Architectural Design Luminaires

LSQ ARCHITECTURAL LED DIRECT / INDIRECT LINEAR

A single-piece diffuser gives the LSQ Architectural Linear its clean, modern appearance. A clear, satin finish on its one-piece extruded aluminum housing and solid endcaps complete the seamless design. The LSQ provides wide light distribution with a highly reflective optical chamber and diffused lens, making it ideal for commercial, retail, educational, or healthcare applications where individual units or continuous runs are desired. The luminaire is available with multiple installation options using an integral mounting rail. Oberon is available in 4-foot or 8-foot lengths in either on-board or remote driver configurations. White or custom powder coat options are also available.

- 4ft or 8ft extruded aluminum housing with solid endcaps
- Designed for individual units or continuous runs
- 3500K, 4000K and 5000K CCTs
- 120-277VAC
- 10kA surge protection
- Available in satin finish, white or custom powder coat
- Easy surface mount, pendant, or aircraft cable installation
- Motion sensor options
