

# NICOR<sup>®</sup> DCR-SELECT

CCT & WATTAGE SELECTABLE

## FEATURES & BENEFITS

### 1. Visual Aesthetic & Application

The DCR-Select's available sizes (4", 5", and 6") and matte white finish provide a sleek, modern look that blends seamlessly with various architectural styles and applications, enhancing both new construction and retrofit projects.

### 2. Performance

With over 90 lumens per watt (LPW), a CRI of 90+, and an R9 value greater than 70, the DCR-Select delivers bright, vibrant illumination with exceptional color accuracy, improving visibility and enhancing the visual quality of any space.

### 3. ROI (Return on Investment)

The DCR-Select's long LED lifespan (L70(9k)>50,000 hours) and a 5-year limited warranty minimize maintenance and replacement costs, ensuring long-term savings and reliability.

### 4. Efficiency

Being ENERGYSTAR listed and CA Title 24 compliant (JA8), the DCR-Select provides high energy efficiency, which reduces energy consumption and lowers utility bills while supporting environmental sustainability.

### 5. Installation

The quick-connect adapter and user-friendly mounting options (V-springs for 5"/6" and friction fit arms for 4") make installation fast and straightforward, accommodating both professional and DIY installation scenarios.

### 6. Flexible Control

The DCR-Select's dimmable feature (down to 10% with TRIAC or ELV dimmers) and selectable color temperature (2700K-5000K) offer customizable lighting solutions, allowing for tailored ambiance and functionality to suit various needs and preferences.
