Diamond Grit Hole Saw (12-Pack)

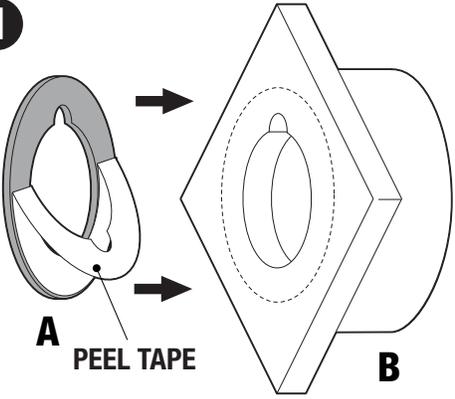

Blister card packaging

Use the QEP® Diamond Hole Saw Kits to drill holes when installing bathroom fixtures on various tile surfaces including the hardest porcelain, ceramic, marble and granite. These drills feature a metal saw with diamond grit edge for long lasting use, limited wear, faster cuts, less dust and less chipping. In addition to the hole saw, each kit contains adhesive pads, a water cooling system and drill guide. This hole saw must be used with the water system to keep it from overheating and must be used with a cordless drill.

How To Use

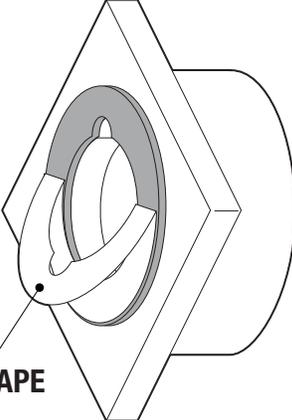

1

A PEEL TAPE B

Mark where hole is to be drilled. Remove paper on one side of the mounting tape (A) and stick to the bottom of the Drill Guide (B), aligning holes.

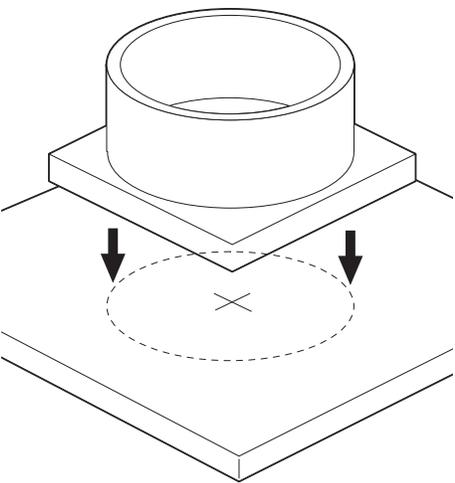

2

PEEL TAPE

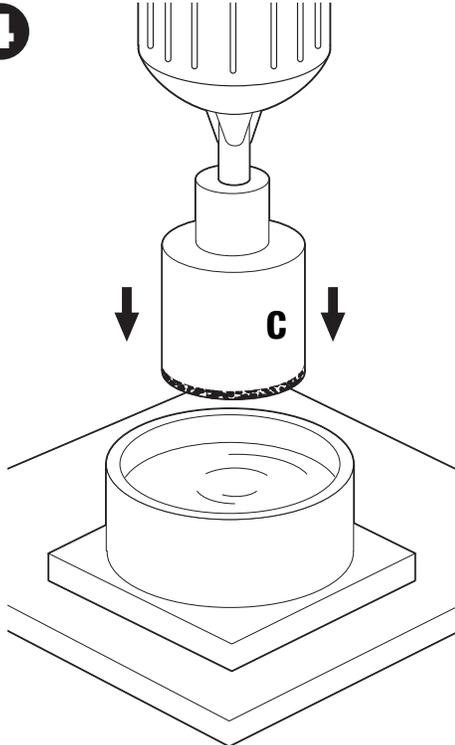

Remove paper on the other side.

3

Align Drill Guide over marked surface and press firmly.

4

C

Fill Drill Guide about halfway with water. Place Hole Saw (C) into guide and begin drilling.
