extruded plastic design protects against moisture, dust and damage
- Functions in hot and cold climates: -40°C to 60°C (-40°F to 140°F)
- 50,000-hour rated life
- Field cuttable every 3 in (75 mm) for custom sizes with no waste
- Color Temperature: 6500K
- Size: 4 ft (1.2 m)

## Tetra® EdgeLine Specifications

- Wide, symmetric beam angle
- Efficacy: 156 lm/W
- 24 Volt DC, Class 2 (UL), Class III (IEC)
- IP66 and Damp rated
- 10-year limited warranty

## Total Reliability

To ensure every Tetra® EdgeLine installation will operate brilliantly for years, we perform the most extensive, stringent testing in the industry. We test the LED, water and dust ingress protection, sub-system and complete system at our in-house and independent laboratories around the world. Validation of our designs, components, products and processes include high temperature, high humidity and accelerated life testing.
