NOTES

- To ensure proper operation of the PRCP2, no more than one video doorbells should be attached *(Front Door or Back Door)*
- Have account user name and password and wifi password on hand during setup.
- Make sure the battery doorbell is fully charged prior to installation. Low battery levels may cause abnormal performance
- Ring Video Doorbell Plus Wired 2nd Gen and Video Doorbell Pro 3rd Gen, can turn off the chime by turning off the mini chime kit in the app
- "Power" or "Diode" kits do not need to be installed, The NICOR chimes are designed to provide the proper voltage for compatible video doorbells
- For best compatability with chimes, set chime type in app to mechanical chime

1) Sync doorbell and chime before installation of the PRCP2.
2) Have battery fully charged before installation
3) Must use the NICOR ecobee adapter - PRCP2EBADAPT1WH
4) Adjust the "Ring tone length" in the App to 2 seconds to avoid multiple chime cycles (see Ring instructions for details).
5) Must use the NICOR Ring adapter - PRCHIMEADAPT1WH
