FIRMWARE RELEASE NOTES

PowerZone® Connect PRO - 2026.32.0 - September 2026

New Features:

Venue Control passcode reset

- Added support for Venue Control app passcode reset.

Improvements:

Improved system performance and network reliability

- Improved overall system performance, stability, and network reliability.
- Improved wall controller discovery and connectivity.

Updated speaker preset library

- Updated the embedded Sonance PRO speaker preset library to version 20260819.1.
 - Includes corrections for certain Lo-Z speaker presets that did not operate correctly in the previous library.

Bugfixes:

Improved network stability for larger installations

- Resolved a network stability issue that could cause PowerZone Connect PRO amplifiers to become intermittently unreachable on larger network installations.
- Additional minor bug fixes and performance optimizations.

Compatibility:

Wall controller firmware compatibility

- Connected Wall-M controllers should be updated to firmware 2026.32.0 for compatibility and optimal performance.

FIRMWARE RELEASE NOTES

PowerZone® Connect PRO - 2026.18.1 - June 2026

New Features:

Initial PowerZone Connect PRO firmware release

- Initial firmware release for Sonance PowerZone Connect PRO amplifiers, based on the PowerZone Connect 2026.18.1 firmware platform.

Sonance branding

- Added dedicated firmware branding for Sonance PowerZone Connect PRO products.

Default Hi-Z 70V configuration

- PowerZone Connect PRO amplifiers default to Hi-Z 70V output mode with the high-pass filter frequency set to 20 Hz.

Compatibility:

PowerZone platform compatibility

- PowerZone Control Center supports both PowerZone Connect and PowerZone Connect PRO amplifiers.
- Compatible wall controllers and speaker presets can be used across supported PowerZone products.
