# WPC4 LED Linear Wrap

## FEATURES & BENEFITS

2 ft

### 1. Visual Aesthetic & Application

The WPC4 LED Linear Wrap features a clean, low-profile design with smooth steel construction and a curved, milky-white diffuser that enhances any space with modern, glare-free illumination. Its versatile appearance and uniform light distribution make it ideal for retail, warehouse, residential utility, light commercial, and industrial environments.

### 2. Performance

Engineered for efficiency and longevity, the WPC4 offers field-selectable wattage and CCT options, enabling customized performance to meet diverse lighting needs. With a high CRI of over 80 and lumen output ranging from Minimum to High, it delivers consistent, high-quality illumination with a rated lifespan exceeding 50,000 hours.

### 3. Control

The fixture supports 0-10V dimming to off for seamless integration with daylight and occupancy sensors, maximizing energy savings. It also includes an accessible side-mounted selector switch for on-site adjustment of both color temperature and power level, offering flexible control without opening the fixture.

### 4. Installation

Designed for efficiency, the WPC4 enables quick, single-person installation with an integrated lens latch for tool-free access. It supports mounting to surfaces, junction boxes, or suspension systems, and allows easy maintenance, reducing labor time and installation costs.

### 5. Certification

The WPC4 is cULus 1598 listed for damp locations, DLC 5.1 Standard and Premium qualified, and RoHS compliant, ensuring it meets stringent safety, performance, and environmental standards. It also complies with FCC Part 15, Class A requirements for conducted and radiated emissions.

### 6. Warranty

Backed by a 5-year limited system warranty, the WPC4 offers dependable performance and peace of mind. NICOR also recommends installing surge protection to safeguard against over voltage events not covered under warranty.
