

Product Description

The DCG Recessed LED Gimbal Downlight Series provides an economical and straightforward solution for transitioning from traditional incandescent lighting to a durable, energy-efficient LED system. Its user-friendly twist-and-turn mechanism ensures precise gimbal positioning, offering up to 350° of rotation and 30° of adjustable tilt for the 4" version and up to 354° of rotation and 30° of adjustable tilt for the 6" model, making it a versatile solution for sloped ceilings and wall wash applications. With its sleek, flush-mounted design, the DCG not only delivers exceptional functionality but also enhances the aesthetic appeal of any interior space.

Construction

- Durable polymer flange
- Fully captured V-springs on 6"
- Friction fit arms on 4"

Optical System

- Polystyrene diffuser creates uniform light distribution with reduced glare
- Selectable models use a dual emitter array that enables CCT selection of 2700K, 3000K, 3500K, 4000K, or 5000K
- Beam angle of 90°
- Utilizes high performing LEDs with 90+ CRI and an R9 > 50

Electrical

- Input voltage 120VAC, 60Hz
- Power factor: ≥ 0.97
- THD $\leq 20\%$
- CCT selection switch on back of housing
- Dimmable to 5% with compatible leading edge (TRIAC) or trailing edge (ELV) dimmers
- Operating temperature of -4°F to 104°F (-20°C to 40°C)

Mounting and installation

- Compatible with most 4" or 5" & 6" recessed housings
- Suitable for IC-rated housings
- Quick and easy installation with an IDEAL luminaire connector and friction fit mounting system
- Ships with Edison base socket string (GU24 socket string available)

Finish

- Matte white

Listings

- cETLus 1598 Classified for damp locations
- CA Title 24 compliant (JA8)
- Compliant with NFPA® 70, NEC® Section 410.16 (A)(3) and 410.16 (C)(5) for closet use
- RoHS Compliant: Free from harmful and hazardous materials
- Meets FCC Part 15, Subpart B, Class B standards for conducted and radiated emissions
- TM-21 Reported L70(10K) hours = 54,000hrs
- LM-79, LM-80 testing performed in accordance with IESNA standards
- Meets FCC Part 15, Subpart B, Class B standards for conducted and radiated emissions

Warranty

- 5-year limited system warranty standard
- Warranty does not cover product failure due to an overvoltage event (power surge.) For installations where power surge may be possible, NICOR recommends installing additional surge protection at the electrical distribution panel

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
