

TGLS4

NICOR®

FEATURES & BENEFITS

1. Visual Aesthetic & Application

The TGL4's sleek aluminum frame and powder-coated finish enhance any space. Its sealed design prevents dust buildup, keeping it clean. A precision diffuser provides even, glare-free lighting. Multiple color temperature options allow customization for different environments.

2. Performance

Bright and energy-efficient, the TGL4 reduces electricity costs. Its optics ensure uniform lighting without shadows. With a 54,000-hour lifespan, it requires minimal maintenance. Built-in surge protection enhances durability. An 80 CRI rating provides accurate color rendering for clear visibility.

3. Control

Users can adjust brightness and color temperature easily. Smooth dimming to off is supported with 0-10V dimming. Its high power factor and low harmonic distortion ensure stable performance.

4. Installation

Designed for quick installation with multiple mounting options. Integral grid tie clips meet seismic safety standards. An optional battery backup keeps lights on during power outages. Additional surge protection is recommended for extra safety.

5. Certifications

Certified for safety, efficiency, and durability. cULus listed for damp locations and IC-rated for insulation contact. RoHS compliant and DLC 5.1 certified for energy savings and rebate eligibility. Meets FCC standards for low electrical interference.

5. Warranty

A 5-year limited warranty ensures long-term reliability. High-quality components offer lasting performance. Built-in surge protection enhances durability, though overvoltage damage isn't covered.
