

NICOR® DQR4MA-SELECT

MULTI-ADJUSTABLE LED DOWNLIGHT

FEATURES & BENEFITS

1. Visual Aesthetic & Application

The DQR4MA-Select's matte white finish and low-profile design suit a variety of spaces. Its polystyrene diffuser provides smooth, uniform lighting without glare, compatible with most 4" recessed housings.

2. Performance

DQR4MA-Select offers five CCT options (2700K, 3000K, 3500K, 4000K, 5000K) with a high 90+ CRI for flexible, quality lighting. It ensures consistent color accuracy in spaces where visual detail is essential.

3. ROI (Return on Investment)

With a rated life over 50,000 hours (L70) and ENERGY STAR certification, the DQR4MA-Select supports lower maintenance and energy costs over time, making it an efficient choice for long-term installations.

4. Environmental

The DQR4MA-Select is RoHS-compliant, cULus-listed for damp locations, and free from hazardous materials, meeting eco-friendly and safety standards for versatile applications.

5. Installation

The fixture installs quickly with a friction clip system and integrated driver for shallow housings. Ships with a Medium/E26 socket string and an optional GU24 socket string, making it adaptable for most setups.

6. Control

Smooth dimming down to below 10% with TRIAC and ELV dimmers provides flexible brightness control, while a top-mounted CCT switch allows easy color temperature selection.
