10-218F

10-221

10-920-6

PRECISE

Fine point and concave shape makes precise cuts easier with more visibility to the cut line than standard utility blades

Maximize your utility knife performance with the ROBERTS Hawk Utility Blade. This blade is constructed of SK2 steel, which is known for its toughness, wear resistance and high hardness to stand up to everyday cutting and trimming. With the fine point, this blade will make precise cuts more comfortably than standard utility knife blades. Blade measures 2.3" long x 0.75" high x 0.65 mm thick. Compatible with ROBERTS 10-218F, 10-221 and 10-920-6 utility knives.
