About Us

About Atkore Unistrut & Marco

Over ninety years of innovation

Atkore Unistrut was established in 1924 and is the original metal framing system featuring a unique weldless connection. The Atkore Unistrut system eliminates welding and drilling and is easily adjustable and reusable for infinite configurations. Atkore Unistrut has evolved from a simple connection concept to a comprehensive engineered building and support system featuring a robust line of channels, fittings, fasteners, hangers, pipe clamps, and accessories. Recent exciting developments for the company have set a unique position where Atkore Unistrut can now offer a guaranteed one stop service with the ability to meet the needs of any specification across multiple sectors.

Cable Management Solutions

Atkore Marco is a leading uPVC Cable Management Company, and the UK's largest manufacturer of Steel Wire Cable Tray. Today, Atkore Marco is a leader in its field, having carved a reputation as an innovator and provider of quality products, coupled with an unrivalled service and delivery. Working with distributors, and contractors across the UK, Atkore Marco can offer a one stop shop service, providing a full range of cable containment solutions to its customers.

Moving forward Atkore Unistrut & Marco will continue to innovate, develop, and strengthen the core products offering whilst introducing new products and accessories to support and increase customer group.

'Flytec's innovative product range has been a great addition to the portfolio, allowing us to expand our overall offering'

Part of the Atkore family

Atkore is a major manufacturer and innovator with a unique focus on steel framing and cable management. As part of the Atkore family the business can draw on a variety of technologies, products, and experience from Atkore companies throughout the world.

Atkore Unistrut & Marco People Promise

Sharing experience, knowledge, and expertise. The business continues to make investments in people, products, and services. The ability to share experience and knowledge with customers is the key to the business' success in a wide range of industry sectors.

About Us

Quality Standards

Quality Standards

Atkore Unistrut & Marco remain synonymous with engineering excellence, so it is no surprise the business prides itself to attention to detail and quality.

The commitment to match and exceed quality standards (where possible), this means that the business remains at the forefront of the industry by providing products you can trust.

Certified and tested systems, giving you peace of mind

Atkore Unistrut's loading software, offers a comprehensively tested support system from lengths through the fittings and accessories. This certified data is there to give you peace of mind and help Atkore Unistrut specify the best solution for you.

The partnering approach and complete dataset means that Atkore Unistrut & Marco can offer exceptionally accurate bespoke solutions. So you can be sure that the design and specification on paper is what you will get in real world applications.

Engineered Solutions

The business understands the challenges that modern infrastructure projects create. It's often the case that an off-the-shelf solution is unable to achieve all of your needs and requirements – especially when there are specific location, timing, or environmental issues to consider.

In these situations a bespoke solution can offer you the durability and flexibility you need to successfully deliver your project. Atkore Unistrut & Marco bespoke manufacturing service specialises in solving complex cable management issues. The ability to assess, design, engineer and support bespoke systems has proven to be invaluable on a variety of major projects.

Atkore Unistrut & Marco's versatile offering

Atkore Unistrut & Marco products help to support the infrastructure that is vital to modern industry and commerce. The product range can be seen in over 50 industry sectors where expertise and reliability are vital to success. The team of experts design and deliver projects that keep industry functioning – from renewables to transportation, from the healthcare sector through to the latest developments in high-tech Data Centres. Atkore Unistrut & Marco have the products to support your solution.

Atkore Unistrut & Marco have every sector covered

Sectors

Renewables & Data Centres

What is Renewable Energy?

Renewable energy is often referred to as clean energy, it comes from natural sources or processes that are constantly replenished.

Over the past 2 years many companies have become aware of climate change and the importance of reducing collective carbon footprint. Atkore is no exception, with Renewables becoming one of the focused target sectors.

Energy collected from wind and solar have been supporting the national grid for many years but recently due to the government promise for Net Zero by 2050 other renewables opportunities have arisen. These include converter stations to support on-shore wind and solar, EV and substations, all of which we have been able to advise and supply to.

What is a Data Centre?

Data Centres are often referred to as a singular thing, but they are composed of several technical elements. These can be broken down into three categories:

- **Computer:** The memory and processing power to run the applications, generally provided by high-end servers
- **Storage:** Important enterprise data is generally housed in a Data Centre, on media ranging from tape to solid-state drives, with multiple backups
- **Networking:** Interconnections between Data Centre components and to the outside world, including routers, switches, application-delivery controllers, and more

These are the components that IT needs to store and manage the most critical resources that are vital to the continuous operations of an organisation. Because of this, the reliability, efficiency, security, and constant evolution of Data Centres are typically a top priority. Both software and hardware security measures are a must.

Data Centre management is easy when utilising the complete Atkore Unistrut & Marco range, with products including Cable Ladder, Traditional and Spliced Tray, Steel Wire Cable Tray and a wide range of uPVC Trunking systems ensuring all your needs are met by the same supplier.

Atkore Unistrut & Marco

Materials & Finishes

Hot Dipped Galvanised HG

Processed in accordance with BS EN ISO 1461: 2009. It is an excellent solution for outdoor environments and has a unique metallurgical structure which gives outstanding resistance to mechanical damage. *55µm minimum thickness.

Stainless Steel SS

Stainless steel to 1.4404 (316L) standards. Excellent for marine applications and extreme environmental conditions. Pickle & Passivate is available upon request.

Zinc Dichromate ZD

Often used for clean rooms, Data Centres and other sterile environments.

Zinc Plated ZP

An alternative to a Pre Galvanised product and generally used for internal applications. Zinc Plated applications are often used in sterile environments. Electroplated EN 12329.

Zinc Magnesium ZM

Coated to standard EN10346-2015, Zinc-Aluminium-Magnesium is a coating whose main component is zinc, and the content of aluminium and magnesium is between 1.5-8% (where the magnesium content is not less than 0.2%). Compared with traditional coatings such as Hot-Dip Galvanising and Pre-Galvanised Steel, Zinc-Aluminium-Magnesium coated steels boast better corrosion resistance and self-healing properties. Ideal for extreme environmental conditions or high specification applications.

Materials & Finishes

Materials & Finishes

Zinc Aluminium*

Coated to standard EN10346-2015
Zinc-Aluminium offers excellent coating resistance compared to traditional Zinc coatings. Zinc Aluminium typically offers a coating which is 95% Zn & 5% Al. Perfect for outdoor applications.
*ZA available in Steel Wire Cable Tray only.

Plain Oil

Plain oil to BS EN 10025 standards. Pickled & Oiled with a min. yield 280 n/mm². Excellent for welding and finishing on site. Ideal base for powder coating and other surface finishes.

Pre Galvanised

The most popular finish, generally used for internal applications. Pre Galvanised to Z275- BS EN 10346 1.0244 standards. Supplied with a zinc coating to a nominal coat of 20µm.

Deep Galvanised

Processed in accordance with BS EN ISO 1461: 2009 to a greater thickness than the standard Hot Dipped Galvanised, it is an excellent solution for outdoor and harsh environments. *75 - 85µm minimum thickness.

Powder Coated

A variety of powder coating finishes are available. Often used to provide a pleasing aesthetic finish to projects such as shops and retail environments.

Deep Galvanised - 120µm+

Extra Deep Galvanised on silicone rich steel to a depth of 120µm+. Please consult the Atkore Unistrut Technical Team for predicted lifespan.

Metal Framing System

The original Metal Framing System

History

The original Unistrut Metal Framing System was invented in 1924 by Charles Attwood. The original design came from a need for efficiently mounting electrical components in large electrical cabinets. The key to this was the creation of the Unistrut channel & Unistrut Channel Nut. Although developed for electrical applications, Mr. Attwood envisioned using his product for almost any application requiring a structural support frame designed and built in the field.

Following this, Attwood created a full Metal Framing System including, Unistrut channel, nuts, fittings, brackets and fixings to increase product versatility. Now almost 100 years later, industries across the world still use Unistrut's original Metal Framing System for their applications.

Metal Framing System

Atkore Unistrut leads the industry with the most comprehensive line of channels and fittings, along with a complete line of hangers, pipe clamps, concrete inserts, and accessories, in a variety of finishes and materials.

The Metal Framing System requires no welding and no drilling - a wrench is the only tool you'll need! The Unistrut system is 100% reusable due to its flexibility, adaptability and versatility.

The only tool you'll need!

Metal Framing System

Mr Strut's Story

Mr.Strut

Did you know that the iconic mascot, Mr. Strut, was created by Walt Disney? Atkore Unistrut's founder, Charles Attwood, met Walt Disney on a commercial airline flight. During this meeting, Walt drew a sketch of Mr.Strut on a napkin and following the exchange, created an animated short film about the Unistrut Metal Framing System called 'Sky's the Limit'.

Limit' video!

Materials and Finishes

INTRODUCTION

Atkore Unistrut channels and fittings offer total flexibility in design and construction of assemblies for framing applications.

Atkore Unistrut products are available in a range of materials and finishes. These finishes offer differing degrees of corrosion protection for use in a variety of environments. Where required, factory decorative finishes are available to order.

MATERIALS

Channels are cold rolled from 1.5mm and 2.5mm steel strip and are available in:

- PO** PLAIN OILED
- PG** PRE - GALVANISED
- HG** HOT DIP GALVANISED
- DG** DEEP HOT DIP GALVANISED
- SS** STAINLESS STEEL MARINE GRADE
- ZP** ELECTRO ZINC PLATED

Mild steel channels are rolled using material formed from BS EN 10025 with guaranteed yield 280N/mm² and minimum ultimate tensile strength of 370N/mm².

Stainless steel channels are rolled using material formed from BS EN10088-2 grade 1.4404 (Grade 316L).

Atkore Unistrut fittings are pressed from hot rolled, pickled and oiled mild steel plate, or strip steel mainly from grade S315MC OR grade S275 mild steel.

Stainless Steel fittings are available to EN10088-2 grade 1.4404 (Grade 316L).

FINISHES

Hot -Dip Galvanised

Channels are Hot-Dip Galvanised in accordance with BS EN ISO1461:2009 and chromate passivated.

The minimum average Zinc Coating is as follows:

- Cold Rolled From 1.5mm Steel – 55 microns
- 2.5mm Steel – 55 microns

Fittings spun galvanised – 45 microns

Pre-Galvanised

Pre-Galvanising is to BS EN 10326 2004 (Coating Z275).

Special coatings and material grades are available on request

Stainless Steel

- Stainless Steel 1.4404 (316L)
- Cleaned (Pickled & Passivated)

Applying a pickling process to stainless steel results in a clean product and it also removes any heat discolouration that has occurred in the welding process.

Deep Galvanised

A deep galvanised coating can be achieved when using steel containing a slightly higher proportion of silicon; for example Corten 'A' steel. Silicon bearing steels modify the chemistry of the galvanizing process, resulting in the zinc coating continuing to increase in thickness as long as the steel remains immersed in the zinc. Coatings up to two to three times as thick as the normal standard coating are practical to achieve.

PVC Coating

PVC coating is a thick coating with good anti-corrosion properties. It gives a generally good chemical resistance to most acidic and alkaline materials. It is not suitable for use with most solvent-based contaminants. PVC coating is suitable for application over Hot-Dip Galvanised Steel.

Zinc Electroplated

Channel nuts and bolts are zinc electroplated.

RANGE

Channels are available in plain or slotted (Code T), in multiple channel combinations and all 2.5mm channels have serrated lips. Slots, 14mm wide x 28mm long or 11mm wide x 25mm long, are provided at 50mm nominal centres. Combination channels manufactured from Pre-Galvanised Steel are spot welded, whilst Hot-Dip Galvanised channels are continuously seam welded or spot welded as appropriate.

LENGTH

Standard channel lengths are 3m or 6m. Cut channel lengths can be supplied.

WEIGHTS & DIMENSIONS

Weights published in this catalogue for all materials are approximate shipping weights. All dimensions are subject to commercial tolerance variations.

TORQUE

The torque figures stated in this catalogue are based on using a properly calibrated torque wrench with a clean, dry (non-lubricated) Atkore Unistrut fitting, bolt and nut. A lubricated bolt or nut can cause extremely high tension in the connection and may lead to bolt failure. It must be noted that the accuracy of commercial torque wrenches varies widely and it is the responsibility of the installer to ensure that proper bolt torque has been achieved.

PERFORMANCE

It should not be assumed that the performance of a Stainless Steel product is similar to that of its mild steel counterpart. Consult your local Technical Sales Manager for further information.

FITTING APPLICATION

All part drawings illustrate only one application of each fitting. In most cases, many other applications are possible. Load values are based on use of a PNP12 Unistrut nut and M12 bolt unless specified otherwise.

While effort has been made to ensure the accuracy of the information contained in this catalogue at the time of publication, we cannot accept responsibility for inaccuracies resulting from undetected errors or omissions.

E & O.E. Unistrut Limited has a policy of continuous product development and reserve the right to change specifications without prior notice.

STANDARDS

The standard requires that products are stamped with BSEN6946:1988 and also the name of the manufacturer. We at Atkore Unistrut show that the standard is achieved by rolling the channel with the part number along with the full name of the Standard BSEN6946:1988, and also our own Atkore Unistrut branding. This is, as it should be, stamped into the Channel to ensure that you can clearly identify our product over the inferior product that is creeping into the market place.

The engraving should also be clearly visible at all times, even when the product has undergone further finishing treatments i.e. Hot Dip Galvanised, Epoxy Coating. Contractors and distributors should be aware of cheap imported and non-standard products that have removable or no product marking at all, as this is not within the standard.

Unistrut P1000 Special Channels

P1000 Special Channels require a minimum order quantity

Concrete Inserts

Concrete Inserts

Atkore Unistrut concrete inserts are manufactured from standard Unistrut channel and may be installed in floors, walls, or ceilings for the support of all types of piping, conduit, cable support, and other industrial equipment.

Channel nuts can be positioned anywhere along the length of the channel, providing a means of attaching fittings or rods where required.

Atkore Unistrut inserts are available pre-filled with an easily removable foam to prevent the ingress of grout and cement.

Concrete inserts can be supplied in Pre Galvanised, Hot-Dip Galvanised and Stainless Steel finishes.

P3270 inserts are designed to accommodate M6, M8, M10, M12 & M16 fixings. Cutting positions are located between lugs as indicated (A) in increments of 200mm.

The recommended loading in average strength concrete* with a safety factor of 3, is:

Part No.	Pullout	Length
P3270	8.8kN	300mm

*B = 25 N/mm²

Stated loadings apply to mild steel products only.

P3370 inserts are designed to accommodate M6, M8, M10 & M12 fixings. Cutting positions are located between lugs as indicated (A) in increments of 200mm.

The recommended loading in average strength concrete* with a safety factor of 3, is:

Part No.	Pullout	Length
P3370	6.7kN	300mm

*B = 25 N/mm²

Universal Hinge

UGM10 Universal Hinge Mount
The perfect solution for suspending threaded rod vertically from an angled roof or ceiling.

Features & Benefits

- Can be fixed directly to roof sections, or attached to Atkore Unistrut channel mounted across purlins/beams
- Accepts all M10 ZP threaded products (including threaded rod)
- Fully adjustable through 135 degrees to suit any mounting application

Technical Information

- Mass: 10.8kgs/100
- Working load with a safety factor of 3 is 3.0kN or 300kg
- Tighten threaded rod into position using the serrated nut and locking plate (both supplied)
- Threaded rod supplied separately

Contents	Page Number
About Atkore Unistrut Cable Tray Systems	52
Standard Range	54
Sizes, Angles & Codes	65
Accessories	67
Technical Information	71

Atkore Unistrut's Cable Trays come in a wide range of sizes and finishes, including a self-splicing fast assembly variant for both installation efficiency and maximum application versatility.

