

# Expanded Capabilities.

## Same Trusted Quality.

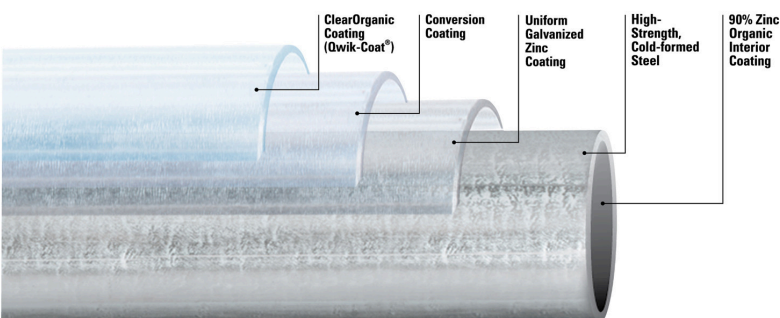

We're the same company who invented the process of galvanizing steel tubing directly in-line over 75 years ago and we continue to invest in America's future with our newest and most advanced tube mill located in northwest Indiana.

Our new product offering of large diameter shapes and sizes continues to enhance our broad portfolio of solutions for a multitude of applications.

### Key Differentiators:

- In-line galvanizing process provides advanced levels of corrosion protection
- New size range up to 8.750" OD round
- Square tube sizes from 4.000" to 7.000"
- Complex size range of rectangle and oval tube, as well as other assorted shapes
- Gauge range from 7 to 14-gauge (including 3/16" wall structural)
- Mill lengths available up to a 53-foot maximum
- Clean precision saw cut tube ends with no end deformation
- Various low carbon, high strength, HSLA, & UHSS grades & gauges available
- Other value add & tube fabrication capabilities available including laser cutting, bending, swaging, piercing, welding, etc.
