

# H12V2REMOTE

Remote Control for H12V2 Sensors

Project

Catalog

Type

Date

## Product Description

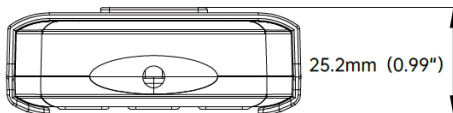

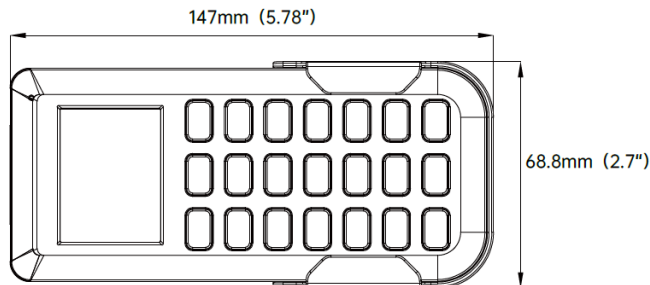

The H12V2REMOTE is used to change the settings on the H12V2 series of sensors (PIR and Microwave). Universal for any number of sensors, the remote allows for setting changes without having to access the rotary switches on the sensor as well as offering additional options vs. rotary switch setting alone.

### Construction

- White plastic housing
- Lighted LCD screen to show sensor settings
- Requires two AAA batteries

### Compatibility

- Compatible with the NICOR H12V2 series of sensors
- Remote range of up to 50ft (15m)
- Control angle of 30° max
