

5.00” Die Cut Stickers

Design Requirements:

- For the best quality, design your sticker to fill the artboard.
- Vector artwork is preferred.
- If using raster images, make sure they are at least 300dpi.
- Use a minimum font size of 8pt and a line thickness of 1pt.

Cutting and Borders:

- Your stickers will be cut around the outside of the design, and any negative space inside will not be cut out.
- A 2mm border will be added between your design and the cut line. This border will be the same color as your sticker material.

Saving Your File:

- Upload your custom shape on a white or transparent background. If your artwork has a white background, the background of the sticker will print white.
- Metallic stickers should be saved with a transparent background.
- Delete all non Artwork layers and save file as a PDF/x-1a or PNG.