The Cable Tray systems are also available in Extra Heavy Duty options, for applications where additional strength and capacity is required.

A broad variety of fits, finishes and shapes ensure we have the widest range of Cable Tray systems in the industry and we are able to offer covers to suit all ranges.

Sectors:

- Commercial buildings, including office blocks, shopping centres and super markets
- Hospitals, Data Centres, correction facilities
- Infrastructure applications such as airports, road and rail tunnels.
- Automotive industry
- Petrochemical, food and beverage and general industrial applications

THE CABLE TRAY RANGE

Atkore Unistrut Slot Pattern

Traditional Unistrut standard design in use since 1965, synonymous with strength and quality.

The complete range of Atkore Unistrut Cable Tray for use in **Light**, **Medium**, **Heavy** & **Extra Heavy** duty applications. Available in a variety of sizes, the Atkore Unistrut system provides the ultimate in flexibility, quality and speed in installation. Ideal for all your cable applications, from low power control and signalling to mains power supply cabling. With a complete range of fixings and accessories including bends, risers and covers.

Light Duty (TULL)

Available in 3m lengths with depths of 12mm (50mm wide to 225mm wide) and 18mm (300mm to 900mm wide), in [PG] Pre-Galvanised, [HG] Hot-Dip Galvanised and [SS] Stainless Steel finishes.

Heavy Duty (TUHLT)

Available in 3m lengths with a depth of 50mm and widths from 50 to 900mm, in [PG] Pre-Galvanised, [HG] Hot-Dip Galvanised and [SS] Stainless Steel.

150mm Deep Cable Tray (TUXHLT)

Available in 3m lengths with a depth of 150mm and from 100 to 600mm widths. Finish applications include [PG] Pre-Galvanised, [HG] Hot-Dip Galvanised and [SS] Stainless Steel.

Medium Duty (TUMLT)

Available in 3m lengths with a depth of 25mm and widths from 50 to 900mm, in [PG] Pre-Galvanised, [HG] Hot-Dip Galvanised and [SS] Stainless Steel finishes.

Extra Heavy Duty (TUEHLT)

Available in 3m lengths with a depth of 100mm and from 100 to 900mm widths. Finish applications include [PG] Pre-Galvanised, [HG] Hot-Dip Galvanised and [SS] Stainless Steel.

ATKORE UNISTRUT CABLE TRAY

Cable Tray Features:

- Traditional Unistrut slot pattern
- All material is European standard graded
- Widths : 50, 75, 100, 150, 225, 300, 450, 600, 750 and 900mm
- Compatible with Unistrut fittings only
- Stock held in the UK
- An extensive range of dedicated accessories, bracketry and support systems
- Covers available for all sizes

Standard Material & Finish Codes

Finish	Code
Pre-Galvanised	PG
Hot Dipped Galvanised	HG
Stainless Steel	SS

Other materials and finishes available upon request.

Cable Trays - Information

Atkore Unistrut Cable Tray Information

Materials and Finishes

Pre-Galvanised [PG]

Cable Trays, brackets and fittings can be Pre-Galvanised. Pre-Galvanising is to BS EN 10346 2009 (Coating Z275).

Hot-Dip Galvanised [HG]

Cable Trays, brackets, cantilever arms and fittings can be Hot-Dip Galvanised in accordance with BS EN ISO1461:2009 and chromate passivated.

The minimum average Zinc Coating is as follows:

- Cold rolled from 1.5mm Steel – 55 microns
- Fittings spun galvanised – 45 microns

Stainless Steel [SS]

- Stainless Steel 1.4301 (304)
- Stainless Steel 1.4404 (316L)
- Cleaned (Pickled & Passivated)

Applying a pickling process to stainless steel results in a clean product and it also removes any heat discoloration that has occurred in the welding process.

SPECIAL COATINGS AND MATERIAL GRADES ARE AVAILABLE ON REQUEST

Certification and Quality Standards

ISO 9001 - Quality system certification

ISO 14001 - Environment certification

ISO45001 - Health and safety certification

Loading Data

Atkore Unistrut Cable Tray Brackets

Loading Data

Load test according to CEI/IEC 61537:2001

Q = UDL (uniformly distributed load)

Safety Factor = 1.7

L = intermediate span

F = deflection = $1/100$ of the intermediate span (max.)

S = splice location

Atkore Unistrut's load testing is in accordance with CEI/IEC 61537:2001. In practical terms this covers continuous/multi span installations, evenly loaded along the length of, and across the full width of the tray. The end spans in these installations should be reduced to 0.75 of the intermediate spans.

Deflection: Atkore Unistrut's load and deflection figures are in accordance with CEI/IEC 61537:2001, with the characteristic deflection of Atkore Unistrut Cable Tray limited to span/100 and load figures inclusive of a safety factor of 1.7.

Accessories: To ensure adequate support, accessories should be supported locally.

Couplers: The loading and deflection tables for Atkore Unistrut Cable Tray assume that the couplers are located at the most onerous position within the span (i.e. mid span). To maintain the load/deflection figures stated in the tables, the couplers should not be located in end spans or over support locations. Straight couplers were utilised for the testing of the medium and heavy duty Cable Trays. Only one pair of couplers should be installed per span.

Cable Ladders

Atkore Unistrut Cable Ladder Solutions

Key Features

Atkore Unistrut's Cable Ladder systems are renowned around the world for quality and engineering excellence. Wherever severe corrosion conditions are present, or a long maintenance free life is required, Atkore Unistrut's welded steel Cable Ladder systems are the obvious choice. Atkore Unistrut manufactures a complete range of Cable Ladder systems for a wide range of load and span combinations to suit the requirements of almost any installation.

Cable Ladders are selected because of their heavy load carrying capacities and the excellent performance they give in harsh environments where salt spray or salt laden atmosphere, and other mild corrosive materials are present. Applications such as Oil & Gas, Petrochemical, tunnels, port facilities and anything else you can imagine.

Supplied in **medium**, **heavy** and **extra heavy duty** sizes.

Available in standard finishes of [PG] Pre-Galvanised, [HG] Hot-Dip Galvanised and [SS] Stainless Steel, but also Specialist Finishes are available on request.

Engineered to maximise long span runs where support installation is limited.

Cable Ladders

Atkore Unistrut Cable Ladder Solutions

U10 - Medium Duty

Medium Duty 100mm high cable ladder for the tougher application and complete with a wide range of accessories and fixings to suit.

Available in 3 or 6m lengths with widths from 100 to 1200mm, in [HG] Hot-Dip Galvanised and [SS] Stainless Steel finishes.

Typical loading on with a 3m support span of approx 235kg/m.

U12 - Heavy Duty

Heavy Duty 125mm high cable ladder, designed for applications which require a stronger and more rigid solution, complete with a wide range of accessories and fixings to suit.

Available in 3 or 6m lengths with widths from 100 to 1200mm, in [HG] Hot-Dip Galvanised and [SS] Stainless Steel finishes.

Typical loading on with a 3m support span of approx 357kg/m.

U15 - Extra Heavy Duty

Extra Heavy Duty 150mm high cable ladder intended for use in applications which require additional strengths and reliability. Complete with a wide range of accessories and fittings, the Extra Heavy Duty Cable Ladder is supplied in 3 or 6m lengths and is available in a number of finishes, including [HG] Hot-Dip Galvanised and [SS] Stainless Steel.

Typical loading on with a 3m support span of approx 449kg/m.

Reducers

Cable Ladder Risers

Reducers are available in three variants and can be made to order for any stock width to any other standard width.

Variants include :

- Left hand reducers
- Right hand reducers
- Straight reducers

To calculate the correct reducer, please follow the formula below:

Choose your depth of ladder

U10 (Medium Duty)	= U10
U12 (Heavy Duty)	= U12
U15 (Extra Heavy Duty)	= U15

Choose the reducer variant

Left hand	= LR
Right hand	= RR
Straight	= SR

Choose the starting width

100mm	= 10
150mm	= 15
200mm	= 20
300mm	= 30
400mm	= 40
450mm	= 45
500mm	= 50
600mm	= 60
700mm	= 70
750mm	= 75
800mm	= 80
900mm	= 90
1000mm	= 100
1200mm	= 120

and the End (reduced) width

U10 SR

U10 SR 80

U10 SR 80 / 40

Branch Tees

Cable Ladder Branch Tees

Atkore Unistrut's Branch Tee's simplify the method of installation instead of using the traditional tee piece.

This allows full ladder installation runs and tee's to be added at a later date to ensure accuracy and to improve installation times.

Key Features

- Dictate where tee's positioned
- Reduces ladder cuts
- Improved installation times
- Lower installation cost
- Reduced weight for install

Width					
Radius (mm)	300	450	600	750	900
300					
450					
600					
750					
900					

Part Number Guide

Part number = Size*BT*Width*Rad*Finish

For example: U10BT3030HG = U10 Cable Ladder Branch Tee 300mm x 300mm in Hot-Dipped Galvanised finish.

Atkore Unistrut & Marco have an experienced technical sales team who can assist with all product enquiries.

Cable Ladder Technical Data

Technical Information for Atkore
Unistrut's Cable Ladder System

Materials & Finishes

Cable Ladder Materials & Finishes

Hot-Dip Galvanised [HG]

Cable Trays, brackets, cantilever arms and fittings can be Hot-Dip Galvanised in accordance with BS EN ISO1461:2009 and chromated.

The minimum average Zinc Coating is as follows:

- Cold Rolled From 1.5mm Steel – 55 microns
- 2.5mm Steel – 55 microns
- Fittings spun galvanised – 45 microns
- Mild Steel – BS EN 10149-3 grade S280 – min.yield 280 n/mm² – UTS 370 n/mm²

Deep Hot-Dip Galvanised

- BS EN 10025 S275JO+AR+CL1 or equivalent/better. 2mm min. thick material.

Stainless Steel [SS]

- Stainless Steel 1.4404 (316L)
- Hot Rolled to B.S.EN10088-2-1.4404+1D.
- Cleaned (Pickled & Passivated)

Applying a pickling process to Stainless Steel results in a clean product and it also removes any heat discolouration that has occurred in the welding process.

SPECIAL COATINGS AND MATERIAL GRADES ARE AVAILABLE ON REQUEST

Pickle & Passivate is available upon request

Certification and Quality Standards

BS EN 61537:2007

ISO 9001 – Quality system certification

ISO 14001 – Environment certification

ISO 45001 – Health and safety certification

Loading Data

Cable Ladder Loading Data

Stated loadings apply to mild steel products only.

Load test according to CEI/IEC 61537:2001

Q = UDL (uniformly distributed load)

Safety Factor = 1.7

L = intermediate span

F = deflection = $1/100$ of the intermediate span (max.)

S = splice location

Atkore Unistrut's load testing is in accordance with CEI/IEC 61537:2001. In practical terms this covers continuous/multi span installations, evenly loaded along the length of, and across the full width of the ladder. The end spans in these installations should be reduced to 0.75 of the intermediate spans.

Deflection: Atkore Unistrut's load and deflection figures are in accordance with CEI/IEC 61537:2001, with the characteristic deflection of Unistrut Cable Ladder limited to span/100, and load figures inclusive of a safety factor of 1.7.

Accessories: To ensure adequate support, accessories should be supported locally.

Couplers: The loading and deflection tables for Atkore Unistrut Cable Ladder assume that the couplers are located at the most onerous position within the span (i.e. mid span). To maintain the load/deflection figures stated in the tables, the couplers should not be located in end spans or over support locations. Only one pair of couplers should be installed per span.

Atkore Unistrut Ladder - Type U10

Atkore Unistrut Ladder - Type U12

Atkore Unistrut Ladder - Type U15

Couplers

Cable Ladder Couplers

SP Coupler (Straight Splice)

2x Straight Splices with fasteners included.
For use in joining flat sections (straights and curves)

VSP Coupler (Verticle Splice)

2x Vertical Splices with fittings included.
For use in creating an adjustable riser.

HSP Coupler (Horizontal Splice)

2x Horizontal Splices with fittings included.
A hinged splice to allow straights to connect at varying angles.

TEC Coupler (Thermal Expansion Coupler)

2x Thermal Expansion Couplers with fittings included.
To compensate for thermal expansion.

Size & Angle Codes

Cable Ladder Size & Angle Codes

Atkore Unistrut's fittings come in a wide variety of widths, radii and angles (where appropriate). Many of these are standard factory items and the rest are available upon request.

Unless specified, figures are in millimeters (mm)

PG Cable Ladder

U11 Pre-Galvanised Ladder

U11 Cable Ladder

The Atkore Unistrut U11 Pre-Galvanised ladder has a 110mm high side wall with an S-shape profile.

The range is completed with a full range of accessories including bends, tees, crosses and risers.

- Standard finish: Pre-Galvanised Steel
- Length: 3000mm
- Rung distance: 250mm
- Sidewall height: 110mm

C-CLAMPS

C-Clamps by Atkore Unistrut

Atkore Unistrut C-Clamps offer cushioned pipe support. The Unistrut branded C-Clamps are made from high quality steel and can be used in conjunction with Unistrut Channel.

Key Features:

Atkore Unistrut's C-Clamps Channel mounted clamping systems are ideal for multiple line runs, while absorbing shock and vibration, reducing unwanted noise and preventing galvanic corrosion.

- C-Clamps fit any standard 41mm wide channel profile
- Wide temperature operation -45C to >+135C
- Stud securely fastened to one clamp half
- Nylon insert nut assures a positive lock and plain nut also supplied if required
- Polymer insert ensures a positive grip
- Available in Zinc Dichromate and Stainless Steel
- Assembly consisting of steel clamp with locknut or Flange
- Nut & thermoplastic elastomer cushion
- All parts are marked for easy identification and individually packaged
- Our cushion is made from a thermoplastic elastomer, its built tough to withstand the effects of most oils, chemicals & industrial cleaning compounds, in temperatures from -50°F to +275°F (-45°C to +135°C)

About Us

Over 90 years of experience

With a committed team, years of experience, in-depth knowledge and a full understanding of cable trunking manufacturing, Atkore Unistrut & Marco is one of the industry leaders and the business is constantly looking at ways to improve products and services.

Atkore Unistrut & Marco research the latest technologies and its advances in the industry, in order to bring added value to the customers by investing in the best equipment to ensure the business provide the best products available.

By listening to customers' needs, we strive to provide high quality products and services that meet and exceed expectations.

“Our mission is to be the customer’s first choice by providing unmatched quality, delivery and value based on sustainable excellence in strategy, people and processes.”

Personal Service

Atkore Unistrut & Marco are delighted to bring the benefits of many years experience in the industry and offer a total solution to on-site requirements.

Custom Made Solutions

Sharing experience, knowledge, and expertise. The business continues to make investments in people, products, and services. This contributes towards Atkore Unistrut & Marco's success in a wide range of industry sectors.

Leading the way in Cable Tr

About Us

Quality Systems

Atkore Unistrut offer quality Galvanised and painted products to suit your project requirements. Taking the business to the areas of expertise ensures that the business continues to bring high levels of customer service and quality products.

