GIMBAL LED RECESSED DOWNLIGHT

DGD-Select

Gimbal Recessed LED Downlight

The DGD LED Downlight Gimbal Series offers a line of gimbal downlights that simplifies installing tailored lighting in challenging locations. The high performing light engine with off-board driver allows for more flexible installations and increased lifetime with improved thermal management. The DGD fixture uses a plenum-rated cable connector to link the downlight module to the remote driver box and then pops into place with its adjustable, spring-loaded retention tabs for a secure fit, eliminating the need for a J-box or recessed housing. Adding directional lighting for architectural accent in areas such as living rooms, hallways, stairways and corridors is now easier than ever.
