

# TAR3 SELECT

NICOR®

## FEATURES & BENEFITS

### 1. Visual Aesthetic & Application

Clean, modern architectural design with a precision-engineered PMMA diffuser for smooth, glare-free illumination - ideal for offices, schools, healthcare, and retail environments.

### 2. Performance

Selectable wattage and five CCT options (3000K–6500K) provide on-site flexibility, while high efficiency, long 54,000+ hour lifespan, low THD, and high power factor ensure consistent, energy-saving performance.

### 3. Control

Advanced luminaire-level lighting control features a sensor-ready design that supports occupancy and daylight harvesting, BLE mesh capability, full 0–10V dim-to-off control, and seamless configuration through the NICOR NLC app for scalable, intelligent lighting management.

### 4. Installation

Designed for fast, retrofit-friendly installation, the four-rail system allows for quick single-person setup and a seamless fit in standard grid ceilings, while the integral driver and included seismic wire support safe, efficient upgrades.

### 5. Certifications

Commercial-grade and rebate ready, this fixture is cULus damp-location listed, DLC 6.0 Premium qualified for maximum rebate eligibility, RoHS and FCC Part 15 compliant, and LM-79/LM-80 tested for verified performance.

### 5. Warranty

Backed by a 5-year limited system warranty, this fixture delivers dependable, long-term performance for commercial retrofit applications.