Environmental Policy

Working closely with regulators and environmental groups, we are committed to protecting the environment as responsible citizens. To achieve these aims we will:

- Comply with environmental laws and regulations
- Work continuously to improve the effectiveness of our environmental management
- Provide appropriate environmental training for all employees
- Seek to reduce the amount of waste at our facilities
- Re-use and recycle wherever possible
- Monitor our environmental performance to ensure we meet the standards set by ourselves
- Communicate and reinforce this policy throughout the company

British Standards

The Flytec range conforms to the following British Standards:

- BS EN 50085-1
- BS EN 50085-2
- BS EN 10142
- BS EN 10143

Building Better Together

Together, Atkore Unistrut & Marco offer a 'one-stop-shop' for all your metal framing and cable management needs. From Steel Surface Trunking, to Underfloor and Service Boxes. The Flytec range is the perfect choice for your next cable containment project.

Site survey, Measure & Design Service

Atkore Unistrut & Marco offers a tailor-made solution, prepared according to your specific needs and requirements. By listening to the customers' needs, the business strives to provide high quality products and services that meet and exceed expectations.

Working in partnership with the customers, the aim is to achieve total customer satisfaction.

All of Atkore Unistrut & Marco Technical Sales Managers work closely with contractors and distributors to assist in design and offering on site measurement services and advice. This flexible approach to manufacturing differentiates us from the market.

Surface Trunking Ranges

Steel Surface Trunking is available in the following variants:

Fast Fix IP4X (FF)

Fast Fix IP4X range is available from 2x2 to 6x6, including rectangular sizes, in various bends such as 45°, 90°, flat and tees. For larger sizes refer to the standard range.

Security Fixing (TX)

A pan head screw with TORX® Tamperproof screw fix lids.

Multi-Compartment (C)

Constructed to the same high quality as the single compartment range, the multi-compartment trunking partitions are manufactured from Galvanised steel spot welded into position.

IP54 (-IP54)

Gasketed trunking to prevent ingress of dust and liquids, available in single or multi compartment.

Stainless Steel (SS)

Stainless Steel trunking 316L & 304 grade is available in single or multi compartment. The Stainless Steel trunking systems are made to order.

Steel Cable Trunking

Steel Cable Trunking Systems

Flytec's innovative product range has been a great addition to the portfolio, allowing the business to expand the overall offering. The Steel Surface Trunking range includes, Fast Fix IP4X, Security Fixing, IP54 and Stainless Steel Trunking, available in single and multi-compartments.

Surface Trunking

All lengths are supplied with internal connectors secured by M5 bright zinc-plated screws fixed into Captive Nut inserts.

All Surface Trunking is made from Pre-Galvanised Steel to BS EN 10142 & 3 and is manufactured to BS EN 50085-1 and BS EN 50085-2-1.

Straight lids are secured by a two part all steel turnbuckle as standard. Slotted or tamperproof screw lids are also available on request.

Accessories are generally a one piece construction complete with internal fitting connector.

The entire range is also available in a powder coated finish on request.

Multi-Compartment & Gasketed Trunking

Multi-Compartment Trunking & Fly-Overs

- Partitions manufactured from galvanised steel spot welded into position
- Partitions can also be supplied for loose on-site fixing
- Trunking with unequal spaced compartments can be supplied - Please state sizes required at time of ordering
- All accessories shown on the single compartment page can be manufactured to suit multi-compartment
- All compartments are equally spaced unless requested
- Compartments are equally spaced as standard
- Speak to our technical team for unequal compartments

Fly-Overs

- Fly-Overs are supplied with all tees and crossovers
- Approximately 50% of cable capacity is lost when fitting a Fly-Over

Gasketed Trunking for External Use (IP54)

All the sizes shown in single and multi-compartment sections can be manufactured to prevent ingress of dust and liquids (IP54).

This innovative system is designed with an outward returned flange on the body with an overlapping lid, which is fitted with EDPM both sides along its entire length. When installed, the gasket is compressed between body and lid by mushroom screws which fix into captive bushes on the outward flanges.

Trunking manufactured to this design will provide IP54 protection and is supplied in 2 metres lengths maximum.

Atkore Unistrut also offer a complete range of fully gasketed accessories.

How to order Skirting & Dado Trunking

How to order Perimeter Trunking guide:

- To order Skirting/Dado Trunking, select the trunking family (see page 146), the size (see table below), and the compartment 2C or 3C

For example:

- Square Dado Trunking in size 6x2 in 2 Compartments
- Take trunking reference **SD** + size **62** + 2 compartment **2C** to give **SD62/2C**

Perimeter Systems Size Guide	
62 (6x2)	2C
82 (8x2)	3C*

*Not available in all parts

How to order Perimeter Trunking Accessories guide:

- To order Skirting/Dado Trunking Accessories, simply select the trunking family, the size, the compartment and the accessory

For example:

- Top Chamfer Skirting Trunking 90° Internal Bend in size 6x2 in 2 Compartments
- Take trunking reference **TC** + size **62** + 2 compartment **2C** + 90° Internal Bend **ISB** to give **TC62/2C/ISB**

Skirting Trunking

Skirting Trunking

Skirting Trunking is supplied in 2 metre lengths, comprising a Galvanised sheet steel body with powder coated overlapping lid, in the colour white as standard. A cover strap is provided with each length of lid. This reduces the necessity for special on-site cutting requirements, as the strap covers any cut edges.

Features:

- 20mm knockouts in the partition at the 250mm centres, allowing easy positioning of outlet plates, which require screening via the steel back box that fixes to the partition
- Chamfered or flat top options as standard
- Other powder coated finishes are available even when only a short run of trunking is required
- 2 or 3 compartments are most commonly used. However, systems to suit client's individual requirements can be manufactured with the same short lead time

150mm x 50mm

Dado Trunking

Dado Trunking

Dado Trunking is supplied in 2 metre lengths. Manufactured to the same high quality as our skirting trunking, Dado trunking is designed to be installed around the perimeter above floor level, allowing for optimum use of floor space.

Features:

- Chamfer Top, Flat Top or Double Chamfer Dado options are available as standard
- 20mm knockouts in the partition at the 250mm centres, allowing easy positioning of outlet plates, which require screening via the steel back box that fixes to the partition
- Other powder coated finishes are available
- 2 or 3 compartments are most commonly used. However, systems to suit client's individual requirements can be manufactured

Flush Floor Shallow Screeds

Flush Floor Shallow Screeds

Flush Floor Trunking body is supplied in 2 metre lengths complete with 2 x 1 metre lengths of lid secured by means of flush all steel turnbuckle fasteners. Each length of Flytec trunking is supplied with one external fitting connector.

Lids are manufactured from 3mm thick Galvanised steel. They are fully removable and may be flush or recessed by 3mm as standard. Other depths of recess can also be supplied.

It is advisable that all lid sections are fitted during screeding. This will prevent any slight inward movement to the sides of trunking body.

Atkore Unistrut recommend that Flush Floor Trunking is installed on a ribbon screed or similar to ensure support along the entire length and width of the system.

D1 - Flush Screeds

150mm x 38mm **D1/615/2C**

150mm x 50mm **D1/62/2C**

228mm x 38mm **D1/915/3C**

228mm x 50mm **D1/92/2C**

D2 - Recessed Screed

150mm x 38mm **D2/615/2C**

150mm x 50mm **D2/62/2C**

228mm x 38mm **D2/915/3C**

228mm x 50mm **D2/92/2C**

How to order Flush Floor Trunking guide:

- To order Flush Floor Trunking, simply select the trunking (**D1** or **D2**), the size (see table below), and the compartment **2C** or **3C**

For example:

- D1 trunking, size 6x1 with 2 Compartments
- Take trunking reference **D1** + size **61** + 2 compartment **2C** to give **D1/61/2C**

Flush Floor Size Guide		
61 (6X1)	615 (6X1.5)	62 (6X2)
91 (9X1)	915 (9X1.5)	92 (9X2)
121 (12X1)	1215 (12X1.5)	122 (12X2)

Flush Floor Shallow Screeds

Flush Floor Shallow Screeds

Service outlet boxes are available for shallow screed trunking.

- The underside of the box must be set lower into the floor to enable cables to pass under the socket outlet plates whilst maintaining lids to finish level with screed
- Carpet trim and lid assembly are manufactured in a tough plastic moulding which has two individual hinged cable outlets in dark grey
- The lid is reinforced by a 3mm steel plate.
- Carpet recess is 6mm

D6 Flush Floor Trunking Service Outlet Systems

D6 Flush Floor Trunking

Flytec's flush floor trunking is supplied in 2 metre lengths, including 400mm lengths of removable lid which are interchangeable with a service outlet box, thus giving the designer flexibility of positioning within a screeded floor installation.

Flytec lids that are manufactured from 3mm thick Galvanised Steel are fixed to the trunking body by countersunk zinc plated steel turnbuckle fasteners, providing speed of fitting by the installer and maximum rigidity of the finished product.

Key Features

- Available in two or three compartments
- It is advisable that all lid sections are fitted during screeding. This will prevent any slight inward movement to the sides of trunking body

The Flush Floor Trunking is installed on a ribbon screed or similar to ensure support along the entire length and width of the system.

How to order D6 Flush Floor Trunking & Accessories guide:

- To order D6 Flush Floor Trunking, select the trunking and the compartment (see table below)
- For accessories, simply add the accessory part number to the end of the code

For example:

- D6 2 Compartment Trunking
Take trunking reference **D6/C** + 2 compartment **15** to give **D6/C/15**
- D6 Riser Bend 2 Compartment Trunking
Take trunking reference **D6/C** + 2 compartment **15** + **ISB** to give **D6/C/15/ISB**

Underfloor Trunking

Underfloor Trunking

Underfloor Trunking is designed for placing on the constructional concrete slab, to be completely covered when the final floor screed is laid and the service outlet positions fixed.

- Steel Underfloor Trunking is manufactured in 2 metre lengths
- Two or three compartment are most commonly used
- Single or other numbers of compartments can also be supplied
- The trunking lengths are a total welded construction with no need to couple together loose channel sections
- Each length is joined together by a saddle clamp and plate, which prevent any ingress of screed into the duct

Chequer Plate Trunking

Chequer Plate Trunking & Accessories

When a Flush Floor Trunking is required in an area where excessive loads will be transported such as a warehouse or industrial environment, Atkore Unistrut manufacture a robust steel trunking body fitted with a 6mm thick chequer plate lid fixed into place by M6 countersunk screws.

It is recommend that Flush Floor Trunking is installed on a ribbon screed or similar to ensure support along the entire length and width of the system.

It is advisable that all lid sections are fitted during screeding. This will prevent any slight inward movement to the sides of the trunking body.

Single or multi-compartment options are available with a range of accessories, including:

- Riser Bend
- Stop End
- Flat Bend
- Tee
- Crossover

*Service boxes are not available with chequer plate trunking

Service Outlet Boxes

Service Outlet Boxes

Service Outlet Boxes

- For screed or raise floor applications
- Available in 2, 3 or 4 compartments
- Outer box with 20mm and 25 mm knockouts of two sides
- Standard box depth is 75mm, other sizes are available
- A wide range of outlet plates to carry voice, data and power sockets
- Available with a dark grey carpet trim fitted as standard or a stainless steel trim
- Deep lid recess boxes can be manufactured to accommodate stone, marble or timber infill

Modular & Pre Fabricated

Off-Site Construction and
Pre Fabricated Solutions

Pre Fabricated & Modular

Pre Fabricated & Modular Systems

Atkore Unistrut & Marco offer a wide range of expertise and services to supply custom solutions to suit the needs of any project.

The complete bespoke solution from Atkore Unistrut & Marco

We understand the challenges that modern infrastructure projects create. It's often the case that an off-the-shelf solution is unable to answer all of your needs and requirements, especially when there are specific location, timing, or environmental issues to consider.

In these situations a bespoke solution can offer you the durability and flexibility you need to successfully deliver your project.

Atkore Unistrut & Marco's Pre Fabricated framing service specialises in solving complex framing issues. The ability to assess, design, build and support bespoke framing systems has proven to be invaluable on a variety of major projects.

Working with a wide range of industries

Atkore Unistrut & Marco's products help to support the infrastructure that is vital to modern industry and commerce. The product range can be seen in over 50 industry sectors where expertise and reliability are vital to success.

Atkore Unistrut & Marco's team of framing experts design and deliver projects that keep industry functioning, from the petrochemical sector to transportation, from the oil and gas industry through to the latest developments in high-tech Data Centres.

Trapeze & H Frames

Trapeze & H Frames

Multi-Service support for mechanical, electrical and ventilation

Fully Specified

Each threaded rod unit can be supplied to the clients specific requirements, ensuring that every job is met with accurate and ready to install modules. Specific dimensions on the size of channel used and the diameter of the threaded rod can be specified to Atkore Unistrut upon enquiry.

Multiple Tiers

Each unit can be supplied as a single, or multi-tiered set, to allow for changing of configurations on-site.

Best Practice

Each trapeze frame is manufactured to Atkore Unistrut's best practice, which includes our square plate and flat washers. Atkore Unistrut ensure each unit is manufactured to comply with all applicable standards.

Application Specific

Each trapeze unit is designed to specific customer requirements, with application driven load calculations done beforehand to ensure each unit can support all on-site requirements.

Multi-Service brackets manufactured from Atkore Unistrut, available as welded or bolted systems

Atkore Unistrut's H-Frames can be supplied in two system configurations to allow for flexibility when ordering the product. H-Frames are available as follows:

Bolted System

Atkore Unistrut's bolted system is supplied with all accessories pre-installed to the unit using nut and bolt configurations. This solution is ideal for projects where the installer may need to make small adjustments based on site requirements.

Welded System

Atkore Unistrut's welded H-frames are designed for rigidity and sustained product life. Each welded unit is supplied complete and cannot be adjusted to suit on-site requirements, as all design requirements are signed off before manufacture.

Pre Fabricated & Modular Systems

Bespoke modular units, delivered complete & ready to install

Atkore Unistrut's kit assemblies are designed for installation on projects where multiple, repeating specifications are required, and are supplied complete, ensuring each order arrives with the exact number of components and accessories.

Benefits of kit modules include reduced waste on site, reduced time spent cutting and assembling framing, and ensuring that exact quantities are delivered each time.

Reduced time on-site

By ordering Atkore Unistrut kit modules, you can be sure each unit arrives on site, ready to install.

Reduced waste

Each unit is supplied pre-cut to exact lengths requested, ensuring no excess waste is produced on-site.

Exact quantities

Each module is delivered complete with all accessories and fittings required. This ensures no excess waste is created during installation.

Each module supplied with a single bill of materials, and handled as a single order

When kit assemblies are ordered, each is processed as a single unit, with a bill of materials being delivered to the customer for approval.

Atkore Unistrut then manage the entire process, ensuring that each kit is supplied as one single unit, rather than one order for multiple parts.

Example bill of materials for Atkore Unistrut Kit Assembly. Unit would be ordered with a unique code, for example WS1011481

Bill of Materials

2D Modules

Pre Fabricated & Modular Systems

2D Modules to support multiple services supplying mechanical and electrical services

Similar to our H-Frames, Atkore Unistrut 2D modules are designed, manufactured and delivered to site ready to install. Utilised in housing a large amount of containment and infrastructure, including ventilation and air conditioning units, Atkore Unistrut's 2D modules can be installed vertically and horizontally.

Vertical units can be utilised to carry service risers through high-rise builds. 2D modules are also available as bolted or welded units.

