

[CSR] USB Bluetooth Adapter

Installation Guide

This guide contains installation instructions for the following operating systems:

1. [Windows](#)

[CSR] USB Bluetooth Adapter

Installation for Windows

Install Guide

Before you install drivers and software for the device, make sure that your operating system is current (for example, the most recent service pack is installed).

To install the driver:

Windows 7/8

1. Right-click the zip folder that you downloaded, click **Extract All**, and complete the instructions.
2. In the list of extracted files, right-click the driver or software **setup.exe** file and select **Run as Administrator**.

Note: If the **Run as Administrator** option is not available, you might be attempting to run the installer from within the zipped file. Extract the files using the instructions in Step 1.

3. Follow the on-screen prompts to install the device drivers and software and restart the computer when prompted.
4. Your computer will automatically complete the installation and your device should be ready to use.

Windows 8.1/10

The drivers for this device are native to your version of Windows. Connect your Bluetooth device to your computer and Windows will automatically install the drivers.

If the drivers do not automatically install, or your device does not function as it should, you can install the latest drivers from StarTech.com. To do so, refer to the instructions above for Windows 7/8.
