QEP® GPTP™ Carrying System is part of the Gauged Porcelain Tile Panel Solutions Product Series. The system is versatile and lightweight with six high quality suction cups for easy transporting of large format tile. Each suction cup can be operated manually and with a battery. All electric pumps come with a lithium ion battery and include a USB charging cord. The system features four soft grip ergonomic handles on the top and four extension handles on the side allowing for comfortable and secure portability. Includes 1 carry bag for easy transporting.