Delivered complete

Each 2D module is delivered complete, ready to install and ready to house a wide variety of services.

Quality Manufacturing

Each 2D module are manufactured to strict quality requirements, with each module tested to meet the load specification from the client.

Support

Atkore Unistrut's 2D modules are designed to carry a wide range of mechanical and electrical services and support pipework, also known as 'skids'.

Bolted or Welded Assembly

Atkore Unistrut's 2D modules are available as bolted or welded units, allowing for enhanced rigidity, or design flexibility as required.

Risers

2D modules are designed to carry service risers throughout high-rise builds.

Pre Fabricated & Modular Systems

Unpopulated 3D modules, designed as extensions of the 2D model, manufactured to house a wide range of electrical and mechanical services

Atkore Unistrut 3D modules are designed to house a complex series of electrical and mechanical infrastructure.

Atkore Unistrut's modular service ensures each unit is manufactured to the customers' specific requirements, and clear guidance and technical support, as well as regular updates provided throughout the manufacturing process.

Bolted or Welded Assemblies

Atkore Unistrut 3D modules can be delivered as bolted or welded units. Bolted units give the client the flexibility to alter units to suit on-site requirements, whilst welded units provide a stronger, more rigid base to house services.

Scope of work

Atkore Unistrut are able to manufacture a wide scope of 3D modules, whether the client requires a one-off design solution, or hundreds of modules. No project is the same, and Atkore Unistrut are able to offer a wide variety of flexible solutions to suit the clients' needs.

Ready to install

Atkore Unistrut 3D modules are assembled in-house at our specialist facility and delivered to site, complete and ready to install.

Flexible design service

Atkore Unistrut offer a complete design assistance service, ensuring each module is drawn and signed off before manufacture.

Populated Modules

Pre Fabricated & Modular Systems

Fully populated modules with mechanical and electrical services installed.

Atkore Unistrut & Marco are also able to populate 2D and 3D modules with a number of services from our range of electrical raceway products.

This includes cable ladder, cable tray, cable trunking and Atkore Marco Steel Wire Cable Tray. These products are all installed in the modules before shipping and secured in place using a range of Atkore Unistrut fittings and accessories.

Atkore Unistrut & Marco's ability to offer fully serviced M&E modules allows us to take on a wider variety of projects, giving modular framing systems a wider application reach.

Quality assurance is integral to the manufacture of each module, with each being thoroughly checked prior to delivery, ensuring each unit is fully compliant with relevant standards and specifications.

Populated Module Components

Technical Capabilities

Pre Fabricated & Modular Systems

Working with clients to ensure each module is supplied in line with project timetables

Atkore Unistrut are able to offer a series of technical and engineering support services for all modular products.

Product delivery is key, and important to the construction of modules. Atkore Unistrut is committed to delivering a complete service when it comes to designing and delivering modular framing systems. This enables the business to support the client throughout the entire design phase.

From initial enquiry Atkore Unistrut are able to offer a tailored service to meet all the customers' needs and requirements. With support and advice given through each step of the service to ensure the correct solutions are delivered first time.

Our service includes:

1. Consultation, by sitting down with the client and having an initial requirement discussion, Atkore Unistrut & Marco can begin looking at drawings and advise on what requirements need to be met for the project

2. Specification, Once specification is given, Atkore Unistrut & Marco will look at the engineering and design requirements through detailed drawings sent from the client, from this an accurate bill of materials to provide costs for producing each module can be generated.

3. Drawing Delivery & Design Freeze, Atkore Unistrut & Marco will deliver drawings and get Client approval on modular units ready to go into manufacture. Here the final decision and order is placed for the units, with customer accepting design responsibility.

4. Project Delivery & Schedule, Modules are put into manufacture in-line with clients delivery schedule, to ensure each unit required for each phase of construction is delivered on time.

5. Manufacture, Atkore Unistrut & Marco will begin manufacture of each module, ensuring quality checks are performed at each key stage. Client is updated with progress on their modules and continuous communication from the engineering and sales teams.

6. Delivery, Upon completion, Unistrut will deliver completed modules to site, ready to install as per agreed schedule.

Rooftop Support Modules

Pre Fabricated & Modular Systems

Atkore Unistrut's rooftop systems are quick to install solutions for carrying a series of rooftop services, including mechanical & electrical containment and air handling units

The Atkore Unistrut range of products have been designed to offer an economical & time saving solution for mounting building services, such as pipe work, electrical containment, air conditioning & refrigeration equipment on flat roofs.

Key Features

- Available as base units & extension units
- Height adjustable from 300 to 405mm
- Fully load tested
- Designed to support all types of rooftop services, including air handling units
- Comes in kit form for easy shipping and storage
- Easy to follow assembly instructions included
- Extender frames add on to base frame offering design flexibility

Rooftop Support Modules

Rooftop Support

Key Features

Each Uniframe module has complete installation flexibility, able to accept any length of Unistrut channel, and with adjustable height legs, Uniframe is the perfect solution for all types of rooftop support projects.

Adjustable Height

Uniframe's adjustable foot pedestal allows for unit height to be increased or decreased by over 100mm to suit on site applications.

All in the box

Each component required to assemble a base or extension is supplied in the box, ready to install with all required accessories and components.

Channel you can trust

All products in the Uniframe range are assembled using Atkore Unistrut channel and supporting products, ensuring the highest quality throughout.

HD Beams

These allow load to be distributed evenly by being placed accurately, such as over existing obstacles. Each unit has adjustable height and comes complete with beam clamps.

DfMA

Design for Manufacture and Assembly

Atkore Unistrut & Marco are dedicated to delivering the correct solution for your project.

From single support frames to complete modular schemes, Atkore Unistrut & Marco's DfMA solutions are engineered and assessed for purpose, delivered in the highest quality product on time and to program.

DfMA can increase the quality compared to conventional methods through repeatability in production and quality control methods.

The biggest advantage is the reduction in installation time against program. Significant reduction in programme time required meets the rigorous demands of modern project timelines.

Finite Element Analysis

Atkore Unistrut & Marco's DfMA solutions all undergo Finite Element Analysis, this allows us, the manufacturer and you, the client to understand how the business' deliverable works in the real world.

DfMA has been undertaken by Atkore Unistrut & Marco in the most demanding of projects from major Infrastructure projects through Healthcare to Nuclear where long design life considerations are paramount.

Whilst modelling, constraint and loading on the the designs in an 'as built' or 'as installed' state, the business can eliminate points of failure and ensure that the design is not over engineered but engineered correctly to allow ease of installation and confidence that the solution works through the warranted period and beyond.

Unistrut3D Calculation Tool

Calculation Tool

The Atkore Unistrut Calculation Tool allows for design calculations aiding bracket design to support technical submissions.

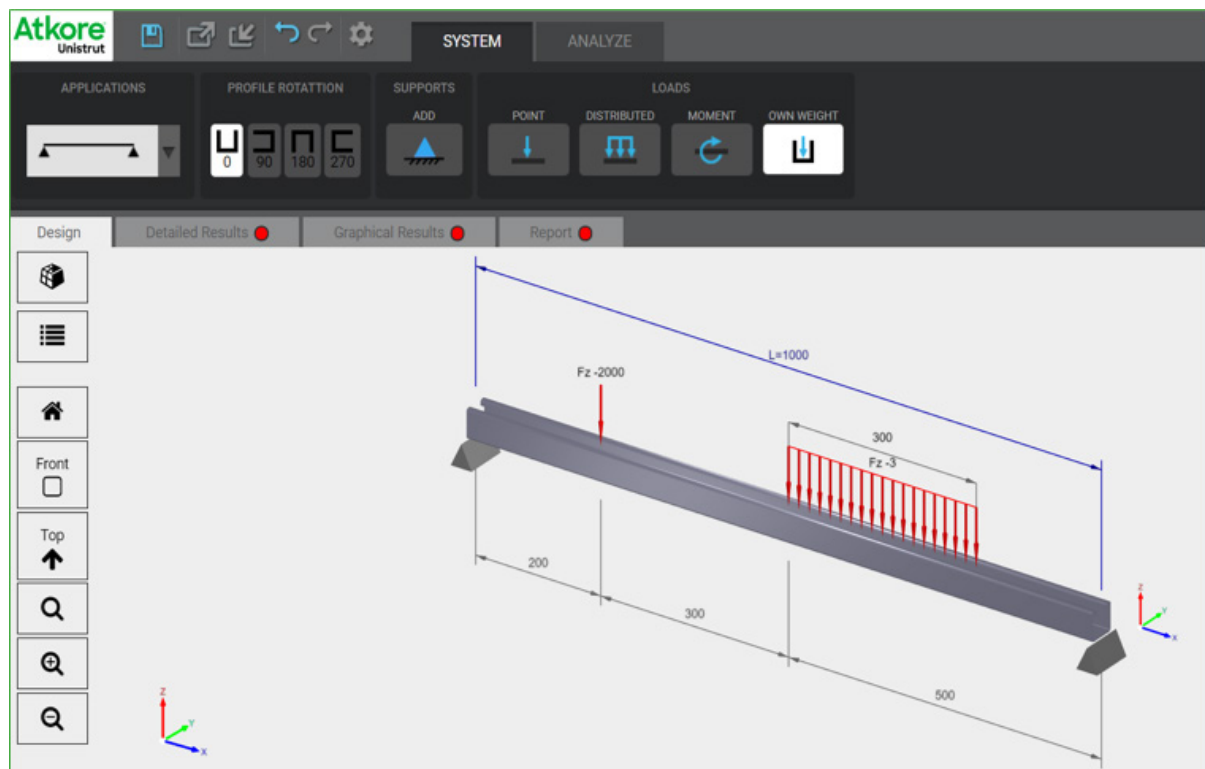

The tool analyses the performance of beams or cantilever brackets when a load is applied.

The calculation tool can calculate point, distributed, moment and omni directional loads to either euro code or other design characteristics.

A long form report, heat map and graphical reports can be produced and exported providing instant results.

ABOUT ATKORE MARCO

Established in 2003, Atkore Marco has a strong reputation within the mechanical and electrical installation sectors as a supplier of high quality, durable and aesthetically-pleasing products that are both adaptable and versatile.

Through the years, the business has invested continuously in its core product range and is now able to offer a one-stop cable management solution made up to suit various specifications with products that meet the needs of almost any contract.

Atkore Marco has remained committed to its customer-first ethos and upholds its core values. Bespoke and modular specifications are welcomed and a highly experienced and knowledgeable team are always on hand to support customers with any queries.

In a sector dominated by European and Asian competitors, working with a UK business offers that all-important contact and communication where relationships are built and a bond is forged. That's why Atkore Marco has grown to become a leading supplier in its field and continues to strengthen its presence.

Quality is imperative to Atkore Marco, and all products are manufactured in accordance with ISO9001 and 14001.

Part of the Atkore Family

Marco is part of the Atkore family, and operates in partnership with Unistrut. By combining both product ranges into a single offering, Atkore Unistrut & Marco can provide a true one-stop service for all cable management and mechanical support needs.

Standards

BS EN 61537:2007, BS EN 50085-1:2005+A1:2013, BS 6701:2016+A1:2017, BS 7671:2018, ISO 45001, EN1090 CE, EN1090 UKCA, E90, ISO 9001, ISO 14001, ISO 11901-1:2003, BS EN 61534, BS EN 50085-2, IEC 6244, BS EN 1403, BS 7371-3, BS 4662, BS 4678-41982. BS EN ISO 2081 and Cenelec (EN 50173 Part 1 / 2, EN 50174-2) ANSI/TIA 568B.

WORKING WITH ATKORE MARCO

Atkore Marco has developed a reputation for industry leading customer service and is always developing new ways to make the installation of products as efficient and cost effective as possible.

In 2014, Atkore Marco introduced the MCSSC Fast-Fix coupler to Steel Wire Cable Tray accessories. The MCSSC consolidated the Fast-Fix accessory range, and all products in this range are designed to ease installation and drastically reduce time spent installing lengths.

In 2017, Marco became part of Atkore, and operates along-side Atkore Unistrut. This partnership has allowed Atkore Marco to develop a stronger line of Pre Fabricated and Modular products, with pre-cut and assembled lengths of the trunking systems which are available in almost any size.

Atkore Unistrut & Marco are proud to have one of the industry's leading customer service teams, always on-hand to advise on project requirements, product information, stock availability, lead times and deliveries.

Atkore Marco also offer technical support and advice on all products, with teams ready to answer any technical questions regarding the product portfolio.

Quality, service and trust are integral to the Atkore Unistrut & Marco business, and these principle have helped the company develop.

BUILDING BETTER TOGETHER

Building Information Modeling

Atkore Marco is now able to offer its uPVC trunking and Steel Wire Cable Tray products as downloadable BIM object files.

Both the uPVC and Steel Wire Cable Tray are available in a single download, with all products included, finding and installing products into a REVIT model much easier.

BIM is an ever-growing initiative, backed by the UK government, to establish new standards within the UK's construction industries. The BIM process is intended to involve all parties during the design and management phases of a project, by enabling contractors and designers to list all objects required for the build in a digital model.

As manufacturers, Atkore Unistrut & Marco are always looking for ways to meet its customers' demands, and new initiatives will see BIM being used more and more as the UK Government moves to make it the standard practice for all their new builds.

All BIM files are available from the Atkore Marco website!

BIM
Downloads

Industry-leading products, Industry-leading customer service.

Atkore Marco is committed to providing an unparalleled customer service, with dedicated account managers, always on hand to answer any queries or questions. Atkore Unistrut & Marco's sales team is fully trained in all products and are able to offer guidance and advice to aid any query.

Work-flow and Commands

After the add-in has been installed, the REVIT ribbon bar will contain a Marco tab where Atkore Marco products can be selected.

Autodesk REVIT

BIM objects are designed for use with the Autodesk REVIT software.

Installation Guides

A how-to guide is included with all of our BIM downloads. Additionally if further support is required our staff are always on hand to help.

Quick & Easy Quotation

BIM downloads allow you to produce an automatic bill of quantities, ensuring an easier and quicker quote turnaround.

Instant Enquiries

Export objects direct to a predefined template, which open directly into Excel.

Project Specification

Full Project Support from Atkore Marco

Atkore Marco continues to consolidate the position as a top supplier of cable containment to a wide range of industries. Over the years the business has supplied its products to a number of jobs which has required strict specification guidelines to be met. Atkore Marco is proud to offer a versatile range of products which is not only capable of meeting one of the projects specifications, but in many cases, supply the entire project.

Many of Atkore Marco's products are designed to suit specification requirements, with additional features such as **Anti-Microbial** protection, **DDA compliance**, and **Pre-Cut Lengths** for projects with repeating specifications.

Education

Healthcare

Commercial

Notable Projects

Atkore Marco has supplied a number of notable projects all across the UK and Ireland, including:

Education

- Swansea University
- Port Glasgow Academy
- Furness Academy
- Digitech Studio School - Bristol
- Eden Boys School - Birmingham
- Statistics Building - Oxford
- Aberystwyth University
- Gloucester University

Healthcare

- South Glasgow Hospital
- Morriston Hospital - Swansea
- Dumfries Hospital
- Guy's & Thomas Hospital - London
- Alder Hey Hospital - Liverpool
- Ayrshire Hospital - Irvine
- Royal Liverpool
- Bristol Royal Infirmary

Commercial

- Glasgow Theatre
- Chester Zoo Islands exhibit
- Manchester City Training Ground
- Dyson HQ - Malmesbury
- Heathrow Terminal - London
- 'Walkie Talkie' Building - London
- 'The Shard' - London
- Olympic Village - London

Anti-Microbial Protection System

Atkore Marco's uPVC trunking systems are available with Atkore Marco's built-in hygieia protection.

