

# UWL

NICOR®

## 360° WORK LIGHT

# FEATURES & BENEFITS

### 1. Visual Aesthetic & Application

The UWL's 360° light pattern with additional up/down light arrays ensures broad coverage and visibility, ideal for job sites or large network areas. Its bright orange driver housing and white safety cage improve visibility and safety.

### 2. Performance

High-performing LEDs with an 80+ CRI offer reliable, clear 5000K light for accurate color representation. The UWL is designed to withstand demanding environments, operating efficiently in temperatures from -40°F to 113°F.

### 3. ROI (Return on Investment)

Rated for over 50,000 hours (L70) with a durable build, this fixture reduces the need for frequent replacements, while the 100%/50%/OFF switch adds flexibility and energy savings.

### 4. Environmental

The UWL is RoHS-compliant and cULus-listed for damp locations, meeting safety standards with minimal environmental impact.

### 5. Installation

Equipped with a folding hook and carabiner, it's easy to hang and reposition as needed. The fixture is linkable up to 800W total and can be mounted on floor stands or tripods for added flexibility.

### 6. Controls

A built-in switch on the housing allows simple brightness adjustment (100%, 50% or off) for adaptable lighting output depending on the task.
