## 6" ROUND IN-CEILING GUIDE AND CUT-OUT TEMPLATE

### 6" CUT-OUT TEMPLATE

1. Survey the surface to be cut to avoid wiring, pipes, and other obstructions that might interfere with the speaker.
2. Use this template to trace an outline in the desired speaker location, taking care for position and level.
3. Cut into the surface along the traced outline using a keyhole or drywall saw.
4. Proceed with speaker installation steps outlined in the speaker manual.

**NOTE:** See manual for detailed instructions at: [www.sonance.com](http://www.sonance.com).

### INSTALLATION GUIDE

1. Connect speaker wires to spring terminals.
2. Double check that the positive wire (+) is connected to the positive conductor (+) and the negative wire (-) is connected to the negative conductor (-).
3. Insert speaker into the hole.
4. Tighten the Roto-Lock® screws using low-torque setting on your screw gun. NEVER OVER TIGHTEN.
5. Attach grille.

**Note:** See the manual for grille painting instructions at: [www.sonance.com](http://www.sonance.com).