Atkore Marco's Hygieia is a built in protective element, which is incorporated into the uPVC compound during manufacture. The Hygieia compound utilises a silver ion technology, providing anti-microbial protection throughout, creating a defence against 99.9% of harmful bacteria growth.

This protects against and prevents the growth of, bacteria, fungi, mildew and moulds, including:

- MRSA
- E-Coli
- Klebsiella Pneumoniae
- Streptococci

Due to the Hygieia element being incorporated into the PVC during manufacture, and therefore an integral part of the trunking, Atkore Marco can ensure there is no degradation of performance during use, even if the trunking becomes scratched or damaged, even years after initial installation.

All Hygieia products are tested in accordance with ISO22196:2011, which specifies the method of evaluating the antibacterial activity of treated plastic products and is in compliance with all relevant European regulations.

All Atkore Marco products supplied with Hygieia protection are packaged in a blue protective film, to protect and differentiate it from standard uPVC products.

Anti-Microbial

Apollo 3

Elite 3

Blue film for identifying product only, must be removed after installation

DDA & Part M Compliance

Building Regulation Support from Atkore Marco

All of the uPVC products are designed to be able to achieve full DDA compliance when required.

The Part M building regulations, 2000, amendment for the 'Access and use of Buildings' document outlines various regulations, including the Disability Discrimination Act of 2005, which is designed to assist those with visual impairments in public buildings.

Atkore Marco is able to supply DDA compliant uPVC trunking products, using contrasting lids and plates. The use of contrasting colours allows the visually impaired to differentiate between the trunking body, and the potentially hazardous electricity outlets.

- Trunking systems in three different colours, which can be mixed and matched to create full DDA compliance. Full DDA compliant specification can be supplied throughout the quoting process
- A range of DDA socket plates covering the socket boxes to create a coloured frame around the socket
- Trunking systems are available in White, Light grey and Charcoal, and DDA plates are available in Light Grey, Charcoal and Blue

DDA & Part M

Light Grey, Charcoal and Blue Socket plates provide DDA & PART-M compliance throughout.

The centre lids used on trunking are universal, and as a result, DDA compliance is attainable on all commercial trunking systems.

Pre Fabricated Cable Management Solutions

In an effort to expand and consolidate service delivery, Atkore Marco offer bespoke trunking solutions as part of the Pre Fabricated and Modular services.

A wide range of uPVC trunking products are available, in a number of sizes to suit any application. Each assembly is supplied as a complete unit, and feature all of the signature product benefits, including prepunched knockouts on the trunking base, and necessary cable segregation throughout.

Atkore Marco is always looking for new ways to make the products and services as fast and as cost effective as possible, and pre-assembled uPVC units are just one time saving solution the business have on offer.

Pre Fabricated uPVC units are the perfect solution for projects in a number of sectors.

Features:

Hygieia Protection

Pre-assembled units are also available with anti-microbial protection, helping defend against 99.9% of harmful bacteria.

Time Saver

Pre-assembled units are primarily designed to save time, cost and reduce excess waste. Each unit is supplied complete and ready to install.

Portable Modular Buildings

Pre-assembled uPVC units are also an ideal solution for housing power and data cables within modular buildings, allowing for flexibility in the buildings design.

Sustainability

Pre-assembly ensures that no product ends up as excess waste on site due to each length being supplied bespoke to the exact measurements and design required.

Sectors

Education & Healthcare Sector

Education

Education remains a mainstay of the Atkore Marco business, as government investment into new infrastructure and the refurbishment of existing education facilities continues.

Pre-assembled trunking systems are the perfect solution for projects all the way up the education sector, from new build modular classroom's up to University halls.

Healthcare

Atkore Marco offers quality products and bespoke solutions to the UK's health sector. The businesses Anti-Microbial products have been trusted to provide peace of mind on medical installations for over 10 years.

Pre Fabricated units are also a great solution for multiple specifications within the healthcare sector, these can include hospital wards to rooms in residential care homes.

Pre Fabricated Bench Trunking

Atkore Marco also supply Bench Trunking in Pre Fabricated units. These bespoke lengths can be manufactured to suit any installation requirement.

3 Compartment Trunking

175 x 60mm

Atkore Marco Elite 3 trunking system offers an innovative design solution for the growing data-cabling market. At 175 x 60mm, the symmetrical curved design allows for the installation of power and high-density structured cabling systems including CAT5E, CAT6, CAT6A and CAT7 solutions.

Elite Range

Key Features

3 Compartment

Elite 3 has been designed to comply with the latest structured cabling solutions on the market. Top and bottom compartments complement a larger centre compartment which can facilitate socket mounting accessories.

Hygiene Protection

Elite 3 is available with Atkore Marco's Hygieia anti-microbial protection. Defending against 99.9% of harmful bacteria.

175 x 60mm Profile

Elite 3's profile allows for ample data and power cabling to be supplied. The curved design prevents dust trapping and provides a more aesthetically pleasing finish.

DDA & Part M

Elite 3 is also able to comply to both DDA and Part M specifications, using either contrasting centre lids or coloured socket plates.

CAT6, CAT6A & CAT7

Elite 3 meets the latest structured cabling solutions by offering a 50mm bend radius on all Elite accessories.

BIM Download

Elite 3 BIM objects are available as part of the uPVC BIM download on the website.

Elite systems meet and exceed the requirements for BS 6701:2016+A1:2017, BS 4678 Pt 4, BS 7671, ISO 11901-1:2003 and Cenelec (EN 50173 Part 1 / 2, EN 50174-2) standards.

Elite 3

3 Compartment Trunking

Elite 3

Elite 3 is designed to suit all types of installation environments. It is made from the highest quality uPVC compound, providing its signature pure white finish. At 175 x 60mm Elite 3 is able to accommodate CAT6 and CAT6A cables, making it a perfect fit for any modern installation.

Elite 3 is available in three colours, pure white, light grey and charcoal.

CODE	DESCRIPTION	LENGTH	PACK QTY
ME3	Elite 3 - Pure White	3m	2 x 3m
ME3LG	Elite 3 - Light Grey	3m	2 x 3m
ME3CH	Elite 3 - Charcoal	3m	2 x 3m

Elite 3 - DDA

Elite trunking is also able to accommodate DDA Part M requirements, via the use of a light grey or charcoal centre lid.

CODE	DESCRIPTION	LENGTH	PACK QTY
ME3LGL	Elite 3 - Pure White with Light Grey Lid	3m	2 x 3m
ME3CHL	Elite 3 - Pure White with Charcoal Lid	3m	2 x 3m

Elite 3 - Hygieia

Elite 3 is available with Hygieia, offering anti-microbial protection against 99.9% of harmful bacteria. The anti-microbial compound forms an integral part of the trunking, meaning there is no loss of performance if the trunking becomes scratched or damaged. All of Elite's additional components are also available with anti-microbial protection.

Elite Hygieia is supplied with a protective blue film for extra protection during transit and installation.

CODE	DESCRIPTION	LENGTH	PACK QTY
ME3AM	Elite 3 - Pure White with Anti-Microbial	3m	2 x 3m
ME3AMLGL	Elite 3 - Light Grey Lid with Anti-Microbial	3m	2 x 3m
ME3AMCHL	Elite 3 - Charcoal Lid Anti-Microbial	3m	2 x 3m

Minimum order quantities apply to Charcoal Anti-Microbial

Illustration purposes only, protective blue film to be removed during installation.

3 Compartment Trunking

Flat Angle

Product Information	
Code	ME3F
Dimensions (mm)	254 x 254 x 62
Pack Qty	1

Available Colours ☐ ☐ ☐

Two-piece moulded flat angle with built in data guides retaining CAT6, CAT6A and CAT7 compliance. Flat overlaps trunking lids, with no needs for joint covers.

Flat Tee

Product Information	
Code	ME3T
Dimensions (mm)	326 x 253 x 62
Pack Qty	1

Available Colours ☐ ☐ ☐

Moulded flat tee with two sets of data guides to maintain 50mm bend radius for CAT6, CAT6A and CAT7 compliance. Tee overlaps trunking lids, with no need for joint covers.

Internal Angle

Product Information	
Code	ME3I
Dimensions (mm)	179.5 x 134 x 134*
Pack Qty	1

Available Colours ☐ ☐ ☐

Moulded internal angle with an adjustable design allowing for a variance of +/- 5° accommodating walls without true 90° bend. Angles have 50mm bend radius to comply with CAT6, CAT6A & CAT7.

* Indicates Height and Width before movement

External Angle

Product Information	
Code	ME3E
Dimensions (mm)	179.5 x 104.5 x 104.5*
Pack Qty	1

Available Colours ☐ ☐ ☐

Moulded external angle with an adjustable design, allowing for a variance of +/- 5° accommodating walls without a true 90° bend. Angles have 50mm bend radius to comply with CAT6, CAT6A & CAT7.

* Indicates Height and Width before movement

Internal Angle - Fixed 45°

Product Information	
Code	ME3I-135
Pack Qty	1

Available Colours ☐ ☐ ☐

Pre Fabricated fixed internal angle for Elite 3, designed for use on walls with a 45° in-facing bend. Supplied as individual units and requires 2 joint covers.

Additional joint covers (ME3J x 2) required when fitting.

External Angle - Fixed 45°

Product Information	
Code	ME3E-135
Pack Qty	1

Available Colours ☐ ☐ ☐

Pre Fabricated fixed external angle for Elite 3, designed for use on walls with a 45° out-facing bend. Supplied as individual units and requires 2 joint covers.

Additional joint covers (ME3J x 2) required when fitting.

Available Colours:

☐ Standard White ☐ Light Grey. Add LG to product code ☐ Charcoal. Add CH to product code

Elite 3 Accessories

3 Compartment Trunking

End Covers

Product Information	
Code	ME3C
Dimensions (mm)	176.5 x 62 x 12
Pack Qty	2

Available Colours ☐ ☐ ☐

Curved end covers matching trunking profile, supplied in packs of two.

Joint Covers

Product Information	
Code	ME3J
Width (mm)	179.5 x 62 x 33
Pack Qty	5

Available Colours ☐ ☐ ☐

Joint covers with easy clip-in mechanism for faster fitting. Supplied in packs of five.

External Angle Screening Divider

Product Information	
Code	ME3SDE
Pack Qty	1

Clip in screening divider for Elite 3 external angles. Meets BS EN 50174-2 for power and data separation.

Steel Strip Screening Divider

Product Information	
Code	ME3SD
Pack Qty	4 x 1.5m

Slide-in screening divider for Elite 3. Meets BS EN 50174-2 for power and data separation. Divider has same prepunched knockouts as internal walls. Supplied in 1.5m.

Take-Off Adapter

Product Information	
Code	ME3TOA
Dimensions (mm)	92 x 62 x 61
Pack Qty	1

Available Colours ☐ ☐ ☐

Take off adaptor for Atkore Marco Mini trunking. Supports 16 x 16mm, 16 x 25mm, and 25 x 38mm sizes. Can also accept 20 & 25mm PVC conduit.

Elite 3 Universal Accessories

3 Compartment Trunking

Accessory Spacer

Product Information	
Code	MTLS
Dimensions (mm)	87 x 60
Pack Qty	10

Available Colours ☐ ☒ ☐

Single unit accessory spacer. Fits on to centre compartment using the same quick snap-on system as centre lid.

RCD/MCB DIN Rail Housing Kit

Product Information	
Code	ME3RCDH
Pack Qty	1

Includes: Hinged Cover, Mounting Frame and Mounting Bracket. Locking mechanism also available.

Manufactured from the same high quality materials as Elite 3, Elite Compact offers all the same benefits and features of Elite 3, condensed into a smaller 145 x 50mm profile. Elite Compact is designed to carry large numbers of power and data cables, with a smaller profile which can be installed in locations where space is limited or when a smaller form-factor is desired. Elite Compact is able to support structured cabling systems including CAT5E, CAT6, CAT6A and CAT7 solutions.

Key Features

3 Compartment

Elite Compact is a 3 compartment system, designed to provide the maximum in carrying capacity, whilst retaining a smaller aesthetic.

Hygieia Protection

Elite Compact is available with Hygieia anti-microbial protection, keeping the spread of bacteria in all environments to a minimum.

145 x 50mm Profile

Despite its small size, Elite Compact's design allows it to house a large number of cables in both its top and bottom compartments, as well as having a full sized centre compartment to house accessories.

DDA & Part M

Elite Compact is available with DDA and Part M specifications, including contrasting centre lid and a range of coloured accessory plates.

CAT6 & CAT7 Compliance

Elite Compact meets the latest structured cabling solutions by offering required bend radius on all fittings and accessories.

BIM Download

Elite Compact BIM objects are available as part of the uPVC BIM download on the website.

Elite systems meet and exceed the requirements for BS 6701:2016+A1:2017, BS 4678 Pt 4, BS 7671, ISO 11901-1:2003 and Cenelec (EN 50173 Part 1 / 2, EN 50174-2) standards.

Elite Compact

3 Compartment Trunking

The smallest in Elite range, Compact offers all the benefits of larger Elite products, packed into its 145 x 50mm profile. Manufactured from the same high quality uPVC compound, Elite Compact has the same signature pure white finish as other trunking.

Elite Compact's design makes it perfect for housing structured cabling and comes CAT6 & CAT6A compliant as standard. Elite Compact is available in three colours, Pure White, Light Grey and Charcoal.

CODE	DESCRIPTION	LENGTH	PACK QTY

Data Trunking

With its 200 x 63mm profile, Elite 60 is the largest trunking available in the Elite range.

Able to accommodate a large amount of CAT5E and CAT6/CAT6A cables, Elite 60 has been designed from the ground up to serve as a perfect fit for installations which require a high capacity containment solution. Elite 60 can support structured cabling systems up to CAT7.

Elite Range

Key Features

200 x 63mm Profile

The largest trunking in the Elite range, Elite 60 is able to carry more CAT6 cables than any other trunking. Designed for installations where there is a heavy reliance on power and data cabling.

DDA & Part M

Elite 60 is able to become completely DDA compliant, using contrasting centre lid or coloured socket plates.

2 Compartment

2 Compartment as standard, Elite 60 can be sub-divided into a total of 4 compartments for complex wiring systems.

BIM Download

Elite 60 BIM objects are available as part of the uPVC BIM download on the website.

CAT6, CAT6A & CAT7

All of the Elite range have been designed to accommodate CAT6 & CAT7, none more-so than Elite 60, which has two large capacity compartments as well as a removable top lid.

Elite systems meet and exceed the requirements for BS 6701:2016+A1:2017, BS 4678 Pt 4, BS 7671, ISO 11901-1:2003 and Cenelec (EN 50173 Part 1 / 2, EN 50174-2) standards.

Elite 60

Data Trunking

Elite 60

Elite 60 is the largest capacity trunking in the Elite range, allowing for a greater number of cables to be installed.

Elite 60 comes with a unique top opening lid, allowing cables to be installed easily and speedily. Should additional cable segregation be required, further capacity can be achieved through the use of clip-in dividers, able to take the trunking up to 4 compartments if required.

