

Legendary Lighting for Grocery & Superstores

From loading dock to check-out, Current has long life LED lighting solutions that lower cost of light while increasing output and quality. Our RLB2 is perfect for warehouse, service, office and "back of house" locations. Our LUR2 Series is a sleek, high-performance retrofit solution that projects sophistication commensurate with your brand identity. Equipped with integrated electrical connections for continuous rows, it offers unparalleled speed of installation. Both LED systems can be matched with Daintree wireless dimming for fully independent control of each luminaire. For comprehensive LED solutions backed by the reliability of the lighting legend, your choice is simple — Current.

RLB2 is an ideal commercial retrofit fixture that provides high uniformity and excellent efficiency at an incredible low cost.

Each fixture can have an embedded or non embedded **Daintree** wireless sensor

People count sensors go beyond binary occupancy sensors to generate precision space utilization data for better real-estate planning

LUR2 series retrofit kits provide IP40 protection, long life, fits with multiple LFL fixture types, all at an economical price.

LUR2 series retrofit kits offer quick install, continuous rows and reduced maintenance and opening costs.

LUR2 Series retrofit kits provide unparalleled ease of installation.

Dim or brighten an aisle based on shopper proximity to further save energy or change store ambiance.
