

NICOR[®] PRMC-WL

FEATURES & BENEFITS

1. Design & Application

The compact PrimeChime Plus 2 Mini[®] fits standard junction boxes and features a sleek, paintable faceplate. It combines line and low voltage wiring in one unit and works with many popular video doorbells. You can also daisy-chain up to 10 units for full home coverage.

2. Selectable Volume & Melody

With five chime melodies, adjustable volume, and voice-guided setup, this system offers clear, customizable sound. Separate tones for front and back doors help you instantly know which entry needs attention.

3. Wireless Technology

A built-in transformer and digital control board ensure reliable performance, powering up to two video doorbells. The wireless button has a strong 120ft range, and the system is surge-protection ready for added durability.

4. Video Doorbell Compatible

The PrimeChime Plus 2 Mini[®] works seamlessly with today's most popular video doorbells, combining line and low voltage in one compact unit. It's a simple, modern solution that supports both wired and wireless doorbell options for added convenience and security throughout your home.

5. Environment Friendly

Efficient design means fewer materials, less energy use, and less waste. Its field paintable faceplate encourages reuse, and the wireless button eliminates the need for extra wiring during installation.

6. Installation Versatility

Fits standard single-gang boxes and supports both wired and wireless setups. The wireless button adds flexibility for remote entry points, and you can link up to 10 chimes across 400 feet.

7. Flexible Control

Choose from multiple melodies and volume levels to suit your space. Voice-guided setup and a movable wireless button make it easy to customize alerts and expand coverage wherever needed.