CODE	DESCRIPTION	LENGTH	PACK QTY
MT60	Elite 60 - Pure White	3M	2 x 3M

Elite 60 - DDA

DDA compliance is attainable using Elite 60 in conjunction with contrasting centre lids or through the use of our coloured socket plates. Elite 60's high capacity and DDA compliance make it a perfect fit for schools or public buildings.

3 Compartment Trunking

Apollo trunking is the most versatile and adaptable trunking system in the range. Apollo is designed to suit any application, coming in three profiles, it is able to match the aesthetic requirements of any project. Apollo is supplied as a CAT5E compliant system as standard, and can be altered to meet CAT6 through the use of clip-in data guides.

MTD3

Chamfered

MTDQ3

Square

MTS3

Skirting

Key Features

Multi-Profile

Apollo's 3 profiles make it the most adaptable trunking system, accommodating any installation environment.

Hygieia Protection

Apollo 3 is available with Marco's Hygieia anti-microbial protection. Defending against 99.9% of harmful bacteria.

170 x 50mm Profile

Apollo's large profile, and three compartments are ideal for carrying a large number of cables, and its centre compartment can house multiple accessories.

DDA & Part M

Apollo 3 is also able to comply with both DDA and Part M specifications, using either our contrasting centre lids or coloured socket plates.

BIM Download

Apollo is available in Atkore Marco's BIM object pack, available on the website.

Apollo trunking systems conform to the following standards: BS4678 Part 4, BSEN50173 Part 1/2, BS EN 50174-2:2018, BS7671, BS 6701:2016+A1:2017, ISO IEC 11801

Apollo

3 Compartment Trunking

Apollo trunking is available in three different profiles. Available in Dado, Skirting and Square profiles Apollo's interchangeable lids are designed to accommodate installation requirements whilst retaining an aesthetically pleasing design.

Accessories - Chamfer

Chamfered Top & Bottom Lids

Flat Angle - Chamfer

Product Information	
Code	MTDF3
Dimensions (mm)	235 x 235 x 40
Pack Qty	1

Available Colours ☐ ☐ ☐

Chamfered profile Pre Fabricated mitred flat angle with chamfered top and bottom lids. Flat angle can be installed in either direction and is supplied as a single unit. Data guides can be added to meet CAT6. Additional joint covers (MTDJ3 x 2) required when fitting.

Flat Tee - Chamfer

Product Information	
Code	MTDT3
Dimensions (mm)	300 x 240 x 50
Pack Qty	1

Available Colours ☐ ☐ ☐

Chamfered profile Pre Fabricated mitred flat tee with chamfered top and bottom lids. Tee can be installed in either direction and top and bottom lids complement the profile of the trunking. Data guides can be added to meet CAT6. Additional joint covers (MTDJ3 x 3) required when fitting.

Internal Angle - Chamfer

Product Information	
Code	MTDI3
Dimensions (mm)	175 x 77 x 77
Pack Qty	1

Available Colours ☐ ☐ ☐

Moulded single unit chamfered profile internal angle. Clips over trunking. Varying degree angles also available.

External Angle - Chamfer

Product Information	
Code	MTDE3
Dimensions (mm)	175 x 74 x 74
Pack Qty	1

Available Colours ☐ ☐ ☐

Moulded single unit chamfered profile external angle. Clips over trunking. Varying degree angles also available.

End Cover - Chamfer

Product Information	
Code	MTDC3
Dimensions (mm)	175 x 51.5 x 12
Pack Qty	2

Available Colours ☐ ☐ ☐

Moulded end caps, supplied in pairs matching trunking profile.

Joint Cover - Chamfer

Product Information	
Code	MTDJ3
Width (mm)	175 x 51.5 x 33
Pack Qty	5

Available Colours ☐ ☐ ☐

Moulded joint covers with an easy clip-in mechanism for faster installation. Supplied in packs of five.

Available Colours:

Standard White

Light Grey. Add LG to product code

Light Grey Lid. Add LGL to product code

Charcoal. Add CH to product code

Charcoal Lid. Add CHL to product code

Accessories - Square

Square Top & Bottom Lids

Flat Angle - Square

Product Information	
Code	MTDQF3
Dimensions (mm)	235 x 235 x 50
Pack Qty	1

Available Colours ☐ ☐ ☐

Pre Fabricated mitred joint flat angles with square top and bottom lids. Flat angle can be installed in either direction and is supplied as a single unit. Data guides can be added to meet CAT6. Additional joint covers (MTDQJ3 x 2) required when fitting.

Flat Tee - Square

Product Information	
Code	MTDQT3
Dimensions (mm)	300 x 240 x 50
Pack Qty	1

Available Colours ☐ ☐ ☐

Pre Fabricated mitred joint flat tee with square top and bottom lids. Tee can be installed in either direction and top and bottom lids complement the flush finish of the trunking. Data guides can be added to meet CAT6. Additional joint covers (MTDQJ3 x 3) required when fitting.

Internal Angle - Square

Product Information	
Code	MTDQI3
Dimensions (mm)	175 x 77 x 77
Pack Qty	1

Available Colours ☐ ☐ ☐

Moulded single unit internal angle cover. Clips over and sits above trunking. Varying degree angles also available.

External Angle - Square

Product Information	
Code	MTDQE3
Dimensions (mm)	175 x 77 x 77
Pack Qty	1

Available Colours ☐ ☐ ☐

Moulded single unit external angle. Clips over and sits above trunking. Supplied as single units. Varying degree angles also available.

End Cover - Square

Product Information	
Code	MTDQC3
Dimensions (mm)	175 x 51.5 x 12
Pack Qty	2

Available Colours ☐ ☐ ☐

Moulded end caps, supplied in pairs matching trunking profile.

Joint Cover - Square

Product Information	
Code	MTDQJ3
Width (mm)	175 x 77 x 77
Pack Qty	5

Available Colours ☐ ☐ ☐

Moulded joint covers with an easy clip in mechanism for faster installation. Supplied in packs of five.

Apollo Univeral Accessories

3 Compartment Trunking

Cable Retainer

Product Information	
Code	MTCR
Pack Qty	20

Clip-in cable retainer. Designed to offer additional stability when holding cables in place through the trunking.

Accessory Spacer

Product Information	
Code	MTLS
Dimensions (mm)	87 x 60
Pack Qty	10

Available Colours ☐ ☐ ☐

Single unit accessory spacer. Fits on to centre compartment using the same quick snap-on system as centre lid.

RCD/MCB DIN Rail Housing Kit

Product Information	
Code	MTRCDH
Pack Qty	1

Includes: hinged cover, mounting frame and mounting bracket. Locking mechanism available.

Data Guides

Product Information	
Code	Add Suffix DG to angle codes
Pack Qty	1

Data guides, designed to enable CAT6 compliance throughout Apollo trunking accessories by maintaining necessary bend radius.

Steel Strip Screening Divider

Product Information	
Code	MTAS
Pack Qty	4 x 1.5M

Slide-in screening divider for Apollo. Meets BSEN50174-2 for power and data separation. Supplied in 1.5m lengths.

uPVC Universal Divider Strip

Product Information	
Code	MTD105
Pack Qty	16 x 1.5m

Slide in uPVC divider for trunking products. Supplied in 1.5m lengths.

Security fittings are available for many of our uPVC accessories.

Apollo 4 Compartment

257 x 50mm

4 Compartment Trunking

Apollo 4

Apollo Trunking can also be modified to become a four compartment trunking, with a profile of 257 x 50mm, through the addition of the MT4KI extension kit.

Lengths are supplied as the standard MTD3 system, with the additional extension kit included. Apollo 4 compartment benefits from having two large centre compartments, both able to accommodate socket boxes and accessories.

** Joint covers required when fitting

Juno trunking is a single compartment uPVC dado system, which can be subdivided with a dividing strip for power, data and telecommunication cables. The position of the divider fixing points allow for two, three or four compartments to be made depending on installation needs.

Atkore Marco also offer Juno as individual pre-assembled units, ideal for student accommodation, and other installations with repeating specifications.

Key Features

1, 2, 3 or 4 Compartment

Juno trunking is unique in its ability to be divided into a multiple compartment solution whilst keeping its compact profile.

DDA & Part M

DDA compliance is attainable using contrasting centre lids or socket plates. Juno is available with light grey or charcoal variations to its standard pure white centre lid.

100 x 50mm Profile

Juno's smaller profile makes it perfect for installations with small distribution requirements, especially where space is limited.

BIM Download

Juno forms part of the BIM downloads, an integral part of the Marco uPVC range, the entire Juno product family is available.

Hygieia Protection

Juno is available with Hygieia protection. The anti-microbial element forms an integral part of the trunking meaning there is no loss of performance if the trunking is damaged.

Atkore Marco offer pre-assembled Juno units, ideal for student accommodation, as well as other repetitive installations!

Juno

Single Compartment Trunking

Juno is a single compartment trunking with the ability to be sub-divided up to three times, enabling it to form up to four compartments.

Juno is ideal for smaller installations where cable segregation is key. Its compact design makes it perfect for domestic and commercial use, and has seen use in projects with repeating units such as student accommodation and offices.

Full Charcoal and Light grey lengths are manufactured to order and minimum quantities apply.

CODE	DESCRIPTION	LENGTH	PACK QTY
MT105	Juno - Pure White	3m	2 x 3m
MT105CH	Juno - Charcoal	3m	2 x 3m

Juno - DDA

Juno is also able to accommodate DDA compliance using contrasting centre lid. Juno can also accept DDA socket plates giving the required level of contrast around socket outlets.

CODE	DESCRIPTION	LENGTH	PACK QTY
MT105LGL	Juno - Pure White with Light Grey Lid	3m	2 x 3m
MT105CHL	Juno - Pure White with Charcoal Lid	3m	2 x 3m

Juno - Hygieia

Juno is also available with Hygieia protection. Anti-Microbial compound is added during the manufacturing process, forming an integral part of the trunking resulting in a consistent performance even if the trunking is scuffed or damaged.

Centre lid is supplied in a protective blue film for extra protection during installation.

Juno Hygieia is manufactured to order, minimum quantities apply.

CODE	DESCRIPTION	LENGTH	PACK QTY
MT105AM	Juno - Pure White with Anti-Microbial	3m	2 x 3m
MT105AMLGL	Juno - Light Grey with Anti-Microbial	3m	2 x 3m
MT105AMCHL	Juno - Charcoal with Anti-Microbial	3m	2 x 3m

Minimum order quantities apply to Charcoal Anti-Microbial.

Illustration purposes only, protective blue film to be removed during installation.

Maxi Trunking

Single Compartment Trunking

50x50, 75x75 & 100x100

Maxi trunking range is the perfect solution for a number of cable management project installations, including domestic and commercial installs. Atkore Marco's Maxi trunking is supplied in three standard sizes, 50mm, 75mm & 100mm, and are all available with a range of accessories and fittings.

Supplied with a unique **secure-lock lid**, Maxi trunking is able to offer a tamper proof solution, keeping cables protected in all environments. Maxi Trunking is supplied in 3 metre lengths as standard.

Maxi Range

Key Features

3 Sizes Available

Maxi trunking is available in three profiles, with sizes available to suit any project installation.

Full Range of Fittings

Maxi trunking is available with a full range of supporting accessories and fittings, including moulded and fabricated accessories.

Secure-Lock Lid

Maxi's secure-lock lid provides a robust solution which ensures that both the trunking exterior aesthetics are preserved, and interior cables are protected from tapering.

Maxi Trunking

Maxi Trunking is available in three sizes, able to suit any installation. Maxi trunking is supplied in 3 metre lengths, in a pure white finish.

Standard and Self-Adhesive Trunking System

Atkore Marco's uPVC mini trunking allows for both power and data cabling to be installed within commercial or domestic buildings, making the products ideal for new build and refurbishments.

As with its sister products, Mini trunking has been designed with a clean, pure white, modern aesthetic that incorporates a high impact resistant uPVC compound, giving the product a durable yet versatile finish.

Mini trunking is available with a **self-adhesive** back, for even faster and easier installation.

Mini Range

Key Features

4 Sizes Available

Mini trunking is available in four sizes, making it suitable for a number of installation requirements.

Full Range of Fittings

Each size of Atkore Marco's Mini trunking comes with a full range of fittings and accessories.

Self Adhesive

Mini trunking is available with a self adhesive base, allowing for quick installation without compromising performance.

BIM Download

Mini forms part of the Atkore Marco BIM downloads, an integral part of the Marco uPVC range, the entire Mini product family is available.

Secure-Lock Lid

Mini's snap on lid allows for quick installation of power and data cabling, with secure fit to ensure cabling is kept inside.

Mini trunking systems conform to the following standards: BS4678 Part 4, BS7671, BS 6701:2016+A1:2017, ANSI/TIA 568B, ISO IEC 11801

Mini Trunking

Standard and Self-Adhesive Trunking System

Mini

Available in four sizes, Mini trunking is designed for electrical contractors and data installers allowing the lid to be removed and snapped on with ease, making the product ideal for moves, adds and changes (MAC) installations. The trunking is available with a full range of fittings and accessories.

Specification for Atkore Marco's Hygieia uPVC

Product

Antimicrobial uPVC

Product Description

Atkore Marco's anti microbial compound utilises silver ion technology, to create a defence against 99.9% of harmful bacteria growth. The antimicrobial compound is incorporated into the uPVC, and is therefore an integral part of the trunking. This results in no degradation of performance, if the surface becomes scratched or damaged as there is protection throughout the system

Illustration purposes only, protective blue film to be removed during installation.

Applicable Standards

ISO22196 (Measurement of antibacterial activity on plastic)

Test Results

Quantitative Assessment of Activity - ISO22196:2011 - MRSA:

Concentration of starting inoculum: 3.20x10⁵ CFU/mL

Sample Description	Number of Bacteria Recovered	Log Value	R = [log(B/C)]	% Survival
White PVC - untreated control	4.57x10 ⁶	6.7	-	-
White Rigid PVC - Treated with Ag ion additive	<5.00x10 ¹	<1.7	>5.0	<0.1

Quantitative Assessment of Activity - ISO22196:2011 - Klebisella Pneumonia:

Concentration of starting inoculum: 2.36x10⁵ CFU/mLmL

Sample Description	Number of Bacteria Recovered	Log Value	R = [log(B/C)]	% Survival
White PVC - untreated control	1.76x10 ⁶	6.3	-	-
White Rigid PVC - Treated with Ag ion additive	<5.00x10 ¹	<1.7	<4.4	<0.1

Socket Boxes

Specification for Atkore Marco's uPVC Socket Boxes

Product

uPVC socket boxes

Product Description

Socket boxes are designed to house a number of accessories and are available in a number of sizes.

The following table is a guide to be used when installing boxes in Atkore Marco products.

Specification for Elite3 uPVC

Product

ME3

Product Description

Elite 3 - 3 Compartment Perimeter Trunking

Product Dimensions

175 x 60mm Profile

3 Metre Length

Applicable Standards:

BS 6701:2016+A1:2017 (Telecommunications equipment and cabling)
ISO/IEC 11801 (ED2.0 Amd 2) (Generic cabling for customers premises)
Cenlec (BSEN50173 Part 1/2, BSEN50174-2) (Generic cabling and installation)
BS4678 Pt 4 (Cable Trunking)
BS7671 (IEE Regulations) (Wiring Regulations)

Product Specification

Description: 3 Compartment Perimeter Trunking
Material Compliance: ROHS & WEEE Compliant
Manufactured: Extruded from Pellets

Material Specification: (if applicable)

Description: A Calcium/Zinc stabilised, medium/high impact uPVC

PROPERTY	Standard	UNITS	VALUE
Specific Gravity	BS2782 620A	g/cc	1.50
Vicat Softening Point	BS2782 (B50) 1990 120B	°C	78
Tensile Strength @ Yield	BS2782 320A-F	MPa	40

The above are typical test results and do not constitute any part of a specification

Colours:

ME3 - Pure White
ME3LG - Light Grey
ME3CH - Charcoal
ME3LGL - Light grey centre lid
ME3CHL - Charcoal centre lid

Additional Finishes:

ME3AM - Anti-Microbial

Base:

Pre Punched for wall mounting 200mm intervals

Walls:

Pre-Punched for wiring at 150mm intervals

Screening:

ME3SD - Slide in steel screening dividers top and bottom
ME3SDE - External angle screening divider

Lids:

ME3AL - Elite 3 Top & bottom Curved Lid
MT3CL - Marco Universal Centre Lid

Bench Trunking Units	271
Bench Trunking Specification	272

Aluminium Bench Trunking

Desktop Cable Management

Bench Trunking is manufactured from satin anodised aluminium and is fitted with a **white uPVC centre lid**. Available in both anodised aluminium and white powder-coated finishes, Atkore Marco's Bench Trunking systems are the perfect solution for environments where a robust solution is required.

Bench Trunking is available as **Individual Lengths**, **Back-to-Back** lengths and as a variety of **Pre-Assembled Units**, ideal for island workstations or modular builds.

A full range of moulded and fabricated fittings is available, and both 35 and 25mm back boxes can be installed at any point along the system. Optional 2-metre clip-in dividers (MTD1052) are available for segregation of power and data cabling.

MTBT

Bench Trunking

MTBT-BB

Back-to-Back Lengths

MTBU

Bench Units

Key Features

DDA & Part M

Bench Trunking is also able to accommodate contrasting centre lids and socket plates, perfect for use in schools and labs.

100 x 100mm Profile

Designed for capacity, Bench Trunking has a large main compartment which can be split in to multiple compartments if required.

Strong & Secure

The aluminium body used for Atkore Marco's Bench Trunking keeps the product sturdy and strong. Perfect for installations where heavy use is expected.

2 Colours Available

MTBT Bench Trunking system is available in Silver and White. Silver systems have a brushed aluminium finish, white systems have a powder coated finish.

Bench systems meet and exceed the requirements for BS 4678, BS 7671, BS 6701, ISO/IEC 1181 (ED2.0 Amd 2), and Cenlec (BS EN 50173 Part 1/2, BS EN 50174-2) standards.

Aluminium Bench Trunking

Desktop Cable Management

Bench Trunking

Available in both anodised aluminium and white powder coated finishes making it a suitable choice for a number of environments.

Bench Trunking is suitable for desk, bench or worktop applications, and can also be installed on the underside of shelving if required.

Bench Trunking can accept 25mm and 35mm socket boxes and has a range of complementing accessories to suit.

Bench Trunking is available with DDA compliant Light Grey or Charcoal Centre Lid.

CODE	DESCRIPTION	LENGTH	PACK QTY
MTBT	Bench Trunking - Aluminium Body, uPVC Lid	2m	1 x 2m
MTBTW	Bench Trunking - White Powder Coated Body, uPVC Lid	2m	1 x 2m

Back To Back Bench Trunking

Bench Trunking is available in back-to-back lengths, perfect for long runs of facing tables in environments such as classrooms or labs. The back-to-back design allows for socket boxes to be installed on either side of the trunking without compromising stability or functionality.

Bench Trunking is available with DDA compliant Light Grey or Charcoal Centre Lid.

Aluminium Power Poles & Posts

Power & Data distribution for open
plan spaces

POWER POLES & POSTS CONTENTS

Contents	Page Number
About Power Poles & Posts	276
Standard Range	277
Accessories	278
Power Poles & Posts Specification	280

Power Poles and posts are a perfect solution for projects requiring power and data distribution to island workstations or in the middle of open-plan spaces.

The systems benefit from strong aluminium profiles, designed to retain their rigidity in all installation environments.

Both the pole and post can achieve DDA compliance using contrasting centre lids.

Each system is ready to install out of the box and comes pre-packed with all necessary accessories and fittings.

Power Poles are available in Silver, and White finishes. All poles are supplied with white uPVC fittings.

Key Features

Strong & Secure

The system benefits from a strong aluminium core profile, keeping it rigid and secure in all types of installation.*

DDA & Part M

Poles & Posts are also able to accommodate contrasting centre lids, perfect for use in schools and labs.

Ready, straight from the box

Each of the poles and posts are supplied with all necessary accessories straight out of the box. This includes 6 x 1-Gang 35mm accessory boxes and 6 metres of dividing strip.

2 Colours Available

Power Poles & Posts are available in Silver and White. Silver systems have a brushed aluminium finish, white systems have a powder coated finish.

*Extra jacking mechanism required when cutting pole down to size.

Power Poles & Posts

Aluminium Cable Management Solutions

Silver & White Power Poles

Manufactured from aluminium for extra rigidity and strength, Power Poles are designed to carry power and data cabling from floors or ceilings.

Available in standard silver brushed aluminium or white powder coated finishes, Power Poles are able to accommodate any installation.

Power Poles are also available in 5 metres, and standard 3.6 metre poles can be extended using the 1 metre extension kit (MTP1E1/MTP1E1W).

CODE	DESCRIPTION	PACK QTY
MTP1	Power Pole, Silver Aluminium Body, uPVC Lids	1 x 3.6m
MTP1-5	Power Pole, Silver Aluminium Body, uPVC Lids, 5 Metre	1 x 5m
MTP1W	Power Pole, White Powder-Coated Body, uPVC Lids	1 x 3.6m
MTP1W-5	Power Pole, White Powder-Coated Body, uPVC Lids, 5 Metre	1 x 5m

Each pole is supplied with the following:

- 6 x 35mm 1-Gang Socket Boxes.
- 6 x Metres of Divider.
- 10 x MTLS Accessory Spacers.
- 1 x Jacking Mechanism.
- 1 x Floor Boot.
- 1 x Ceiling Shroud.

Silver & White Power Posts

Power posts offer all the same cable management services as the Power Poles, in a smaller, desk height.

Posts are designed to carry cabling from underfloor systems to allow for power and data access in open plan spaces, specifically those which require under-desk access.

1 Metre power posts are also available.

CODE	DESCRIPTION	PACK QTY
MTPP1	Power Post, Silver Aluminium Body, uPVC Lids	1 x 650mm
MTPP1-1000	Power Post, Silver Aluminium Body, uPVC Lids, 1 Metre	1 x 1m

Installation Instructions

Please ensure that all current IIE Wiring Regulations are complied with during the installation of this Power Pole.

It is important that the installer familiarises himself with all the parts of this Power Pole as shown in the diagram. Any shortages must be reported to Atkore Marco as soon as possible

Installation of a Power Pole in conjunction with a suspended ceiling

1. If the suspended ceiling is already in place, remove sufficient ceiling tiles to allow access to position the Power Pole.

2. The Power Pole must be positioned so that the force of the jacking screw is taken by a concrete ceiling..

3. Having decided the position for the installation of the Power Pole, measure the floor to concrete ceiling height accurately. Remove the Power Pole from the packaging taking care not to mark the anodised finish. Remove all parts from the Power Pole and replacing them in the box.

Deduct 60mm from the overall height and cut the Power Pole to length using a fine blade hacksaw. It is important that the Power Pole be cut square so care should be taken to achieve this. De-bur all cut edges.

4. Secure floor mount (item C) to the floor using the correct type of fastening system for the floor type. If the Power Pole is to be fed from under floor services, drill access holes as required through the base of the floor mount floor and floor.

5. Position the jacking mechanism (item D) in the centre hole of the Power Pole and set the height from the ceiling plate to the Power Pole body to 35mm. This is achieved by turning the M12 nut upwards until the correct distance is reached.

6. Position the Power Pole into the floor mount and adjust the jacking mechanism upwards until the Power Pole is secure. Check that the Power Pole is vertical in both planes using a spirit level.

7. Mark through the position of the two securing holes on the ceiling plate and then lower the jacking mechanism. Remove the Power Pole from the floor mount. Remove the ceiling plate from the jacking mechanism and then secure the ceiling plate to the ceiling using the correct fastening system for the ceiling type.

8. Ensure that the jacking mechanism screw is located in the end of the Power Pole.

Re-locate the Power Pole in the floor mount and then turn the M12 nut on the jacking mechanism screw clockwise, locating the end of the screw into the ceiling plate. Replace the M6x30 securing bolt and secure using M6 nut. Turn the M12 nut clockwise until the Power Pole is secure and any movement is eliminated. Tighten the M6x15 pan head screw located in the jacking mechanism screw. This will lock the whole assembly in position.

9. It is important to connect the earth wire from the incoming mains to the earth post located on the jacking mechanism using the terminal connector and M6 nut supplied for this purpose. Check that all earth connections are secure and that continuity is maintained between the Power Pole and jacking mechanism.

10. Position socket boxes (item B) as required. Use the accessory spacers provided to position the socket boxes evenly. Use the divider (item G) if any segregation of any services to outlets is required.

11. All wiring can now be located in readiness for connecting accessories.

12. The outer lids (item F) can now be cut to size. Starting at the base of the Power Pole, secure the lid between socket boxes stopping 95mm short from the top of the suspended ceiling. Replace the ceiling tiles cutting neatly around the Power Pole body.

13. The ceiling shroud (item E) can now be clipped into position. The ceiling shroud should be located tight against the ceiling tiles.

14. Any accessories can now be installed to the socket boxes. Again, it is very Important to check that all earthing connections are secure and that continuity exists.

Power Pole & Post

Specification for Power Pole & Post

Installation of a Power Pole between a standard floor and ceiling

1. The Power Pole must be positioned so that the force of the jacking screw is taken by either a roof joist or a concrete ceiling.
2. Follow the same procedure as described previously for the installation of the floor mount, Power Pole, jacking mechanism and socket boxes.
3. The outer lids (item F) can now be cut to size. Starting at the base of the Power Pole, secure the lid between socket boxes stopping 35mm short from the top of the Power Pole body.
4. The ceiling shroud (item E) can now be clipped into position. The ceiling shroud should be located tight against the ceiling using the double sided sticky tape provided.

Steel Wire Cable Tray Systems

Atkore Marco is the largest UK manufacturer of Steel Wire Cable Tray.

Available in Electro-Zinc, Pre-Galvanised, Powder-Coated and Hot-dip Galvanised finishes. Atkore Marco is able to supply Steel Wire Cable Tray to meet any project demand, including special manufactures of alternate grid layouts, pre-cut lengths and much more.

Offered in three standard depths, 30mm, 55mm and 106mm, Steel Wire Cable Tray is adaptable and lightweight, enabling users to easily modify the tray on-site without compromising its strength or performance.

Atkore Marco's Steel Wire Cable Tray is complemented by a large range of accessories and fittings, all designed to join and support the tray, reducing installation time and reducing overall on-site costs.

All Steel Wire Cable Tray is manufactured in our state-of-the-art, custom-built facility in the UK.

Product Family

Steel Wire Cable Tray Systems

Atkore Marco is able to offer a comprehensive range of Steel Wire Cable Tray products, including a wide range of accessories and our new, pre-coupled, Quik-Clik Tray. For specialist projects, Atkore Marco is able to supply pre-cut lengths to suit installation requirements.

The entire Steel Wire Cable Tray range is available in the BIM download, found on the Atkore Marco website.

Steel Wire Cable Tray

EZ HDG PC PG ZA

Made from direct drawn bright mild steel, and ideal for a variety of applications. Steel Wire Cable Tray is manufactured to the highest standards and utilises a 100 x 50mm grid design structure. Each length is produced in 3 metres, and is available in a large variety of sizes.

Quik-Clik System

EZ

The latest innovation in the Steel Wire Cable Tray range is the new Quik-Clik system. Enabling two lengths to be coupled in under two seconds, the new system comes with two pre-installed joining couplers for faster on-site installation. Another benefit to the Quik-Clik tray is the ability to remove and re-attach its couplers, allowing for modifications and size change to be easily made to the tray, without losing any of its installation benefits.

G-Shape Steel Wire Cable Tray

EZ

G-Shape tray has been designed as a containment solution for under-desk installations, or above suspended ceilings for service containments in small voids. The shape of the tray allows for both wall and ceiling mounting, and negates the need for suspension brackets, having the ability to be directly fixed to solid surfaces.

Fast-Fix Accessories

PG EZ GT TB

Steel Wire Cable Tray range is further enhanced by a large range of accessories and fittings, all designed to allow for quick and convenient on-site installation. In-particular, Fast Fix line of accessories have been designed for quicker installation, with a drastically reduced need for additional components such as nut & bolt or the need for heavy electrical or mechanical tools.

PG Pre-Galvanised

HDG Hot-Dip Galvanised

GT Geomet

ZA Zinc Aluminium
See page 9 for more information

EZ Electro Zinc

PC Powder Coated

TB Turned Brass

Atkore Marco's Steel Wire Cable Tray is made from direct-drawn bright mild steel, and uses a 100 x 50mm mesh grid.

Each tray is produced in 3 metre lengths and supplied in pack quantities.

The range is complemented by a wide variety of fittings and accessories, all designed to make modifying and installing the tray on site as easy as possible.

Finishes

EZ

Electro Zinc

BS EN ISO 2081:2008

Recommended for use in interior installations where the atmosphere is non-corrosive. EZ Steel Wire Cable Tray is coated with a thickness of between 5-12 microns.

HDG

Hot-Dip Galvanised

ISO 1461:2009

Recommended for exterior use and in more aggressive atmospheres. HG tray is coated to a minimum thickness of 55 microns. Hot-Dip Galv tray is special item and manufactured to order.

PG

Pre-Galvanised

BS EN 10244-2

Recommended for use in data centres and other interior applications. Marco PG Steel Wire Cable Tray is coated with a thickness of approximately 20 microns (135 gr/m² - class B). Pre-Galvanised tray is special item and manufactured to order.

PC

Powder Coated

BS EN 13438

Powder-Coated is recommended for exterior and interior use in a range of atmospheric environments and is capable of withstanding a variety of corrosive conditions. Its installation is also suggested for data centres. Powder Coated tray is special item and manufactured to order.

Steel Wire Cable tray conforms to the following standards: BS EN 61537, IEC 61537.

Quik-Clik System

Steel Wire Cable Tray Systems

Saving You Time, Saving You Money

In an effort to save the contractor time and money, Atkore Marco has developed the Quik-Clik system of cable trays.

2 Second Rapid Install

The innovative coupler can join two lengths of Steel Wire Cable Tray in seconds! Its flexible design allows it to be removed and re-attached with ease, retaining its functionality even after trays have been cut-to-size on site. Supplied pre-fixed as standard, the MCFJC range is also available as individual accessories as part of the Atkore Marco Fast-Fix range.

G-Shape Steel Wire Cable Tray

Steel Wire Cable Tray Systems

G-Shape Steel Wire Cable Tray

Available in four widths, Atkore Marco's G-Shape tray is designed for under desk and under shelf applications. The tray is also perfect for use above suspended ceilings, its low profile making it great for service containments in small voids.

The shape of the tray allows for both wall and ceiling mounting, negating the need for suspension brackets by being directly fixed to a solid surface using the MCCL, or MCCL25.

The tray can easily be installed and modified on site by one person, fabricating bends using the same accessories used for conventional tray.

Atkore Marco Steel Wire Cable tray conforms to the following standards: BS EN 61537:2007, IEC 61537.

Steel Wire Cable Tray Systems

Atkore Marco has further enhanced its reputation by the continued growth in innovative products and supporting accessories.

The Steel Wire Cable Tray accessories have been further expanded to include a new range of fast-fix designs, which help to reduce installation times on-site. This allows Atkore Marco to offer a full range of accessories for every Steel Wire Cable Tray installation requirement.

Steel Wire Cable Tray accessories now include the fast fix side couplers (MCSSC & MCSSCL), which enable two lengths of tray to be coupled together and secured in seconds, reducing installation times and meeting and exceeding earth continuity requirements to standard EN 61537.

The innovative design allows the Fast-Fix side coupler to be installed from within the Steel Wire Cable Tray, allowing for ease of installation within confined areas.

One of the latest additions to Atkore Marco's Steel Wire Cable Tray accessories is the Pre-Galvanised Hook Coupler (MCHC-S). Designed for use on Pre-Galvanised trays, most popular in Data Centre installations where the possibility of zinc whiskers needs to be reduced, the coupler clips on in seconds and forms a strong and sturdy connection between trays.

System Overview

System Overview

Steel Wire
Cable Tray

Steel Wire Cable Tray conforms to the following standards: BS EN 61537:2007, IEC 61537.

Steel Wire Cable Tray Systems

Introduction

Available in Electro-Zinc, Pre-Galvanised, Powder-Coated, Hot-Dip Galvanised, Steel Wire Cable Tray is offered in three depths - 30mm, 55mm and 106mm. A wide range of fittings is available to join and support the Steel Wire Cable Tray.

The following section is intended to be used as a guide to fabricating Steel Wire Cable Tray fittings on site. A wide range of fittings and accessories are available to join the tray.

Reducers

MC55300 and MC55100

Example of MC55300 - MC55200
MCCA x 3 or MCCB x 2 plus MCSP x 50mm

Wire Cutting Directions

Incorrect

Correct

Typical Fabricated Reducer Components

CODE	COMPONENT	QTY
MCCA		x2
MCCA		x2
MCSP		x1

All bends are easily fabricated on-site!

Suspension brackets can be used effectively only up to a certain weight. For larger Steel Wire Cable Tray, support channels are recommended.

** Due to a central wire running down the length of the tray, central suspension brackets would need to be staggered.

Product Description

Fast Joining Coupler Small, Medium, Large

Product Dimensions

S - 115 x 20 x 1.2mm

M - 116.5 x 18.5 x 1.2mm

L - 117 x 18.5 x 1.2mm

MCFJC30 - 115 x 30 x 1.2mm

MCFJC30-M - 116.50 x 28.5 x 1.2mm

Utilisation

Pre-attached to lengths of Steel Wire Cable Tray.

Couples two lengths of tray quickly and securely.

Applicable Standards:

BS EN 61537 (Cable tray systems)

BS EN ISO 2081 (Metallic and other inorganic coatings)

Product Specification:

Manufactured: Power-pressed from stripped steel

Material Specification: (if applicable)

65Mn sprung steel

Steel Wire
Cable Tray

C	S	Si	Mn	P	Cr	Ni	Cu
0.65%	0.018%	0.25%	1.13%	0.021%	0.22%	0.19%	0.17%

Yield Strength	785 MPa
Tensile Strength	981 MPa
Elongation	21%

The above are typical test results and do not constitute any part of a specification

Finishes

EZ - Electro Zinc, suitable for use with Electro-Zinc trays

MCFJC30-M

Separation between telecoms cabling

BS 50174-2 - Separation between Power & Information Technology Cables

In installations where the horizontal wire cable tray length is less than 35m no separation is required, in case of screened cabling. For lengths greater than 35m, the separation distances apply to the full length excluding the final 15m attached to the outlet.

Please see table below:

	Distance A		
	Without divider or non metallic divider	Aluminium Divider	Steel Divider
Unscreened power and data cable	200mm	100mm	50mm
Unscreened power cable and screened IT cable	50mm	20mm	5mm
Screened power cable and unscreened IT cable	30mm	20mm	2mm
Screened power cable and screened IT cable	0mm	0mm	0mm

Wall installation

Floor or ceiling installation

Raised floor or ceiling installation

Note - All cables should be fixed. For cables with fixing, minimum distance is the distance that is the worst situation between fixing points. Without fixing, 0mm distance shall be taken into consideration.

Example of power cable and information technology cables that run parallel without divider.

Underfloor system

Wall mounted system

Nominal OD:	4.9mm	Max: 4.9mm Min: 4.88mm	Real OD: 4.89mm

Product Testing Methods

Installation Test Area

Atkore Marco has created an installation test area at our factory premises, where all uPVC trunking and fittings can be installed and tested in a realistic setting.

Atkore Marco has a spectrophotometer to carry out in-house colour testing, external fire testing (Warrington Fire Testing), in-house quality/testing procedures and supplier test measurements for the uPVC compound Marco purchases.

Thermal Expansion uPVC

It is recommended not to run the installation at high temperatures for long periods of time. The table below shows the various temperatures for the different uPVC trunking stages:

TEMPERATURE RANGE °C	MIN	MAX
STORAGE	-5	+50
INSTALLATION	-5	+50
OPERATING	-5	+50

Water Absorption uPVC

Negligible.

Testing Facility

Atkore Marco has further demonstrated its commitment to producing the highest quality products on the market by investing in a high-tech suite of specialist test equipment.

To date, Atkore Marco is the only UK manufacturer of Steel Wire Cable Tray to own such high specification in-house testing equipment, which will ensure all products are fully compliant with IEC61537 and related standards. Atkore Marco is now able to regularly carry out full deflection tests on all products, and is testing alternative configurations with a view to developing the next generation of trays for the UK and European Markets.

Testing

Product Testing Methods

Safe Working Load

Steel Wire Cable Trays are tested across two spans and a cantilever.

The deflection is measured on the central span using three sensors placed on the sides and at the centre to the tray. The test method conforms to the BSEN 61537 standard.

Note: The maximum deflection of 1/100 is always reached for a lesser load than that of the safety load. (The breaking point divided by a safety co-efficient of 1.7). CEI/61537

Recommended Support Spacing

There is an optimum configuration to obtain 2 metre spans without the couplings being positioned at the supports or in the middle of the spans.

To obtain this result, the first span is deliberately limited to 1.5 metres, then the supports are placed approximately every 2 metres. The coupling points are therefore always 0.5 metres from a support.

Product Testing Methods

Permissible Load

Permissible loads are tested for a maximum deflection of 1/100th of the span, with a coupling positioned at 1/5th of the span from the support.

The coefficient applied to the load for coupling in the middle of the span - 0.7.

Permissible load for maximum sag = $L/100$ on the intermediate span, coupling at 1/5th of the span.

MC30

MC106600	106 x 600

Testing

Product Testing Methods

Supports

The brackets are characterised by their permissible loads (in Kg).

The hangers are characterised by their permissible torques (in Kg.m). All supports are tested and conform with the standard BSEN61537.

The safe working load (SWL) as defined by the standard is the lowest value of either:

The load creating a deflection of $L/20$ at the end
The breaking load divided by 1.7, if the deflection at $L/20$ is not reached

Electro-Magnetic Compatibility

Atkore Marco engage the services of York EMC, part of The University of York, to investigate shielding effectiveness of Marco Steel Wire Cable Tray.

Steel Wire Cable Tray is found to outperform the 200mm spacing configuration required by BSEN50174-2 proven by the independently commissioned EMC tests.

This indicates that Atkore Marco's Steel Wire Cable Tray can offer a more efficient and compact installation (rather than relying on spacing).

Product Testing Methods

Electrical Continuity

Atkore Marco engage the services of York EMC, part of The University of York to measure the resistance of Steel Wire Cable Tray and an MCQC.

The resistance tests are in comparison with requirements EN537:2007 clause 11.1, electrical continuity [1].

An electrical current is passed through the system in order to measure the resistance of the coupler. The lower the resistance, the better the electrical continuity.

The maximum Steel Wire Cable Tray impedance per metre is set at $5\text{m}\Omega$, while the value recorded using Atkore Marco's Steel Wire Cable Tray is $1.3\text{m}\Omega$, over 3 times more effective than the requirement specified.

Under the requirements of the standard, couplers must have a maximum resistance of $50\text{m}\Omega$. On average, Atkore Marco couplers are found to have a resistance of $0.44\text{m}\Omega$, over 100 times more effective than the specified requirement.

The Steel Wire Cable Tray and coupler exceed the requirements of the BS EN 61537:2007 standard for the electrical continuity clause 11.1.

Short Circuit Testing

Atkore Marco has carried out short circuit tests at an independent laboratory in Europe in order to prove that our Steel Wire Cable Tray is designed and manufactured with sufficient strength to withstand a short circuit fault.

Steel Wire Cable Tray is tested in accordance with the standard that governs the manufacture of cable cleats, IEC 6914:2009 (Cable Cleats for Electrical Installations) in order to prove that the system can be used for installations where there is a fault requirement.

During the test, two lengths of MC106450 (106mm high x 450mm wide) Steel Wire Cable Tray are supported and attached at intervals of 1.5 metres to three pieces of strut supports. The Steel Wire Cable Trays were coupled together at 1/5th of the span (300mm from the support) using four MCQC (Atkore Marco quick coupler), on the walls and base of the tray. The cables used to carry the current for the short circuit are placed in a trefoil installation using Ellis Patent's 'stainless steel' Vulcan + cleats positioned at intervals of 500mm along the length of the tray.

Testing in accordance with the standard IEC 61914:2009 clause 6.4.3, a current of 106KA is again passed through the same test object, with an inspection once more confirming that there had been no damage to the system.

The tests confirm that Steel Wire Cable Tray is produced with enough strength and quality to withstand short circuits, enabling the system to be specified on a wide range of electrical installations.

Testing

Product Testing Methods

Fast-Fix Strut Clip (MCFUSC)

The quick fit strut clip (MCFUSC) is ideal for a wide range of installations, including modular builds, as it is able to be fitted prior to transit, without the need of additional securing clips.

In order to prove that the MCFUSC can be used in even the most complex of installations, Atkore Marco undertake bespoke testing to the conditions of British Standard BSEN61537.

To determine a safe working load for the MCFUSC, a test is devised by fitting a length of MC55200EZ (55 x 200mm) Steel Wire Cable Tray to a piece of Unistrut channel, attached using two MCFUSC clips.

The machine is then set to pull away from the centre position up to a maximum force of 80Kg, until either the Steel Wire Cable Tray deflected 5mm in height, or the MCFUSC failed.

The Steel Wire Cable Tray reaches the desired deflection of 5mm with the MCFUSC holding securely in place.

Atkore Marco can therefore prove that the MCFUSC has a safe working load of 80Kg.

Environmental

All products are produced to all applicable environmental standards. No compounds used contain any substances classified as health hazards according to EEC directive 1999/45/EC and the UK CHIP Statutory Instrument 2002 to 1689.

100% of all possible recycled uPVC material is re-used in the manufacture of Atkore Marco trunking systems. Recycled material is only used in the manufacture of our uPVC trunking bases, in order to allow the visible elements and accessories to retain their pure white finish. In order to maintain the highest quality possible and keep tolerances above the required level, the ratio of regrind to virgin material does not exceed a predetermined percentage.

All Atkore Marco Steel Wire Cable Trays are manufactured from a steel wire rod comprising 100% recycled material. 100% of the minimal amount of scrap Steel Wire Cable Tray produced is sold locally for reprocessing. Atkore Marco Steel Wire Cable Tray production is UK based, reducing both its 'product-miles' and carbon footprint to a minimum and setting it apart from its main competitors.

Atkore Marco recognises that it can extend its sustainability policy beyond its own business and encourage customers to return old products for recycling and reprocessing into good production.

All products are RoHS compliant and meet REACh credentials and the company is supporting their customers towards achieving a high BREEAM rating or other accreditations.

PROJECT

Longdean School

SECTOR

Education

PRODUCTS

uPVC Trunking
Power Poles

Atkore Marco's presence within the UK education sector continues to grow from strength to strength, the firm's Elite 3 uPVC trunking being utilised at Interserve's pioneering PF2 scheme.

The £150 million HLR Schools project involves the demolition and new build of seven secondary schools in the South East of England.

Developed under a challenging time frame, a uniformed and standardised approach across all seven sites was critical. Atkore Marco's Elite 3 trunking formed part of the specification applied across all projects in line with the wider approach.

Enabling works began in March 2015. Developed in phases concurrently, the new builds were constructed on existing playing fields and car parks. Upon completion the old buildings have been demolished and the sites made good for recreational use.

Stuart Langridge (Associate Director) for Interserve Engineering Services explained: "We recognise the synergy between Atkore Marco's Elite trunking and the education market and appreciated their experience within this sector, as well as the many benefits that the product presented.

"As with all of our specifications, careful consideration was given to quality. Future-proofing was another major factor, and how this could be managed, so the Elite trunking was a perfect fit for the Cat6 structured cabling solution. The Education Funding Agency approved use of the Elite products during the design and planning phase, this was pre-agreed far in advance of installation work.

"In terms of volume, we have ordered vast quantities of Elite trunking across all seven sites. Our team were impressed with ease of installation and the modern bright white and curved aesthetics of Elite (with grey plates for DDA compliance), which sit really well within this type of environment."

PROJECT

South Glasgow
General Hospital

SECTOR

Health

PRODUCTS

uPVC Trunking
Hygieia Anti-Microbial

Atkore Marco has made its final delivery to contractors on site at Glasgow General, the largest single NHS hospital ever built in Scotland.

Mercury Engineering managed the entire construction programme at the hospital, one of the most advanced medical facilities in the world, which includes a 14 storey adult hospital and a 5 storey children's hospital. The facility also has 20 modern operating theatres and is home to major specialised services for renal medicine, transplantation and vascular surgery.

Due to the complex nature of this project, Marco supplied its trunking system pre-fabricated to suit Mercury Engineering's exact requirements, and the Hygieia specification was utilised across the vast hospital site.

Gavin Hanlon, Electrical Manager at Mercury Engineering said: "Mercury learned about the Hygieia product from previous Marco case studies and their success on other large healthcare projects.

The Hygieia specification is a perfect fit in environments where the spread of bacterial growth must be controlled, which was a key factor to Mercury when considering the hygiene requirements of a modern day hospital.

Mercury is very happy with the products that Marco supply. Not only are the products of good quality, but Marco themselves as an organisation are very good with communication and delivery of products."

Atkore Marco utilises silver ion technology within its Hygieia specification to create a defence against 99.9% of harmful bacteria growth. This provides built-in protection from, and prevents the growth of, bacteria including MRSA, E-Coli, Salmonella, Klebsiella Pneumoniae and Streptococci; along with fungi, mildew and mould.

The antimicrobial compound is incorporated into the uPVC, and is therefore an integral part of the Trunking. As a result, there is no degradation of performance if the surface becomes scratched or damaged.

All antimicrobial products are tested in accordance with ISO22196:2011, which specifies the method of evaluating the antibacterial activity of treated uPVC products and is in compliance with all relevant European regulations.
